

Minutes

Of the meeting of the:

Strathfield Local Planning Panel Meeting

Held on:

Thursday, 5 July 2018

Commencing at 10:00am at Council Town Hall (Supper Room), 65 Homebush Road, Strathfield

TABLE OF CONTENTS

Item	Page No.
SLPP AGENDA ITEMS	
SLPP - Report No. 1 DA2018/004 - 17 Coventry Road, Strathfield Lot 3 in DP 31617	4
SLPP - Report No. 2 DA2017/033/03- 37-39 Loftus Crescent, Homebush Lot 33 & 34 in DP 9154 & Lot Y in DP 446141	22
SLPP - Report No. 3 DA2017/138 - 4-10 Albert Road, Strathfield Lot 1 DP 433232	53
SLPP - Report No. 4 DA2017/194 - 18 Marlborough Road, Homebush West Lot 12 Section 1 DP 827	82

The meeting of the Strathfield Local Planning Panel Meeting was held in the Council Town Hall (Supper Room), 65 Homebush Road, Strathfield on Thursday 5 July 2018.
The meeting commenced at 10:30am.

PRESENT

The Hon Paul Stein QC AM – Chair
Sue Hobley- Expert
Graham Atkins- Expert
Alexander Ashley-Carrington- Community

ALSO PRESENT

Stephen Clements, Director Infrastructure, Development and Environment
Kandace Lindeberg, Principal Development Planner
Louise Mansfield, Senior Planner
Lily Lam, Administration Assistant

DECLARATIONS OF PECUNIARY INTEREST / CONFLICT OF INTEREST

Nil

TO: Strathfield Local Planning Panel Meeting - 5 July 2018
REPORT: SLPP – Report No. 1
SUBJECT: DA2018/004 - 17 COVENTRY ROAD, STRATHFIELD
 LOT 3 IN DP 31617
DA NO. DA2018/004

RECOMMENDATION

That Development Application No. DA2018/004 for the alterations and additions to a heritage listed residential dwelling at 17 Coventry Street, Strathfield be **APPROVED**, subject to the following conditions:

1. APPROVED PLANS AND REFERENCE DOCUMENTATION (GC)

The development, except where modified by a condition(s) of consent, is to be carried out in accordance with the following plans and reference documentation:

Plans affixed with Council's 'Development Consent' stamp relating to Development Consent No. DA2018/04:

Drawing No.	Title/Description	Prepared by	Issue / Revision & Date	Date received by Council
DA1.102	Proposed Floor Plans	Stubbs Design Tribe	26 April 2018	1 May 2018
DA1.03	Proposed Elevations	Stubbs Design Tribe	1 May 2018	1 May 2018
DA1.04	Proposed Sections	Stubbs Design Tribe	1 May 2018	1 May 2018
DA1.07	Stormwater Plan	Stubbs Design Tribe	27 April 2018	1 May 2018
DA1.08	Waste Management Plan and Demolition Plan	Stubbs Design Tribe	27 April 2018	1 May 2018
DA1.10	Infill Wall Plan	Stubbs Design Tribe	26 April 2018	1 May 2018
DA1.11	Infill Wall Elevation and Section	Stubbs Design Tribe	26 April 2018	1 May 2018
DA1.12	Front Fence Elevation	Stubbs Design Tribe	26 April 2018	1 May 2018
A302543	Basix Certificate	-	26 April 2018	1 May 2018
DA1.00	Site Analysis	Stubbs Design Tribe	26 April 2018	1 May 2018
DA1.06	Landscape Plan	Stubbs Design Tribe	4 June 2018	4 June 2018

Reference Documentation affixed with Council's 'Development Consent' stamp relating to Development Consent No. DA2018/04:

Title / Description	Prepared by	Issue/Revision & Date	Date received by Council
Heritage Impact Statement	Stubbs Design Tribe	1 May 2018	1 May 2018
Existing External	Stubbs Design Tribe	Issue B / 1 May 2018	1 May 2018

Colours and Finishes Schedule			
----------------------------------	--	--	--

In the event of any inconsistency, the conditions of this consent shall prevail.

(Reason: To ensure that the form of the development undertaken is in accordance with the determination of Council.)

2. CONSTRUCTION HOURS (GC)

No construction or any other work related activities shall be carried out on the site outside the hours of 7.00 am to 5.00 pm Mondays to Fridays and 8am to 1pm Saturdays.

No building activities are to be carried out at any time on a Sunday or public holiday.

Where the development involves the use of jackhammers/ rock breakers and the like or other heavy machinery, such equipment may only be used between the hours of 7.00 am - 5.00 pm Monday to Friday only.

(Reason: To maintain amenity to adjoining land owners.)

3. CONSTRUCTION WITHIN BOUNDARIES (GC)

The development including but not limited to footings, walls, roof barges and guttering must be constructed wholly within the boundary of the premises. No portion of the proposed structure shall encroach onto the adjoining properties. Gates must be installed so they do not open onto any footpath or adjoining land.

(Reason: Approved works are to be contained wholly within the subject site.)

4. DEMOLITION - HERITAGE ITEMS (GC)

Alterations to, and demolition of, the existing building shall be limited to that documented on the approved plans (by way of notation) or conditioned in this consent. No approval is given or implied for removal and/or rebuilding of any portion of the existing building which is shown to be retained.

Should any portion of the existing building which is indicated on the approved plans to be retained, be damaged for whatever reason, all the works in the area of this damaged portion are to cease and written notification given to Council. No work is to resume until the written approval of Council is obtained.

(Reason: Heritage conservation.)

5. DEMOLITION - SITE SAFETY FENCING (GC)

Site fencing is to be erected to a minimum height of 1.8m complying with WorkCover Guidelines, to exclude public access to the site, prior to any demolition works occurring and maintained for the duration of the demolition works.

(Reasons: Statutory requirement and health and safety.)

6. LANDSCAPING - TREE PRESERVATION (GC)

All street trees and trees on private property that are protected under Council's controls, shall be retained except where Council's prior written consent has been obtained. The

felling, lopping, topping, ringbarking, wilful destruction or removal of any tree/s unless in conformity with this approval or subsequent approval is prohibited.

All healthy trees and shrubs identified for retention on the approved drawings are to be suitably protected in accordance with Australian Standard AS4970 – 2009, Protection of Trees on Development Sites prior to the commencement of any works (including any demolition and excavation) and maintained for the duration of the works.

(Reason: To ensure the protection of trees to be retained on the site.)

7. MATERIALS – CONSISTENT WITH SUBMITTED SCHEDULE (GC)

All external materials, finishes and colours are to be consistent with the schedule submitted and approved by Council with the development application.

(Reason: To ensure compliance with this consent.)

8. PRINCIPAL CERTIFYING AUTHORITY (PCA) IDENTIFICATION SIGN (GC)

Prior to commencement of any work, signage must be erected in a prominent position on the work site identifying:

- i) the Principal Certifying Authority (PCA) by showing the name, address and telephone number of the PCA;
- ii) the Principal Contractor by showing the Principal Contractor's name, address and telephone number (outside of work hours) for that person; and
- iii) the sign must state that unauthorised entry to the work site is prohibited.

Any such sign is to be maintained while the work is being carried out, but must be removed when the work has been completed.

This clause does not apply to building work, subdivision work or demolition work that is carried out inside an existing building that does not affect the external walls of the building.

(Reason: Statutory requirement.)

9. SITE MANAGEMENT (DURING DEMOLITION AND CONSTRUCTION WORKS)

All of the following are to be satisfied/complied with during demolition, construction and any other site works:

- i) All demolition is to be carried out in accordance with Australian Standard AS 2601-2001.
- ii) Demolition must be carried out by a registered demolition contractor.
- iii) A single entrance is permitted to service the site for demolition and construction. The footway and nature strip at the service entrance must be planked out.
- iv) No blasting is to be carried out at any time during construction of the building.
- v) Care must be taken during demolition/ excavation/ building/ construction to prevent any damage to adjoining buildings.
- vi) Adjoining owner property rights and the need for owner's permission must be observed at all times, including the entering onto land for the purpose of undertaking works.
- vii) Any demolition and excess construction materials are to be recycled wherever practicable.
- viii) The disposal of construction and demolition waste must be in accordance with the requirements of the Protection of the Environment Operations Act 1997.

- ix) All waste on the site is to be stored, handled and disposed of in such a manner as to not create air pollution (including odour), offensive noise or pollution of land and/or water as defined by the Protection of the Environment Operations Act 1997. All excavated material should be removed from the site in an approved manner and be disposed of lawfully to a tip or other authorised disposal area.
- x) All waste must be contained entirely within the site.
- xi) Section 143 of the Protection of the Environment Operations Act 1997 requires waste to be transported to a place which can lawfully accept it. All non-recyclable demolition materials are to be disposed of at an approved waste disposal depot in accordance with legislation.
- xii) All materials on site or being delivered to the site are to generally be contained within the site. The requirements of the Protection of the Environment Operations Act 1997 must be complied with when placing/stockpiling loose material, disposing of concrete waste, or other activities likely to pollute drains or water courses.
- xiii) Details as to the method and location of disposal of demolition materials (weight dockets, receipts, etc.) should be kept on site as evidence of approved methods of disposal or recycling.
- xiv) Any materials stored on site must be stored out of view or in such a manner so as not to cause unsightliness when viewed from nearby lands or roadways.
- xv) Public footways, include nature strips and roadways adjacent to the site must be maintained and cleared of obstructions during construction. No building materials, waste containers or skips may be stored on the road reserve or footpath without prior separate approval from Council, including payment of relevant fees.
- xvi) Building operations such as brick-cutting, washing tools or paint brushes, and mixing mortar not be performed on the roadway or public footway or any other locations which could lead to the discharge of materials into the stormwater drainage system.
- xvii) All site waters during excavation and construction must be contained on site in an approved manner to avoid pollutants entering into waterways or Council's stormwater drainage system.
- xviii) Any work must not prohibit or divert any natural overland flow of water.
- xix) Toilet facilities for employees must be provided in accordance with WorkCover NSW.
- xx) Protection pads are to be installed to the kerb and gutter where trucks and vehicles enter the site.

(Reason: To ensure that demolition, building and any other site works are undertaken in accordance with relevant legislation and policy and in a manner which will be non-disruptive to the local area.)

10. **STORMWATER MANAGEMENT PLAN - CERTIFICATION REQUIREMENT (GC)**

A detailed Stormwater Management Plan (SWMP) in line with Council's Stormwater Management Code is to be prepared and certified by a practicing Chartered Professional Engineer on the National Professional Engineer's Register (NPER) at Engineers Australia and submitted to the Principal Certifying Authority and Council, prior to the issue of a Construction Certificate. The SWMP is to be based on the approved development as modified by any conditions of consent.

(Reason: To ensure appropriate provision is made for the disposal and management of stormwater generated by the development, and to ensure public infrastructure in Council's care and control is not overloaded.)

11. **SYDNEY WATER - STAMPED PLANS PRIOR TO COMMENCEMENT (GC)**

The approved plans must be submitted to a Sydney Water Quick Check agent or Customer Centre to determine whether the development will affect Sydney Water's sewer and water

mains, stormwater drains and/or easements, and if further requirements need to be met. Plans will be appropriately stamped.

For Quick Check agent details please refer to the web site www.sydneywater.com.au (see Building Developing and Plumbing then Quick Check) or telephone 13 20 92. The consent authority or a Certifying Authority must ensure that a Quick Check agent/Sydney Water has stamped the plans before the commencement of work.

(Reason: Compliance with Sydney Water requirements.)

12. UTILITIES AND SERVICES - PROTECTION OF (GC)

Any footings or excavation to be located or undertaken adjacent to Council's stormwater must be designed to address the following requirements:

- i) all footings and excavation must be located wholly within the site and clear of any easement boundaries;
- ii) all footings and excavation must be located a minimum of 1000mm from the centreline of the pipeline or 500mm from the outside of the pipeline, whichever is the greater distance from the centreline; and
- iii) footings must extend to at least the depth of the invert of the pipeline unless the footings are to be placed on competent bedrock.

If permanent excavation is proposed beneath the obvert of the pipeline, suitable means to protect the excavation and proposed retaining structures from seepage or other water flow from the pipeline and surrounding subsoil, must be provided. The design must be prepared by a qualified practicing Structural/Civil Engineer.

Construction plans must be approved by the appropriate utility's office (e.g. council, Sydney Water Corporation) to demonstrate that the development complies with the utility's requirements.

The applicant must provide written evidence (e.g. compliance certificate, formal advice) of compliance with the requirements of all relevant utility providers (e.g. Water, Energy, Telecommunications, Gas).

(Reason: To ensure protection of Council assets.)

13. LANDSCAPING - TREE PRESERVATION

The trees listed below shall be retained at all times:

<u>Tree</u>	<u>Height/ Spread (m)</u>	<u>Location</u>	<u>Protection Zone (m)</u>	<u>Structural Root Zone (m)</u>
1)Lophostemon confertus	10 x 12	Road reserve	5.5	2.8
2)Camellia sasanqua	6 x 3	Front	2.5	2.0
3) Lophostemon confertus	10 x 12	Road reserve	5.8	2.7
4) Lagerstroemia indica	8 x 6	Front	3.6	2.0
7)Melia azedarach	6 x 4	Adjoining	2.4	2.0
15) Ulmus parvifolia	9 x 9	Adjoining	4.8	2.6

and protected by the establishment of a **protection zone** (in accordance with Australian Standard AS4970-*Protection of trees on development sites*) before any site works begin (including any demolition/excavation). The protection zone shall be maintained for the duration of works and implemented as follows:

- a) A minimum 1.8m high barrier (Chain wire mesh panels, plywood or wooden paling fence panels: refer to AS4687-*Temporary fencing and hoardings* for fencing requirements) shall be erected around the perimeter of the stated Protection Zone as measured from the base of the tree (or where practical). Shade cloth or similar should be attached to reduce the transport of dust, other particulate matter and liquids into the protected area. Fence posts and supports should have a diameter greater than 20mm and be located clear of roots. The barrier shall be constructed so as to prevent pedestrian and vehicular entry into the protection zone. The barrier shall not project beyond the kerb onto the roadway or any adjacent footpath.
- b) Signs identifying the Protection Zone should be installed on the fencing and be visible from within the development site. Lettering should comply with AS4970-2009: *Protection of Trees on Development Sites*.
- c) No concrete slurry or wash, building materials, builders' rubble, excavation soil or similar shall be placed or stored within the tree protection zone.
- d) The whole of the tree protection zone shall be mulched to a minimum depth of 75mm.
- e) The tree protection zone shall be regularly watered.
- f) Any major structural roots which are encountered shall be pruned by a qualified Arborist.
- g) **No excavation or construction shall be carried out** within the stated *Structural Root Zone* distances from the base of the trunk surface.
- h) Only permeable surfaces (e.g. decomposed granite, gravel, turfpave, permeable paving systems or soft landscaping) are permitted within the canopy spread of the trees to be protected.

Manual excavation of retained trees is required within canopy spread of the retained trees as provided above.

To protect existing trees, masonry fence piers must be setback a minimum 3.0 metre radius from the retained trees referred above and all masonry walling between the piers within this zone must be supported on concrete beams (not strip footings).

(Reason: To ensure the protection of trees to be retained on the site.)

14. LANDSCAPING – TREES PERMITTED TO BE REMOVED

The following listed trees are permitted to be removed to accommodate the proposed development however, any of the trees listed below that are located on adjoining properties must only be removed after consent from the tree's owner has been sought and obtained in writing:

<u>Tree</u>	<u>Height/ Spread (m)</u>	<u>Location</u>
5)Persea americana	4 x 1	Subject site
6)Castanospermum australe	6 x 1	Subject site
8)Rothmania globosa	4 x 6	Subject site
9)Ficus sp	6 x 5	Subject site
10)Cupressus sempervirens	14 x 6	Subject site
11)Magnolia grandiflora	6.5 x 6	Subject site
12) Unknown	6 x 4	Subject site
13)Camellia sasanqua	4 x 3	Subject site
14)Bauhinia galpinii	5 x 3	Subject site

All trees permitted to be removed by this consent shall be replaced by species selected from Council's recommended planting list. Replacements shall be a minimum 50 litre container size and shall be maintained until maturity.

A minimum 600mm deep root deflection barrier shall be provided on both sides of the proposed driveway crossing(s) and footpaths.

(Reason: To ensure appropriate planting back onto the site.)

15. LANDSCAPING – MAINTAIENCE

General maintenance of Council's nature strip adjoining the development site, including regular lawn mowing, edging, irrigation of the lawn and street trees and restricting the storage of materials, rubbish and parking or driving of vehicles on the nature strip, must be carried out during the full period of all approved works (including any demolition and excavation).

(Reason: To ensure maintenance of Council's nature strip located outside the subject site.)

16. NOXIOUS WEEDS ACT 1993 – COMPLIANCE

All noxious weeds on the site shall be removed and destroyed as per their classification under the *Noxious Weeds Act* 1993.

(Reason: To ensure compliance with the Noxious Weeds Act 1993.)

CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF A CONSTRUCTION CERTIFICATE (CC)

17. LANDSCAPING - PLANTING ALONG SIDE AND REAR BOUNDARIES

Evergreen shrubs with a minimum 5 litre container size achieving a minimum mature height of 3m shall be planted along side and rear boundaries to provide privacy screening and shall be maintained at all times. Details of the selected plants shall be submitted to and approved by the Principal Certifying Authority **prior to the issue of a Construction Certificate.**

(Reason: to ensure appropriate planting is included on the subject site to reflect the proposed removal of trees as listed in Condition 14.)

18. BUILDING CODE OF AUSTRALIA - COMPLIANCE WITH (CC)

All architectural drawings, specifications and related documentation shall comply with the Building Code of Australia (BCA). All work must be carried out in accordance with the

requirements of the Building Code of Australia (BCA).

In the case of residential building work for which the Home Building Act 1989 requires there to be a contract of insurance in force in accordance with Part 6 of that Act, such a contract of insurance is to be in force before any building work authorised to be carried out by the consent commences.

Details demonstrating compliance with this condition are to be submitted to the Principle Certifying Authority, prior to issue of the Construction Certificate.

(Reason: This is a 'prescribed' condition under clause 98(1) of the Environmental Planning and Assessment Regulation 2000.)

19. CAR PARKING - COMPLIANCE WITH AS/NZS 2890.1:2004 (CC)

Car parking dimensions must comply with the Australian/New Zealand Standard AS/NZS 2890.1:2004 - Parking facilities - Off-street car parking. Details demonstrating compliance are to be submitted to the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: To ensure compliance with Australian Standards relating to parking of vehicles.)

20. COMMENCEMENT OF WORKS (NO WORKS UNTIL A CC IS OBTAINED)

Building work, demolition or excavation must not be carried out until a Construction Certificate has been issued by either Strathfield Council or a Principal Certifying Authority.

Demolition of any part of a building triggers 'commencement of erection of building' pursuant of section 4.19 of the EP&A Act 1979. Accordingly, demolition works must not commence until a Construction Certificate has been issued, a Principal Certifying Authority has been appointed and a Notice of Commencement has been issued.

(Reason: To ensure compliance with statutory provisions.)

21. COUNCIL PERMITS – FOR ALL ACTIVITIES ON COUNCIL LAND (CC)

Works Permit

(as per Section 68 of the Local Government Act 1993 and Section 138 and 139 of the Roads Act 1993)

A Works Permit is required for construction of a vehicular crossing (driveway), new stormwater down pipe connection to kerb and gutter, new footpath and/or stormwater connection. A Works Permit Application Form is available from Council's Customer Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website.

Standing Plant Permit

This permit must be applied for where it is intended to park a concrete pump, crane or other plant on the roadway or footpath. A Standing Plant Permit Application Form is available from Council's Customer Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website. Please note a Road Closure Permit is not required for standing plant.

Skip Bin Permit

This permit must be applied for if you intend to place a skip bin on the roadway or footpath. A Skip Bin Application Form is available from Council's Customer Centre or can be

downloaded from Council's website. The applicable fees and charges are located on Council's website.

Temporary Full or Part Road Closure Permit

This permit must be applied for if you require a full or a part road closure to take place to assist in your construction works. Please use the Works Permit Application Form, which is available from Council's Customer Service Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website. Please note a Road Closure Permit is not required for standing plant.

Hoarding/Fencing Permit

This permit must be applied for if you intend to erect a Class A (fence type) or Class B (overhead type) hoarding/fencing along the street frontage(s). A Hoarding Permit Application Form is available from Council's Customer Service Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website.

Work Zone Permit

This permit must be applied for if you require permanent parking along the kerbside at the front of the site during construction works. A Work Zone Permit Application Form is available from Council's Customer Service Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website.

Ground Anchoring Permit

This permit must be applied for, for the installation of ground anchors under Council's footway/road reserve. It does not cover ground anchors under private properties. A separate approval is required to be obtained from Roads and Maritime Services (RMS) if it is proposed to install ground anchors under a State or Classified Regional Road (please refer to the end of this application form for more information).

(Reason: Council requirement)

22. **EROSION AND SEDIMENTATION CONTROL PLAN (CC)**

An Erosion and Sediment Control Plan is to be prepared where construction or excavation activity requires the disturbance of the soil surface and existing vegetation. Details including drawings and specifications must provide adequate measures for erosion and sediment control to ensure:

- i) Compliance with the approved Soil and Water Management Plan.
- ii) Removal or disturbance of vegetation and top soil is confined to within 3m of the approved building area (no trees to be removed without approval).
- iii) All uncontaminated run-off is diverted around cleared or disturbed areas.
- iv) Silt fences or other devices are installed to prevent sediment and other debris escaping from the cleared or disturbed areas into drainage systems or waterways.
- v) All erosion and sediment controls are fully maintained for the duration of demolition/development works.
- vi) Controls are put into place to prevent tracking of sediment by vehicles onto adjoining roadways.
- vii) All disturbed areas are rendered erosion-resistant by turfing, mulching, paving or similar.
- viii) All water pumped or otherwise removed from excavations or basement areas is filtered to achieve suspended solids/non filterable residue levels complying with the Australian Water Quality guidelines for Fresh and Marine Waters.
- ix) Pumped or overland flows of water are discharged so as not to cause, permit or allow erosion before the commencement of work (and until issue of the occupation

certificate).

Details of the proposed soil erosion and sedimentation controls are to be submitted to the Principal Certifying Authority with the Construction Certificate Application. Under no circumstances are any works to commence, prior to these details being approved by the Principal Certifying Authority and the controls being in place on the site.

(Reason: Environmental protection.)

23. **SECTION 7.11 CONTRIBUTION PAYMENT - INDIRECT CONTRIBUTIONS PLAN) (CC)**

In accordance with the provisions of Section 7.11 of the Environmental Planning and Assessment Act 1979 and the Strathfield Indirect Development Contributions Plan 2010-2030, a contribution in the form of cash, cheque or credit card (financial transaction fee applies) shall be paid to Council for the following purposes:

Local Amenity Improvement Levy	\$8,000.00
---------------------------------------	-------------------

The total amount of the contribution is valid as at the date of determination and is subject to quarterly indexation. The amount of the contribution under this condition shall be indexed in accordance with clause 4.12 of the Strathfield Indirect Development Contributions Plan 2010-2030.

Contributions must be receipted by Council and submitted to the Accredited Certifier, prior to the issue of any Construction Certificate.

A copy of this condition is to be presented to Council's Customer Service Centre when paying the contribution so that it can be recalculated.

Note: A copy of Strathfield Council's Section 7.11 Indirect Development Contributions Plan may be downloaded from Council's website.

(Reason: To enable the provision of public amenities and services required/anticipated as a consequence of increased demand resulting from the development.)

24. **STORMWATER - RAINWATER RE-USE (CC)**

A rainwater re-use system shall be provided in accordance with either the BASIX minimum requirements, any relevant Council Rainwater Policy and/or specification of the management of stormwater, whichever is applicable. A detailed stormwater plan showing the proposed re-use system shall be submitted to and approved by the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: Compliance and amenity.)

25. **SWIMMING POOLS (CONSTRUCTION OF)**

The approved swimming pool/spa must comply with all relevant legislation including:

- i) Swimming Pools Amendment Act 1992 (as amended);
- ii) Swimming Pools Regulations 2008; and
- iii) Australian Standard AS1926.1-2012 – Safety Barriers for Swimming Pools.

Details demonstrating compliance with this condition shall be demonstrated to the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: Safety and statutory compliance.)

26. **SWIMMING POOLS - MECHANICAL PLANT ENCLOSURE (CC)**

Any mechanical plant associated with the swimming pool shall be acoustically treated to comply with the Protection of the Environment Operations Act 1997. Details are to be submitted to the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: To ensure the acoustic amenity of the neighbouring residents.)

27. **TREE BONDS (CC)**

A tree bond of **\$4,950.00** (calculated in accordance with Council's adopted Fees and Charges) shall be paid to Council, prior to the issue of a Construction Certificate.

The deposit is required as security against any damage to existing trees to be retained on Council's road reserve, during works on the site. The applicant must bear the cost of all restoration works to Council's property damaged during the course of this development.

Payment may be accepted in the form of cash, bank guarantee, cheque or credit card (financial transactions fees apply). Note: Additional fees apply for the lodgement of a bank guarantee in lieu of cash bond applies in accordance with Council's adopted Fees and Charges.

A refund of the Tree Bond must be made in writing.

Tree Bonds may be forfeited if a tree is dead, made dangerous or has been terminally damaged, or will be held until tree/s have fully recovered from the construction damage or were replacement/planted trees have become fully established and are over 6 metres in height.

(Reason: To ensure the protection of trees to be retained on Council's Road Reserve.)

28. **STORMWATER DRAINAGE (CC)**

The following stormwater precautions are required to be provided on the site:

- i) Grated drains shall be provided along the driveway/basement entry at the vehicular crossing(s) and are to connect to the internal drainage system.
- ii) Overflow paths shall be provided to allow for flows in excess of the capacity of the pipe/drainage system draining the site.
- iii) Allowance shall be made for surface runoff from adjacent properties, and to retain existing surface flow path systems through the site. Any redirection or treatment of these flows shall not adversely affect any other properties
- iv) Boundary fencing shall be erected in such a manner as not to interfere with the natural flow of ground and surface water to the detriment of any other party.

(Reason: To ensure the site is drained appropriately and does not interfere with the natural flow of flood waters.)

29. **WASTE MANAGEMENT PLAN (CC)**

A Waste Management Plan (WMP) is to be provided in accordance with Part H of Strathfield Consolidated Development Control Plan 2005. All requirements of the approved Waste Management Plan must be implemented during demolition, construction and on-

going use of the premises.

The WMP must identify the types of waste that will be generated, all proposals to re-use, recycle or dispose of the waste and designs of the waste storage and collection areas. The WMP is to be submitted to council for comment prior to approval by the Principal Certifying Authority, approval must be provided prior to the issuing of the Construction Certificate.

Full compliance must be given to the endorsed Waste Management Plan submitted for the proposed development. Copies of any weighbridge receipts from all approved waste disposal facilities shall be retained for presentation to the Principal Certifying Authority upon request.

NOTE: The property must be inspected by a Council Waste Officer prior to the issue of an Occupation Certificate so as to ensure that the correct number of general waste and recycling bins are ordered from Strathfield Council.

(Reason: To ensure appropriate management of waste.)

30. **CAR PARKING - VEHICULAR ACCESS RAMPS (CC)**

Vehicular access ramps shall comply with the provisions of AS/NZS 2890.1:2004. Plans to be submitted shall contain the following details:

- i) Longitudinal section along the extreme wheel paths of each driveway/access ramp at a scale of 1:25 demonstrating compliance with the scraping provisions of AS/NZS 2890.1:2004. It shall include all levels and grades, including those levels stipulated as boundary levels, both existing and proposed. It shall extend from the centre-line of the roadway through to the parking area.
- ii) Sections showing the clearance to the underside of any overhead structure (minimum headroom requirements 2200mm minimum for standard headroom clearance or 2400mm where disabled access provisions are to be provided) demonstrating compliance with the provisions of AS/NZS 2890.1:2004.
- iii) Longitudinal section along the gutter line showing how it is intended to transition the vehicular crossing into the existing kerb and gutter. Boundary levels shall generally run parallel with the kerb levels.
- iv) Location of verge trees, street furniture and service installations.
- v) Superimposition of vehicle turning circles for access into parking spaces.
- vi) Certification that the design complies with AS/NZS 2890.1:2004 by a Qualified Engineer.

The certification referred to in (vi) above shall be submitted to the Principal Certifying Authority prior to the issue of a Construction Certificate (for the design) and to the Principal Certifying Authority prior to the issue of any Occupation Certificate for the 'as-built works'.

(Reason: To ensure adequate vehicular access can be achieved.)

31. **CAR PARKING - COMPLIANCE WITH AS/NZS 2890.1:2004 (CC)**

Car parking dimensions must comply with the Australian/New Zealand Standard AS/NZS 2890.1:2004 - Parking facilities - Off-street car parking. Details demonstrating compliance are to be submitted to the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: To ensure compliance with Australian Standards relating to parking of vehicles.)

32. **COMMENCEMENT OF WORKS (NO WORKS UNTIL A CC IS OBTAINED)**

Building work, demolition or excavation must not be carried out until a Construction Certificate has been issued by either Strathfield Council or a Principal Certifying Authority.

Demolition of any part of a building triggers 'commencement of erection of building' pursuant of section 4.19 of the EP&A Act 1979. Accordingly, demolition works must not commence until a Construction Certificate has been issued, a Principal Certifying Authority has been appointed and a Notice of Commencement has been issued.

(Reason: To ensure compliance with statutory provisions.)

CONDITIONS TO BE SATISFIED PRIOR TO THE COMMENCEMENT OF WORKS (CW)

33. APPOINTMENT OF A PRINCIPAL CERTIFYING AUTHORITY (PCA) (CW)

No work shall commence in connection with this Development Consent until:

- i) A construction certificate for the building work has been issued by the consent authority or a Principal Certifying Authority.
- ii) The person having the benefit of the development consent has appointed a principal certifying authority for the building work, and notified the principal certifying authority that the person will carry out the building work as an owner/builder, if that is the case.
- iii) The principal certifying authority has, no later than 2 days before the building work commences:
 - notified the Council of his or her appointment, and
 - notified the person having the benefit of the development consent of any critical stage inspections and other inspections that are to be carried out in respect of the building work.
- iv) The person having the benefit of the development consent, if not carrying out the work as an owner-builder, has:
 - appointed a principal contractor for the building work who must be the holder of a contractor licence if any residential building work is involved;
 - notified the principal certifying authority of such appointment; and
 - unless that person is the principal contractor, notified the principal contractor of any critical stage inspections and other inspections that are to be carried out in respect of the building work.
- v) The person having the benefit of the development consent has given at least 2 days notice to the Council of the person's intention to commence the erection of the building.

Note: If the principal certifying authority is the Council, the nomination will be subject to the payment of a fee for the service to cover the cost of undertaking all necessary inspections and the issue of the appropriate certificates.

Under the Environment Planning and Assessment (Quality of Construction) Act, 2003, a sign must be erected in a prominent position on the work site showing the name, address and telephone number of the principal certifying authority; the name of the principal contractor (if any) for the building work and a telephone number at which that person may be contacted outside working hours. That sign must also state that unauthorised entry is prohibited. The sign must not be removed until all work has been completed.

(Reason: Statutory requirement.)

34. HOME BUILDING COMPENSATION FUND (CW)

No residential building work within the meaning of the Home Building Act 1989 may commence until:

- i) A contract of insurance in accordance with Part 6 of the Home Building Act 1989 is entered into and in force, where such a contract is required under that Act (this is a prescribed condition of consent pursuant to clause 981(b) Environmental Planning and Assessment Regulation 2000.
- ii) The PCA is satisfied that the principal contractor for the work is the holder of the appropriate licence and is covered by the appropriate insurance, in each case if required by the Home Building Act 1989 (unless the work is to be carried out by an owner-builder).
- iii) If the work is to be carried out by an owner builder, that the owner builder is the holder of any owner -builder permit required under the Home Building Act 1989.
- iv) Written notice of the following information has been provided to Council (this is a prescribed condition of consent pursuant to clause 98B of the Environmental Planning and Assessment Regulation 2000):
 - In the case of work for which a principal contractor is required to be appointed:
 - the name and licence number of the principal contractor; and
 - the name of the insurer by which the work is insured under Part 6 of the Home Building Act 1989.
 - In the case of work to be done by an owner-builder:
 - the name of the owner-builder; and
 - if the owner-builder is required to hold an owner-builder permit under the Home Building Act 1989, the number of the owner-builder permits.

Where Council is not the PCA, the PCA is responsible for notifying Council of the above matters.

Note: Where arrangements for doing residential building work change while the work is in progress so that the above information becomes out of date, the PCA (where not the Council) must provide Council with written notice of the updated information.

(Reason: Statutory requirement.)

35. NOTICE OF COMMENCEMENT (CW)

No work shall commence until the following details are submitted to Council:

- i) a Notice of Commencement (form will be attached with issue of a Construction Certificate or available from our website) within two (2) days of the date on which it is proposed to commence works associated with the Development Consent;
- ii) details of the appointment of a Principal Certifying Authority (either Council or another Principal Certifying Authority); and
- iii) details of the name, address and licence details of the Builder.

(Reason: Statutory requirement.)

CONDITIONS TO BE SATISFIED DURING DEMOLITION AND BUILDING WORKS (DW)**36. OBSTRUCTION OF PUBLIC WAY NOT PERMITTED DURING WORKS (DW)**

The public way must not be obstructed by any materials, vehicles, refuse, skips or the like, under any circumstances, without the prior approval of Council.

(Reason: To maintain public access and safety.)

37. FILL MATERIAL (DW)

The only waste derived material which may be received at the development site is:

- i) Virgin excavated material (within the meaning of the Protection of the Environment Operations Act 1997), and
- ii) any other waste-derived material the subject of a resource recovery exemption under cl.51A of the Protection of the Environment Operations (Waste) Regulation 2005 that is permitted to be used as fill material.

Any (b)-type material received at the development site must be accompanied by documentation certifying by an appropriately qualified environmental consultant the materials compliance with the exemption conditions; and this documentation must be provided to the Principal Certifying Authority on request.

(Reason: To ensure imported fill is of an acceptable standard for environmental protection purposes.)

38. PUBLIC INFRASTRUCTURE AND SERVICES (DW)

The applicant must comply with the requirements (including financial costs) of any relevant utility provider (e.g. Energy Australia, Sydney Water, Telstra, RMS, Council etc.) in relation to any connections, works, repairs, relocation, replacements and/or adjustments to public infrastructure or services affected by the development.

(Reason: To maintain public infrastructure and/or services.)

CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF AN OCCUPATION CERTIFICATE (OC)

39. DRAINAGE SYSTEM - MAINTENANCE OF EXISTING SYSTEM (OC)

Where elements of the existing drainage system are to be utilised, the existing drainage system shall be overhauled and maintained clear of silt and accumulated debris. Silt and the like shall be removed, not flushed from the system.

A certificate shall be provided by a suitably qualified person (a registered plumber or a person of equivalent or greater experience or qualification) to the satisfaction of the Principal Certifying Authority, prior to the issue of any Occupation Certificate to confirm that the system is in good working order and adequate to accept additional flows having regard to any relevant standards and/or Sydney Water requirements.

(Reason: Maintenance and environment.)

40. ENGINEERING WORKS (CERTIFICATION OF)

Prior to occupation of the premises, a Work As Executed (WAE) Plan of all engineering and/or drainage works is to be submitted to the Principal Certifying Authority. The WAE Plan is to be certified by a suitably Qualified Engineer, with Corporate Membership standing in the Institution of Engineers Australia and registered on the National Professional Engineers Register (NPER) under the appropriate professional category, demonstrating that:

- i) the stormwater drainage system; and/or
- ii) the car parking arrangement and area; and/or
- iii) any related footpath crossing works; and/or
- iv) the proposed basement pump and well system; and/or
- v) the proposed driveway and layback; and/or
- vi) any other civil works

have been constructed in accordance with the approved plans and any relevant Standards and Council policies/specifications.

For major works, such as subdivisions, works within the road reserve (requiring separate S138 approval) and as where specified by Council, a Part 4A Certificate will be required. It is strongly recommended that an Engineer supervise all engineering related works.

Where Council is not the Principal Certifying Authority, an electronic copy of the above documents is to be provided to Council, prior to the issue of any Occupation Certificate.

(Reason: Asset management.)

41. **SWIMMING POOLS - REGISTRATION AND REQUIREMENTS (OC)**

The approved swimming pool/spa must comply with all relevant legislation including:

- i) Swimming Pools Amendment Act 1992 (as amended);
- ii) Swimming Pools Regulations 2008; and
- iii) Australian Standard AS1926.1-2012 – Safety Barriers for Swimming Pools.

Swimming pool owners must register their swimming pool or spa on the NSW Swimming Pool Register. A copy of a valid certificate of compliance or relevant occupation certificate must be attached to new residential tenancy agreements to rent property with a swimming pool or spa pool. Note: This requirement does not apply to a lot in strata or community title schemes with more than two lots.

A copy of a valid certificate of compliance or relevant occupation certificate must be attached to new residential tenancy agreements to rent property with a swimming pool or spa pool. Note: This requirement does not apply to a lot in strata or community title schemes with more than two lots; or for any off the plan contacts.

Details demonstrating compliance with this condition shall be demonstrated to the Principal Certifying Authority, prior to the issue of any Occupation Certificate.

(Reason: Safety and statutory compliance.)

42. **STORMWATER - CERTIFICATION OF THE CONSTRUCTED DRAINAGE SYSTEM (OC)**

The constructed stormwater system shall be certified by a suitably qualified person, in accordance with Council's Stormwater Management Code, prior to the issue of any Occupation Certificate.

(Reason: Adequate stormwater management.)

43. **STORMWATER - COVENANT AND RESTRICTION AS TO USER FOR STORMWATER CONTROLLED SYSTEMS (OC)**

Prior to the issue of any Occupation Certificate, the applicant shall register a Positive Covenant and a Restriction as to User under section 88E and or section 88B of the

Conveyancing Act as appropriate in favour of Council, ensuring the ongoing retention, maintenance and operation of the stormwater facility (on-site detention, pump-out, charged lines, etc.).

Where any drainage line or service conduit is to traverse any property other than that which it serves, an appropriate easement will be required. In this case, the applicant shall register an easement no less than 1200mm wide over the proposed drainage line or service concurrently with any subdivision registration.

The wording on the 88E and/or the 88B Instrument is to make reference to the Council file where the Construction plans and the Work As Executed (as built), plans are held. Typical wording can be obtained from Council's Specification for the Management of Stormwater document.

(Reason: To ensure the on-site detention and/or pump system is maintained to an appropriate operational standard.)

44. **OCCUPATION OF BUILDING (OC)**

A person must not commence occupation or use (or change of use where an existing building) of the whole or any part of a new building (within the meaning of section 109H (4) of the Act) unless an Interim Occupation Certificate or Final Occupation Certificate has been issued in relation to the building or part.

The Principal Certifying Authority is required to be satisfied, amongst other things, that:

- i) all required inspections (including each applicable mandatory critical stage inspection) have been carried out; and
- ii) any preconditions to the issue of the certificate required by a development consent have been met.

Note: New building includes an altered portion of, or an extension to, an existing building.

(Reason: Statutory requirement.)

45. **RAINWATER TANKS (OC)**

Rainwater tanks must be installed on residential properties by a suitably qualified and licensed plumber and in accordance with the following:

- i) Australian/New Zealand Standard AS/NZS 3500:2003;
- ii) NSW Code of Practice Plumbing and Drainage, 2006 produced by Committee on Uniformity of Plumbing and Drainage Regulations in NSW (CUPDR); and
- iii) Council's rainwater tank policy.

Details demonstrating compliance with this condition are to be submitted to the Principal Certifying Authority, prior to the issue of any Occupation Certificate.

(Reason: To protect public health and amenity.)

RESOLUTION

This application be **APPROVED** subject to the recommended conditions contained in the report as amended by the panel.

REASONS:

1. The panel agrees with the planner's assessment of the application and is of the view that the impact on the heritage item will be satisfactory.

**** End Minutes - Report No. 1****

TO: Strathfield Local Planning Panel Meeting - 5 July 2018
REPORT: SLPP – Report No. 2
SUBJECT: DA2017/033/03- 37-39 LOFTUS CRESCENT, HOMEBUSH
LOT 33 & 34 IN DP 9154 & LOT Y IN DP 446141
DA NO. DA2017/033/03

RECOMMENDATION

Pursuant to Section 4.55(2) of the Environmental Planning and Assessment Act 1979, the proposed modification(s) to Development Consent No. 2017/033 involving the construction of an additional storey to Building B, an additional three (3) residential units, minor reconfigurations of unit layouts and lift an amended schedule of colours and external finishes at 37-39 Loftus Crescent, Homebush be **APPROVED**, subject to:

1. The original conditions of consent of Development Application No. 2017/033 as granted deferred commencement by SIHAP on 1 June 2017 for the demolition of existing structures and construction of a part (7) storey and part (5) storey residential flat building containing (62) units above two (2) levels of basement car parking.
2. As modified by the satisfaction of deferred commencement matters under delegated authority on 5 October 2017.
3. As modified by the Section 96(1) application (DA2017/033/01) approved under delegated authority on 27 October 2017 to correct a misdescription on the Notice of Determination of the approved development.
4. As modified by the Section 96(1A) application (DA2017/033/02) approved by IDAP on 8 November 2017 involving modifications to the stormwater design and correct a misdescription on the Notice of Determination of the approved development.
5. As modified by the Section 4.55(2) application (DA2017/033/03) to construct an additional storey to Building B, an additional three (3) residential units, minor reconfigurations of unit layouts and lift an amended schedule of colours and external finishes involving:
 - Amendment to DAGC001 Approved Plans and Refer Documentation;
 - Amendment to Special Condition DASP003 Adaptable Units;
 - Amendment to DACC012 Car Parking;
 - Amendment to DAGC023 Materials (Schedule of External Materials, Finishes and Colours
 - Amendment to DACC019 Section 7.11 Contributions
 - Addition of Special Condition DASP007 Residential Storage;
 - Addition of Special Condition DASP008 Visual Privacy Measures; and

The conditions that have been modified as part of this application are highlighted in red.

Accordingly, Development Consent No. 2017/033 is approved as follows:

Development Description:

Demolition of existing structures and construction of a (8) storey and (6) storey residential flat building containing (65) units above two (2) levels of basement car parking.

Accordingly DA2017/033 shall read as follows:

Special Conditions (DASC)

DASP001 CLOTHES-DRYING FACILITY

Prior to the issue of a Construction Certificate, amended plans shall be prepared which provide a communal clothes-drying facility in a suitable location behind the front building line.

(Improve residential amenity)

DASP002 BULKY WASTE STORAGE ROOM

Prior to the issue of any Occupation Certificate a bulky waste storage room of 32m² needs to be incorporated into the plans in accordance with the requirements PART H 'Waste Minimisation and Management' of the Strathfield Consolidated Development Control Plan 2005.

(Ensure compliance with Council's waste management requirements)

DASP003 ADAPTABLE UNITS

A minimum of (13) units shall be designed to achieve compliance with the Livable Housing Guideline's silver level universal design features. Details demonstrating this shall be submitted to the Principal Certifying Authority for approval **prior to the issue of a Construction Certificate**.

(Ensure compliance with the Apartment Design Guide – Objective 4Q1)

DASP004 APARTMENT SIZE AND LAYOUT

The bedroom pertaining to unit AG.01 shall be installed with a northern-orientated window providing either with fixed privacy screening or obscure glazing to minimise opportunities for overlooking from the common walkway adjoining the bedroom.

The balcony of Unit A6.03 is required to have a minimum depth of 2.4m.

(Ensure compliance with the Apartment Design Guide – Objective 4D-1)

DASP005 TREE PROTECTION

To protect existing trees, masonry fence piers must be setback a minimum 3 metre radius from the *Tristanopsis laurina* within Council's nature strip on Loftus Crescent and all masonry walling between the piers within this zone must be supported on concrete beams (not strip footings).

(Tree protection)

DASP006 SYDNEY TRAINS CONCURRENCE CONDITIONS

- If required by Sydney Trains, prior to the commencement of works, prior to the issue of the Occupation Certificate, or at any time during the excavation and construction period deemed necessary by Sydney Trains, a joint inspection of the rail infrastructure and property in the vicinity of the project is to be carried out by representatives from Sydney Trains and the Applicant. The dilapidation surveys will establish the extent of any existing damage and enable any deterioration during construction to be observed. The submission of a detailed dilapidation report will be required unless otherwise notified by Sydney Trains.

- An acoustic assessment is to be submitted to Council prior to the issue of a construction certificate demonstrating how the proposed development will comply with the Department of Planning's document titled "Development Near Rail Corridor and Busy Roads – Interim Guidelines".
- Prior to the issue of a Construction Certificate the Applicant is to engage an Electrolysis Expert to prepare a report on the Electrolysis Risk to the development from stray currents. The Applicant must incorporate in the development all the measures recommended in the report to control that risk. A copy of the report is to be provided to the Principal Certifying Authority with the application for a Construction Certificate.
- The design, installation and use of lights, signs and reflective materials, whether permanent or temporary, which are (or from which reflected light might be) visible from the rail corridor must limit glare and reflectivity to the satisfaction of Sydney Trains. The Principal Certifying Authority is not to issue the Construction Certificate until written confirmation has been received from Sydney Trains confirming that this condition has been satisfied.
- If required by Sydney Trains, prior to the issue of a Construction Certificate a Risk Assessment/Management Plan and detailed Safe Work Method Statements (SWMS) for the proposed works are to be submitted to Sydney Trains for review and comment on the impacts on rail corridor. The Principal Certifying Authority is not to issue the Construction Certificate until written confirmation has been received from Sydney Trains confirming that this condition has been satisfied.
- If required by Sydney Trains, a track monitoring plan (including instrumentation and the monitoring regime during excavation and construction phase) is to be submitted to Sydney Trains for review and endorsement prior to the issuing of a Construction Certificate. The Principal Certifying Authority is not to issue a Construction Certificate until written confirmation has been received from Sydney Trains advising of the need to undertake the track monitoring plan, and is required, that it has been endorsed.
- Unless advised by Sydney Trains in writing, all excavation, shoring and piling works within 25m of the rail corridor are to be supervised by a geotechnical engineer experienced with such excavation projects.
- No rock anchors/bolts are to be installed into Sydney Trains property or easements.
- Prior to the issuing of an Occupation Certificate the Applicant is to submit as-built drawings to Sydney Trains and Council. The as-built drawings are to be endorsed by a Registered Surveyor confirming that there has been no encroachment into Sydney Trains property or easements, unless agreed to be these authorities. The Principal Certifying Authority is not to issue the final Occupation Certificate until written confirmation has been received from Sydney Trains confirming that this condition has been satisfied.
- If required by Sydney Trains, prior to the issue of a Construction Certificate the Applicant is to contact Sydney Trains Rail Corridor Management group to determine the need for public liability insurance cover. If insurance cover is deemed necessary this insurance be for sum as determined by Sydney Trains and shall not contain any exclusion in relation to works on or near the rail corridor, rail infrastructure. The Applicant is to contact Sydney Trains Rail Corridor Management Group to obtain the level of insurance required for this particular proposal. Prior to issuing the Construction Certificate the Principal Certifying Authority must witness written proof of this insurance in conjunction with Sydney Trains written advice to the Applicant on the level of insurance required.
- If required by Sydney Trains, prior to the issue of a Construction Certificate the Applicant is to

contact Sydney Trains Rail Corridor Management Group to determine the need for the lodgement of a Bond or Bank Guarantee for the duration of the works. The Bond/Bank Guarantee shall be for the sum determined by Sydney Trains. Prior to the issuing of the Construction Certificate the Principal Certifying Authority must witness written advice from Sydney Trains confirming the lodgement of this Bond/Bank Guarantee.

- Sydney Trains or Transport for NSW (TNSW), and persons authorised by those entities for the purpose of this condition, are entitled to inspect the site of the development and all structures to enable it to consider whether those structures have been or are being constructed and maintained in accordance with the approved plans and these conditions of consent, on giving reasonable notice to the principal contractor for the development or the owner or occupier of the part of the site to which access is sought.
- Prior to the issuing of a Construction Certificate the Applicant is to submit to Sydney Trains a plan showing all craneage and other aerial operations for the development and must comply with all Sydney Trains requirements. If required by Sydney Trains, the Applicant must amend the plan showing all craneage and other aerial operations to comply with all Sydney Trains requirements. The Principal Certifying Authority is not to issue the Construction Certificate until written confirmation has been received from the Sydney Trains confirming that this condition has been satisfied.
- Sydney Trains advises they have a 33kV H/V aerial transmission line near to this site and any works, scaffolding and crane movements within 6 metres of the nearest transmission line conductor must be discussed and approved by Sydney Trains beforehand.
- In addition, all works within 6m of the nearest transmission line conductor must comply with:
 - ISSC 20 – Guidelines for the Management of Activities within Electricity Easements and Close to Electricity Infrastructure
 - The Safe Approach Distances (SADs) in the Sydney Trains Document titles “SMS-06-GD-0268 – Working Around Electrical Equipment”.
- Copies of any certificates, drawings, approvals/certification or documents endorsed by, given to or issued by Sydney Trains must be submitted to Council for its records prior to the issuing of a Construction Certificate.
- Any conditions issued as part of Sydney Trains approval/certification of any documentation for compliance with the Sydney Trains conditions of consent, those approval/certification conditions will also form part of the consent conditions that the Applicant is required to comply with.

(Achieve compliance with Clause 86(1) of the Infrastructure SEPP 2007)

DASP007 RESIDENTIAL STORAGE

Purpose built storage compartment(s) shall be provided within each of the resident car parking bays and/or associated dwellings at the following rates:

- 6m³ for each one (1) bedroom unit
- 8m³ for each two (2) bedroom unit, and
- 10m³ for each unit with three (3) bedrooms or more.

In order to deter theft, the security compartments shall be designed in a manner to conceal from view and secure their contents i.e. through the use of dense, solid material and a shroud covered padlock (or similar).

Amended plans showing the location and configuration of each of storage compartments shall be

submitted to an approved by the Principal Certifying Authority **prior to the issue of the Construction Certificate.**

DASP008 VISUAL PRIVACY MEASURES

The eastern and western elevations of balconies B5.01 and B5.02 are to be installed with fixed privacy louvres to minimise direct overlooking opportunities.

Amended plans demonstrating compliance with the above shall be submitted to and approved by the Principal Certifying Authority **prior to the issue of the Construction Certificate.**

(Reason: Visual Privacy)

DASP009 COMMUNAL SPACE ON ROOF OF LEVEL 4

The area shall be provided with suitable shade structures.

(Reason: Amenity)

General Conditions (DAGC)

DAGC001 APPROVED PLANS AND REFERENCE DOCUMENTATION

The development, except where modified by a condition(s) of consent, is to be carried out in accordance with the following plans and reference documentation:

Drawings affixed with Council's 'Development Consent' stamp relating to Development Consent No. 2017/033:

In the event of any inconsistency between the approved plans and supplementary documentation, the plans will prevail. However, the conditions of this consent shall prevail to the extent of any inconsistency.

(Reason: To ensure that the form of the development undertaken is in accordance with the determination of Council)

DAGC005 BUILDING HEIGHT (MAXIMUM RL TO BE COMPLIED WITH)

The height of the building measured to Australian Height Datum (AHD) must not exceed Relative

Level (RL) 41.800m AHD to the roof ridge of Building A.

(Reason: To ensure the approved building height is complied with)

DAGC007 CONSTRUCTION HOURS

No construction or any other work related activities shall be carried out on the site outside the hours of 7.00 am to 5.00 pm Mondays to Fridays and 8am to 1pm Saturdays.

No building activities are to be carried out at any time on a Sunday or public holiday.

Where the development involves the use of jackhammers/ rock breakers and the like or other heavy machinery, such equipment may only be used between the hours of 7.00 am - 5.00 pm Monday to Friday only.

(Reason: To maintain amenity to adjoining land owners)

DAGC008 CONSTRUCTION WITHIN BOUNDARIES

The development including but not limited to footings, walls, roof barges and guttering must be constructed wholly within the boundary of the premises. No portion of the proposed structure shall encroach onto the adjoining properties. Gates must be installed so they do not open onto any footpath or adjoining land.

(Reason: Approved works are to be contained wholly within the subject site).

DAGC009 DEMOLITION (GENERALLY)

Alteration and demolition of the existing building is limited to that documented on the approved plans (by way of notation). No approval is given or implied for removal and/or rebuilding of any portion of the existing building which is not shown to be altered or demolished.

(Reason: To ensure compliance with the approved development)

DAGC011 DEMOLITION (SITE SAFETY FENCING)

Site fencing is to be erected to a minimum height of 1.8m complying with WorkCover Guidelines, to exclude public access to the site, prior to any demolition works occurring and maintained for the duration of the demolition works.

If applicable, a separate Hoarding Application for the erection of an A class (fence type) or B class (overhead type) hoarding along the street frontage(s) complying with WorkCover requirements must be obtained including:

- payment to Council of a footpath occupancy fee based on the area of footpath to be occupied and Council's Schedule of Fees and Charges before the commencement of work; and
- provision of a Public Risk Insurance Policy with a minimum cover of \$10 million in relation to the occupation of and works within Council's road reserve, for the full duration of the proposed works, must be obtained with a copy provided to Council.

(Reasons: Statutory requirement and health and safety)

DAGC017 LANDSCAPING (IRRIGATION OF COMMON AND PRIVATE LANDSCAPE AREAS)

All common and private landscape areas including all planters of new multi-unit, commercial,

mixed-use and industrial development are to have full coverage by a fully automatic irrigation system. The design, materials and installation are to be in accordance with Sydney Water Codes and satisfy all relevant Australian Standards. Details demonstrating compliance shall be submitted to the Principal Certifying Authority, prior occupation of the premises.

(Reason: To ensure appropriate landscape maintenance)

DAGC018A LANDSCAPING (TREES TO BE RETAINED)

The trees listed below shall be retained at all times:

<u>Tree</u>	<u>Height/ Spread (m)</u>	<u>Location</u>	<u>Protection Zone (m)</u>	<u>Structural Root Zone (m)</u>
1) Tristaniopsis laurina (Water Gum)	5m x 3m	Nature strip	4.2m	2.37m
2) Tristaniopsis laurina (Water Gum)	5m x 3m	Nature strip	4.2m	2.37m
3) Tristaniopsis laurina (Water Gum)	5m x 3m	Nature strip	4.2m	2.37m

and protected by the establishment of a **protection zone** (in accordance with Australian Standard AS4970-*Protection of trees on development sites*) before any site works begin (including any demolition/excavation). The protection zone shall be maintained for the duration of works and implemented as follows:

- (a) A minimum 1.8m high barrier (Chain wire mesh panels, plywood or wooden paling fence panels: refer to AS4687-*Temporary fencing and hoardings* for fencing requirements) shall be erected around the perimeter of the stated Protection Zone as measured from the base of the tree (or where practical). Shade cloth or similar should be attached to reduce the transport of dust, other particulate matter and liquids into the protected area. Fence posts and supports should have a diameter greater than 20mm and be located clear of roots. The barrier shall be constructed so as to prevent pedestrian and vehicular entry into the protection zone. The barrier shall not project beyond the kerb onto the roadway or any adjacent footpath.
- (b) Signs identifying the Protection Zone should be installed on the fencing and be visible from within the development site. Lettering should comply with AS4970-2009: *Protection of Trees on Development Sites*.
- (c) No concrete slurry or wash, building materials, builders' rubble, excavation soil or similar shall be placed or stored within the tree protection zone.
- (d) The whole of the tree protection zone shall be mulched to a minimum depth of 75mm.
- (e) The tree protection zone shall be regularly watered.
- (f) Any major structural roots which are encountered shall be pruned by a qualified Arborist.
- (g) **No excavation or construction shall be carried out** within the stated *Structural Root Zone* distances from the base of the trunk surface.
- (h) Only permeable surfaces (e.g. decomposed granite, gravel, turfpave, permeable paving systems or soft landscaping) are permitted within the canopy spread of the trees to be protected.

(Reason: To ensure appropriate planting back onto the site)

DAGC019 LANDSCAPING (TREE PRESERVATION)

All street trees and trees on private property that are protected under Council's controls, shall be retained except where Council's prior written consent has been obtained. The felling, lopping, topping, ringbarking, wilful destruction or removal of any tree/s unless in conformity with this approval or subsequent approval is prohibited.

General maintenance of Council's nature strip adjoining the development site, including regular lawn mowing, edging, irrigation of the lawn and street trees and restricting the storage of materials, rubbish and parking or driving of vehicles on the nature strip, must be carried out during the full period of all approved works (including any demolition and excavation). All noxious weeds on the site shall be removed and destroyed as per their classification under the Noxious Weeds Act.

All healthy trees and shrubs identified for retention on the approved drawings are to be suitably protected in accordance with Australian Standard AS4970 – Protection of Trees on Development Sites, prior to the commencement of any works (including any demolition and excavation) and maintained for the duration of the works.

DAGC022 MATERIALS (EXTERNAL MATERIALS AND REFLECTIVITY)

All external materials and finishes including windows and doors and roofing materials must be of low glare and reflectivity. Details of finished external surface materials, including colours and texture must be provided to the Principal Certifying Authority.

(To minimise excessive glare and reflectivity)

DAGC023 MATERIALS (SCHEDULE OF EXTERNAL MATERIALS, FINISHES AND COLOURS)

The submitted schedule of colours and finishes is to be amended as follows:

- i) The paint finish dulux Tea House (3) and paint finish dulux Lexicon Half (2) is to be replaced with a cladding-like material in a matching colour.

The amended plans are to be submitted and approved by the Principal Certifying Authority **prior to the issue of the Construction Certificate.**

(Reason: To ensure the external finishes are consistent with the streetscape.

DAGC024 PRINCIPAL CERTIFYING AUTHORITY (PCA) IDENTIFICATION SIGN

Prior to commencement of any work, signage must be erected in a prominent position on the work site identifying:

- (a) The Principal Certifying Authority (PCA) by showing the name, address and telephone number of the PCA;
- (b) The Principal Contractor by showing the Principal Contractor's name, address and telephone number (outside of work hours) for that person.
- (c) The sign must state that unauthorised entry to the work site is prohibited.

Any such sign is to be maintained while the work is being carried out, but must be removed when the work has been completed.

This clause does not apply to building work, subdivision work or demolition work that is carried out inside an existing building that does not affect the external walls of the building.

(Reason: Statutory requirement)

DAGC027 SITE MANAGEMENT (DURING DEMOLITION AND CONSTRUCTION WORKS)

All of the following are to be satisfied/complied with during demolition, construction and any other site works:

- (a) All demolition is to be carried out in accordance with Australian Standard AS 2601-2001.
- (b) Demolition must be carried out by a registered demolition contractor.
- (c) A single entrance is permitted to service the site for demolition and construction. The footway and nature strip at the service entrance must be planked out.
- (d) No blasting is to be carried out at any time during construction of the building.
- (e) Care must be taken during demolition/ excavation/ building/ construction to prevent any damage to adjoining buildings.
- (f) Adjoining owner property rights and the need for owner's permission must be observed at all times, including the entering onto land for the purpose of undertaking works.
- (g) Any demolition and excess construction materials are to be recycled wherever practicable.
- (h) The disposal of construction and demolition waste must be in accordance with the requirements of the Protection of the Environment Operations Act 1997.
- (i) All waste on the site is to be stored, handled and disposed of in such a manner as to not create air pollution (including odour), offensive noise or pollution of land and/or water as defined by the Protection of the Environment Operations Act 1997. All excavated material should be removed from the site in an approved manner and be disposed of lawfully to a tip or other authorised disposal area.
- (j) All waste must be contained entirely within the site.
- (k) Section 143 of the Protection of the Environment Operations Act 1997 requires waste to be transported to a place which can lawfully accept it. All non-recyclable demolition materials are to be disposed of at an approved waste disposal depot in accordance with legislation.
- (l) All materials on site or being delivered to the site are to generally be contained within the site. The requirements of the Protection of the Environment Operations Act 1997 must be complied with when placing/stockpiling loose material, disposing of concrete waste, or other activities likely to pollute drains or water courses.
- (m) Details as to the method and location of disposal of demolition materials (weight docket, receipts, etc.) should be kept on site as evidence of approved methods of disposal or recycling.
- (n) Any materials stored on site must be stored out of view or in such a manner so as not to cause unsightliness when viewed from nearby lands or roadways.
- (o) Public footways and roadways adjacent to the site must be maintained and cleared of obstructions during construction. No building materials, waste containers or skips may be stored on the road reserve or footpath without prior separate approval from Council, including payment of relevant fees.
- (p) Building operations such as brick-cutting, washing tools or paint brushes, and mixing mortar not be performed on the roadway or public footway or any other locations which could lead to the discharge of materials into the stormwater drainage system.
- (q) All site waters during excavation and construction must be contained on site in an approved manner to avoid pollutants entering into waterways or Council's stormwater drainage system.
- (r) Any work must not prohibit or divert any natural overland flow of water.
- (s) Toilet facilities for employees must be provided in accordance with WorkCover NSW.

(Reason: To ensure that demolition, building and any other site works are undertaken in accordance with relevant legislation and policy and in a manner which will be non-disruptive to the local area)

DAGC028 STORMWATER MANAGEMENT PLAN (CERTIFICATION REQUIREMENT)

A detailed Stormwater Management Plan (SWMP) in line with Council's Stormwater Management Code is to be prepared and certified by a practicing Chartered Professional Engineer on the National Professional Engineer's Register (NPER) at Engineers Australia and submitted to the Principal Certifying Authority and Council, prior to the issue of a Construction Certificate. The

SWMP is to be based on the approved development as modified by any conditions of consent.

(Reason: To ensure appropriate provision is made for the disposal and management of stormwater generated by the development, and to ensure public infrastructure in Council's care and control is not overloaded)

DAGC029 SYDNEY WATER (STAMPED PLANS PRIOR TO COMMENCEMENT)

The approved plans must be submitted to a Sydney Water Quick Check agent or Customer Centre to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if further requirements need to be met. Plans will be appropriately stamped.

For Quick Check agent details please refer to the web site www.sydneywater.com.au (see Building Developing and Plumbing then Quick Check) or telephone 13 20 92. The consent authority or a Certifying Authority must ensure that a Quick Check agent/Sydney Water has stamped the plans before the commencement of work.

(Reason: Compliance with Sydney Water requirements)

DAGC030 UTILITIES AND SERVICES (PROTECTION OF)

- (a) Any footings or excavation to be located or undertaken adjacent to Council's stormwater must be designed to address the following requirements:
 - (i) all footings and excavation must be located wholly within the site and clear of any easement boundaries,
 - (ii) all footings and excavation must be located a minimum of 1000mm from the centreline of the pipeline or 500mm from the outside of the pipeline, whichever is the greater distance from the centreline, and
 - (iii) footings must extend to at least the depth of the invert of the pipeline unless the footings are to be placed on competent bedrock.
- (b) If permanent excavation is proposed beneath the obvert of the pipeline, suitable means to protect the excavation and proposed retaining structures from seepage or other water flow from the pipeline and surrounding subsoil, must be provided. The design must be prepared by a qualified practicing Structural/Civil Engineer.
- (c) Construction plans must be approved by the appropriate utility's office (e.g. council, Sydney Water Corporation) to demonstrate that the development complies with the utility's requirements.
- (d) The applicant must provide written evidence (e.g. compliance certificate, formal advice) of compliance with the requirements of all relevant utility providers (e.g. Water, Energy, Telecommunications, Gas)

(Reason: To ensure protection of Council assets)

DAGC031 WASTE (NO BURNING AND BURYING OF MATERIALS OR RUBBISH)

No materials or rubbish resulting from the land clearing, demolition and building works must be burnt or buried on the site.

(Reason: Health and amenity)

DAGC032 WASTE (TRACKABLE)

Removal of trackable waste (as defined by the NSW Environment Protection Authority) from the site must comply with the Protection of the Environment Operations (Waste) Regulation 2005 for the transportation, treatment and disposal of waste materials. Waste materials must not be

disposed on land without permission of the land owner and must with the provisions of the Protection of the Environment and Operations Act 1997.

Reason: To ensure compliance with legislation)

Conditions to be satisfied prior to the issue of a Construction Certificate (DACC)

DACC001 ACCESS (ACCESS FOR PEOPLE WITH DISABILITIES)

Access for people with disabilities must be provided in accordance with the requirements of the Building Code of Australia, relevant Australian Standards and with regard to the *Disability Discrimination Act 1992*. Prior to the issue of a Construction Certificate, plans shall be notated demonstrating compliance, and approved by the Principal Certifying Authority

Note: Disability (Access to Premises - Buildings) Standards 2010 - As of 1 May 2011, if access is provided to the extent covered by this Standard, then such access cannot be viewed as unlawful under the Disability Discrimination Act 1992.

(Reason: To provide equitable access for people(s) with disabilities in accordance with the relevant legislation and Australian Standards)

DACC006 BASIX COMMITMENTS

The approved BASIX Certificate shall be submitted to the Principal Certifying Authority with the application for a Construction Certificate.

Where a change or changes are proposed in the BASIX commitments, the applicant must submit a new BASIX Certificate to the Principal Certifying Authority and Council. If any proposed change in the BASIX commitments is inconsistent with the development consent the applicant will be required to submit a modification to the development consent to Council under Section 96 of the Environmental Planning and Assessment Act 1979.

All commitments in the BASIX Certificate must be shown on the plans accompanying the Construction Certificate.

(Reason: Statutory compliance)

DACC009 BUILDING CODE OF AUSTRALIA (COMPLIANCE WITH)

All architectural drawings, specifications and related documentation shall comply with the Building Code of Australia (BCA). All work must be carried out in accordance with the requirements of the Building Code of Australia (BCA).

In the case of residential building work for which the Home Building Act 1989 requires there to be a contract of insurance in force in accordance with Part 6 of that Act, such a contract of insurance is to be in force before any building work authorised to be carried out by the consent commences.

Details demonstrating compliance with this condition are to be submitted to the Principle Certifying Authority, prior to issue of the Construction Certificate.

(Reason: This is a 'prescribed' condition under clause 98(1) of the Environmental Planning and Assessment Regulation 2000)

DACC010 CAR PARKING (BASEMENT CAR PARKING REQUIREMENTS)

Details demonstrating compliance with the following is to be submitted to the Principal Certifying Authority, prior to issue of the Construction Certificate:

- 1) Minimal internal clearance of the basement is 2.2m in accordance with BCA requirements.
- 2) Driveways shall comply with Australian/New Zealand Standard AS/NZS 2890.1:2004 - Parking facilities - Off-street car parking and achieve a maximum gradient of 1:4.
- 3) Basement entries and ramps/driveways within the property are to be no more than 3.5m wide.
- 4) Provision of pump-out systems and stormwater prevention shall be in accordance with Council's Stormwater Management Guide.

(Reason: To ensure suitable development)

DACC012 CAR PARKING (REQUIREMENTS FOR MULTIPLE USE BUILDINGS)

The following car parking and service vehicle requirements apply:-

- (a) **66** car spaces shall be provided on the development site. This shall consist of:

(i) Residents	63 (including 13 accessible spaces)
(ii) <u>Visitors</u>	<u>13</u>
TOTAL	(76)
- (b) All car spaces shall be allocated and marked according to this requirement.
- (c) If the development is to be strata subdivided, the car park layout must reflect the above allocation and thereafter be regarded as part of the entitlement of that strata lot.
- (d) Under no circumstances shall parking spaces be sold, let or otherwise disposed of for use other than in accordance with this condition.
- (e) Each car parking space shall have minimum dimensions in accordance with the relevant Australian Standard and be provided on-site in accordance with the approved plans.
- (f) The parking bays shall be delineated by line marking.
- (g) Visitor spaces shall be clearly line marked and/or signposted and shall only be used by persons visiting residents of the property or commercial/business/retail premises located within the development. Visitor spaces shall not be allocated as permanent residential parking spaces. Access to visitor parking spaces shall not be restricted without development approval and a sign shall be erected at the vehicular entrance indicating the availability of visitor parking.
- (h) The following traffic control measures shall be implemented on site:-
 - (i) Signage indicating 'Entry Only' shall be prominently displayed at the entrance to the development.
 - (ii) Signage indicating 'Exit Only' shall be prominently displayed at the exit to the development.
 - (iii) One-Way directional arrows shall be painted on the driveway pavement to indicate the required vehicular directional movement through the car parking area.

Details demonstrating compliance with this condition shall be submitted to and approved by the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: To ensure car parking provision in accordance with this consent)

DACC015 CAR PARKING (COMPLIANCE WITH AS/NZS 2890.1:2004)

Car parking dimensions must comply with the Australian/New Zealand Standard AS/NZS 2890.1:2004 - Parking facilities - Off-street car parking. Details demonstrating compliance are to be submitted to the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: To ensure compliance with Australian Standards relating to parking of vehicles)

DACC016 CAR PARKING (VEHICULAR CIRCULATION, AISLE AND RAMP WIDTHS)

The aisle widths, internal circulation, ramp widths and grades of the car park shall comply with the Roads and Traffic Authority Guidelines and ASNZS 2890.1:2004 - Off-Street Car Parking Code.

Vehicular manoeuvring paths are to be prepared demonstrating that all vehicles can enter or depart the site in a forward direction without encroaching on required car parking spaces.

(Reason: To ensure compliance with Australian Standards relating to manoeuvring, access and parking of vehicles)

DACC018 COMMENCEMENT OF WORKS (NO WORKS UNTIL A CC IS OBTAINED)

Building work, demolition or excavation must not be carried out until a Construction Certificate has been issued by either Strathfield Council or a Principal Certifying Authority.

Demolition of any part of a building triggers 'commencement of erection of building' pursuant of section 81A(2) of the EP&A Act 1979. Accordingly, demolition works must not commence until a Construction Certificate has been issued, a Principal Certifying Authority has been appointed and a Notice of Commencement has been issued.

(Reason: To ensure compliance with statutory provisions)

DACC019 CONSTRUCTION AND ENVIRONMENTAL MANAGEMENT PLAN

The applicant must prepare and submit a Construction and Environmental Management Plan (CEMP) to the Principal Certifying Authority, including:

- 1) Detailed information on any approvals required from other authorities prior to or during construction.
- 2) Traffic management, including details of:
 - (a) ingress and egress of vehicles to the site;
 - (b) management of loading and unloading of materials;
 - (c) the location of heavy vehicle parking off-site; and
 - (d) designated routes for vehicles to the site.
- 3) The proposed areas within the site to be used for a builder's site office and amenities, the storage of excavated material, construction materials and waste containers during the construction period.
- 4) Erosion and sediment control, detailing measures and procedures consistent with the requirements of Council's guidelines for managing stormwater, including:
 - (a) the collection and treatment of stormwater and wastewater generated on site prior to discharge; and
 - (b) procedures to prevent run-off of solid material and waste from the site.
- 5) Waste management, including:
 - (a) details of the types and estimated volumes of waste materials that will be generated;
 - (b) procedures for maximising reuse and recycling of construction materials; and
 - (c) details of the off-site disposal or recycling facilities for construction waste.
- 6) Dust control, outlining measures to minimise the generation and off-site transmission of dust and fine particles, such as watering or damp cloth fences.
- 7) A soil and water management plan, which includes:
 - (a) measures to minimise the area of soils exposed at any one time and conserve top soil;

- (b) identification and protection of proposed stockpile locations;
 - (c) preservation of existing vegetation and revegetation;
 - (d) measures to prevent soil, sand, sediments leaving the site in an uncontrolled manner;
 - (e) measures to control surface water flows through the site in a manner that diverts clean run-off around disturbed areas, minimises slope gradient and flow distance within disturbed areas, ensures surface run-off occurs at non-erodible velocities, and ensures disturbed areas are promptly rehabilitated;
 - (f) details of sediment and erosion control measures in place before work commences;
 - (g) measures to ensure materials are not tracked onto the road by vehicles entering or leaving the site; and
 - (h) details of drainage to protect and drain the site during works.
- 8) Asbestos management procedures:
- (a) Anyone who removes, repairs or disturbs bonded or a friable asbestos material must hold a current removal licence from Workcover NSW holding either a Friable (Class A) or a Non- Friable (Class B) Asbestos Removal License which ever applies and a current WorkCover Demolition License where works involve demolition. To find a licensed asbestos removalist please see www.workcover.nsw.gov.au
 - (b) Removal of asbestos by a person who does not hold a Class A or Class B asbestos removal license is permitted if the asbestos being removed is 10m² or less of non-friable asbestos (approximately the size of a small bathroom). Friable asbestos materials must only be removed by a person who holds a current Class A asbestos license.
 - (c) Before starting work, a work site-specific permit approving each asbestos project must be obtained from Workcover NSW. A permit will not be granted without a current Workcover licence. All removal, repair or disturbance of or to asbestos material must comply with the following:
 - (i) The Work Health and Safety Act 2011;
 - (ii) The Work Health and Safety Regulation 2011;
 - (iii) How to Safety Remove Asbestos Code of Practice – WorkCover 2011; and
 - (iv) Safe Work Australia Code of Practice for the Management and Control of Asbestos in the Workplace.
 - (d) Following completion of asbestos removal works undertaken by a licensed asbestos removalist re-occupation of a workplace must not occur until an independent and suitably licensed asbestos removalist undertakes a clearance inspection and issues a clearance certificate.
 - (e) The developer or demolition contractor must notify adjoining residents at least two (2) working days (i.e. Monday to Friday exclusive of public holidays) prior to the commencement of asbestos removal works. Notification is to include, at a minimum:
 - (i) the date and time when asbestos removal works will commence;
 - (ii) the name, address and business hours contact telephone number of the demolisher, contractor and/or developer;
 - (iii) the full name and license number of the asbestos removalist/s; and
 - (iv) the telephone number of WorkCover's Hotline 13 10 50
 - (v) warning signs informing all people nearby that asbestos removal work is taking place in the area. Signs should be placed at all of the main entry points to the asbestos removal work area where asbestos is present. These signs should be weatherproof, constructed of light-weight material and adequately secured so they remain in prominent locations. The signs should be in accordance with AS 1319-1994 Safety signs for the occupational environment for size, illumination, location and maintenance; and
 - (vi) appropriate barricades installed as appropriate to prevent public access and prevent the escape of asbestos fibres. Barricades must be installed prior to the commencement of asbestos removal works and remain in place until

works are completed.

(Reason: Safety, amenity and protection of public infrastructure and the environment)

DACC020 DILAPIDATION REPORT (PRE-COMMENCEMENT)

Subject to access being granted, a pre-commencement Dilapidation Report is to be undertaken on all properties, which in the opinion of a suitably qualified engineer, could be potentially affected by the construction of the project. The Dilapidation Report shall be carried out prior to the issue of a Construction Certificate.

The Dilapidation Report is to be prepared by a suitably Qualified Engineer with current Corporate Membership with the Institution of Engineers, Australia or Geotechnical Practitioner. The report shall include a photographic survey of adjoining properties detailing the physical condition of those properties, both internally and externally, including walls, ceilings, roof, structural members and other such items.

If access for undertaking the dilapidation survey is denied by an adjoining owner, the applicant must demonstrate, in writing, to Council's satisfaction attempts have been made to obtain access and/or advise the affected property owner of the reason for the survey and these attempts have been unsuccessful. Written concurrence must be obtained from Council in such circumstances.

The Report shall cover structural and geotechnical factors likely to arise from the development. A copy of this Report shall be submitted to Council as a record. The person having the benefit of the development consent must, at their own cost, rectify any damage caused to other properties during the construction of the project.

(Reason: To ensure no damage to adjoining properties occurs)

DACC021 DRIVEWAY WIDTH (MULTI-UNIT DEVELOPMENT)

The internal driveway must be a minimum 5.50m wide (clear width) for the first 6 metres inside the property so as to allow entering & exiting vehicles to pass within the site. Should the driveway narrow after this point it is then to be designed with a minimum 1.5m x 1.5m splay to allow the passing to work. Details demonstrating compliance shall be submitted to the Principal Certifying Authority, prior the issue of a Construction Certificate.

(Reason: Safety and traffic management)

DACC024 EXCAVATION (AFFECTING ADJOINING LAND)

If an excavation associated with the approved development extends below the level of the base of the footings of a building on an adjoining allotment of land, the person having the benefit of the development consent must, at the person's own expense, comply with the requirements of clause 98E of the Environmental Planning and Assessment Regulation 2000, including:

- 1) protect and support the adjoining premises from possible damage from the excavation, and
- 2) where necessary, underpin the adjoining premises to prevent any such damage.

The condition referred to in subclause (1) does not apply if the person having the benefit of the development consent owns the adjoining land or the owner of the adjoining land has given consent in writing to that condition not applying. Details shall be submitted to the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: Structural safety)

DACC025 EXCAVATION (DEWATERING)

Any de-watering from the excavation or construction site must comply with the Protection of the Environment Operations Act 1997 and the following:

- 1) Ground water or other water to be pumped from the site into Council's stormwater system must be sampled and analysed by a NATA accredited laboratory or Manly Council for compliance with ANZECC Water Quality Guidelines.
- 2) If tested by NATA accredited laboratory, the certificate of analysis issued by the laboratory must be forwarded to Manly Council as the appropriate regulatory authority under the Protection of the Environment Operations Act 1997, prior to the commencement of de-watering activities.
- 3) Council will grant approval to commence site de-watering to the stormwater based on the water quality results received.
- 4) It is the responsibility of the applicant to ensure during de-watering activities, the capacity of the stormwater system is not exceeded, there are no issues associated with erosion or scouring due to the volume of water pumped; and turbidity readings must not at any time exceed the ANZECC recommended 50ppm (parts per million) for receiving waters.

(Reason: To ensure compliance with legislation and to protect the surrounding natural environment)

DACC029 FIRE SAFETY SCHEDULE

A Fire Safety Schedule specifying the fire safety measures (both current and proposed) which should be implemented in the building premises must be submitted with the Construction Certificate application, in accordance with Part 9 of Clause 168 of the Environmental Planning and Assessment Regulation 2000.

Note: A Construction Certificate cannot be issued until a Fire Safety Schedule is received.

(Reason: Compliance with the Environmental Planning and Assessment Act 1979)

DACC030 FLOODING (COMPLY WITH FLOOD IMPACT REPORT)

The applicant shall comply with the flood recommendations provided in the Flood Impact Report prepared by Lindsay Dynan project no. 00012950 dated 16 October 2017 and 9 October 2017. A certificate from a suitably qualified Engineer shall be submitted to the Certifying Authority stating compliance with these recommendations, prior to the issue of a Construction Certificate.

(Reason: To mitigate flood risk and associated damage)

DACC032 HAZARDOUS GOODS AND WASTE

- (a) Dangerous and hazardous goods shall be stored in accordance with NSW WorkCover requirements and AS1940-2004 - The Storage and Handling of Flammable and Combustible Liquids.
- (b) Hazardous waste must be contained, managed and disposed of in a responsible manner in accordance with the Protection of Environment and Operations Act 1997, NSW Environment Protection Authority (EPA) and the New South Wales WorkCover Authority.
- (c) Material Safety Data Sheets of all hazardous substances used, such as bleaches and nail products must be kept on site and readily available to all staff. Staff must be trained how to safely use and store these chemicals prior to the commencement of work.

Details demonstrating compliance with the requirements of this condition are to be submitted to the satisfaction of the Principal Certifying Authority prior to the issue of any Construction Certificate.

(Reason: Health and safety)

DACC035 HOARDINGS

A Hoarding Application for the erection of a Class A (fence type) or Class B (overhead type) hoarding along the street frontage(s) complying with WorkCover requirements must be obtained.

The relevant application form shall be submitted to Council with a footpath occupancy fee based on the area of footpath to be occupied according to Council's Schedule of Fees and Charges, and the application shall be approved before the commencement of work.

A Public Risk Insurance Policy with a minimum cover of \$10 million in relation to the occupation of and works within Council's road reserve, for the full duration of the proposed works, must be obtained with a copy also provided to Council.

The Policy is to note Council as an interested party. The copy is to be provided to Council, prior to the issue of a Construction Certificate.

(Reason: Public safety)

DACC037 LANDSCAPING (MAINTENANCE STRATEGY)

To ensure the survival of landscaping following works, a landscape maintenance strategy for the owner/occupier to administer over a 12 month establishment period following the issue of the Occupation Certificate shall be prepared and provided to the satisfaction of the Principal Certifying Authority with the Construction Certificate application. The strategy is to address maintenance issues such as, but not limited to plant survival, irrigation, soil testing, weeding, staking, fertilizing, remedial pruning and plant replacement.

(Reason: Ensure landscape survival)

DACC038 LANDSCAPING (ON SLAB)

To ensure the site landscaping thrives, the on slab landscaping shown on the approved landscaping plan is to be designed to include a minimum soil depth of 650mm for shrubs and trees; and 300mm for grass and ground covers. Adequate drainage provision and a permanent, automatic irrigation system conforming to Sydney Water requirements shall be included. Details demonstrating compliance shall be submitted to the Principal Certifying Authority with the Construction Certificate application.

(Reason: Ensure landscape survival)

DACC042 PLANNING AGREEMENT (SECTION 93F OF THE EP&A ACT)

In accordance with Section 93F(3) of the Environmental Planning and Assessment Act 1979, the Voluntary Planning Agreement offered by the developer in respect of the Development Application, the subject of this consent, for the dedication of 215m² of land with a minimum width of 4.9m for the purpose of an extension of Loftus Laneway adjacent to the northern boundary of the site. must be entered into prior to the issue of a Construction Certificate. The terms of the Voluntary Planning Agreement must, thereafter, be adhered to.

(Reason: To ensure compliance with the terms of the S93F Agreement)

DACC049 SECTION 94 CONTRIBUTIONS (DIRECT CONTRIBUTIONS PLAN)

In accordance with the provisions of Section 94(1)(b) of the Environmental Planning and Assessment Act 1979 and the Strathfield Direct Development Contributions Plan 2010-2030, a contribution in the form of cash, cheque or credit card (financial transaction fee applies) shall be paid to Council for the following purposes:

Provision of Community Facilities	\$130,686.90
Provision of Major Open Space	\$594,586.28
Provision of Local Open Space	\$387,678.39
Provision Roads and Traffic Management	\$39,800.48
Administration	\$11,268.81
TOTAL	\$1,104,020.86

The total amount of the contribution is valid as at the date of determination and is subject to quarterly indexation. Contributions shall be indexed at the time of payment in accordance with clause 2.14 of the Strathfield Direct Development Contributions Plan 2010-2030.

Contributions must be receipted by Council and submitted to the Accredited Certifier, prior to the issue of any Construction Certificate.

Please present a copy of this condition when paying the contribution at the Customer Service Centre so that it can be recalculated.

Note: A copy of Strathfield Council's Section 94 Direct Development Contributions Plan may be downloaded from Council's website.

(Reason: To enable the provision of public amenities and services required/anticipated as a consequence of increased demand resulting from the development)

DACC051 SECURITY PAYMENT (DAMAGE DEPOSIT FOR COUNCIL INFRASTRUCTURE)

A security payment of **\$6,254.00** in the form of cash, bank guarantee, cheque or credit card (financial transactions fees apply) shall be paid to Council prior to the issue of a Construction Certificate. The security payment is GST inclusive and comprises the following:

Refundable tree protection bond	\$2,000.00
Refundable works bond	\$4,000.00
Non-refundable administration fee (\$127/bond)	\$254.00
TOTAL	\$6,254.00

The security payment covers the following matters and will be released upon satisfactory completion of these items:

- (a) road and stormwater drainage works in roadways and public areas;
- (b) connection to Council's stormwater drainage system;
- (c) installation and maintenance of sediment control measures for the duration of construction activities;
- (d) tree final inspection to ensure that Council's street trees have been retained, protected or replanted in accordance with conditions of consent and/or Arborists' report for the post final inspection twelve (12) month period; and
- (e) Ensuring no damage occurs to or building debris/materials are left on Council land including footpath, nature strip, kerb and gutter. The security bond may be used to recover the costs incurred by Council in cleaning and restoring the land to its original condition.

(Reason: Protection of Council infrastructure)

DACC061 WORKS PERMIT

A Works Permit shall be obtained from Strathfield Council at least five (5) working days prior any work (including demolition, excavation and the erection of site fencing/hording). The approved Works Permit and any approved Construction Traffic Management Plan must be complied with at all times until all demolition, building, engineering and construction work associated with the development has been completed. The permit must be retained on site at all times.

(Reason: Council requirement)

DACC062 WORKS (WITHIN THE ROAD RESERVE)

- (a) Detailed drawings including long and short sections and specifications of all works within existing roads (including but not limited to structures, road works, driveway crossings, footpaths and stormwater drainage) shall be submitted to and approved by Council under Section 138 of the Roads Act 1993 and all fees and charges paid, prior to the issue of a Construction Certificate.
- (b) Detailed drawings and specifications are to be prepared and certified by an appropriately qualified Civil Engineer.
- (c) Upon completion of the works, the Applicant is to provide to Council with electronic copies of 'Work as Executed Plans'. The plans are to show relevant dimensions and finished levels and are to be certified by a surveyor.
- (d) The Applicant is to provide to Council, in an approved format, details of all public infrastructure created as part of the works.
- (e) All civil engineering works adjacent/near/outside 36A Water St, Belfield are to be fully supervised by Council. A maintenance period of six (6) months shall apply to the work, after it has been completed and approved. In that period the Applicant shall be liable for any part of the work which fails to perform in the manner outlined in Council's specifications, or as would reasonably be expected under the design conditions.

(Reason: To ensure compliance of engineering works/Council assets are constructed to acceptable standards for engineering works)

DACC063 TRAFFIC (CONSTRUCTION TRAFFIC MANAGEMENT PLAN)

A Construction Traffic Management Plan (CTMP) is to be prepared by an appropriately qualified Traffic Management Consultant and submitted to and approved by Council's Engineering Section, prior to the commencement of any works including demolition.

The following matters should be addressed in the CTMP (where applicable):

- 1) A description of the demolition, excavation and construction works
- 2) A site plan/s showing the site, roads, footpaths, site access points and vehicular movements
- 3) Size, type and estimated number of vehicular movements (including removal of excavated materials, delivery of materials and concrete to the site)
- 4) Proposed route(s) from the arterial (state) road network to the site and the proposed route from the site back to the arterial road network
- 5) Impacts of the work and vehicular movements on the road network, traffic and pedestrians and proposed methods to safely manage pedestrians and construction related vehicles in the frontage roadways.
- 6) Any Traffic Control Plans (TCP's) proposed to regulate traffic and pedestrian movements for construction activities (such as concrete pours, crane installation/removal etc.)
- 7) Proposed hours of construction related activities and vehicular movements to and from the site
- 8) Current/proposed approvals from other Agencies and Authorities (including Roads and Maritime Services, Police and State Transit Authority)
- 9) Any activities proposed to be located or impact upon Council's road, footways or any public

place

- 10) Measures to maintain public safety and convenience
- 11) Any proposed road and/or footpath closures
- 12) Turning areas within the site for construction and spoil removal vehicles, allowing a forward egress for all construction vehicles on the site.
- 13) The locations of work zones (where it is not possible for loading/unloading to occur on the site) in the frontage roadways accompanied by supporting documentation that such work zones have been approved by the Local Traffic Committee and Council.
- 14) Location of any proposed crane and concrete pump and truck standing areas on and off the site (and relevant approvals from Council for plant on road).
- 15) A dedicated unloading and loading point within the site for all construction vehicles, plant and deliveries.
- 16) Material, plant and spoil bin storage areas within the site, where all materials are to be dropped off and collected.
- 17) An on-site parking area for employees, tradespersons and construction vehicles as far as possible.
- 18) The proposed areas within the site to be used for the storage of excavated material, construction materials and waste and recycling containers during the construction period.
- 19) How it is proposed to ensure that soil/excavated material is not transported onto surrounding footpaths and roadways.

(Reason: To mitigate traffic impacts on the surrounding area during the construction period)

DACC064 UTILITIES AND TELECOMMUNICATIONS (ELECTRICITY CONNECTION)

Provision must be made for connection to future underground distributions mains. This must be achieved by installing:

- 1) an underground service line to a suitable existing street pole; or
- 2) sheathed underground consumers mains to a customer pole erected near the front property boundary (within 1 metre)

Note: A limit of one (1) pole per site will apply.

Any costs associated with the relocation of the above are at the requestor's expense. Any disturbance to public land as a result of the undergrounding of services shall be restored at no cost to Council.

Details are to be submitted to the Principal Certifying Authority with the Construction Certificate Application.

(Reason: Environmental amenity)

DACC066 UTILITIES AND TELECOMMUNICATIONS (TELECOMMUNICATIONS ASSETS)

Provision must be made for relocation of telecommunications network assets including underground placement of any existing aerial cables and infrastructure. Any costs associated with the relocation of the above are at the requestor's expense. Any disturbance to public land as a result of the undergrounding of services shall be restored at no cost to Council.

Details are to be submitted to the Principal Certifying Authority with the Construction Certificate application.

(Reason: To ensure suitable relocation of telecommunications infrastructure if required)

DACC068 WASTE MANAGEMENT PLAN

A Waste Management Plan (WMP) is to be provided in accordance with Part H of Strathfield Consolidated Development Control Plan 2005. All requirements of the approved Waste

Management Plan must be implemented during demolition, construction and on-going use of the premises.

The WMP must identify the types of waste that will be generated and all proposals to re-use, recycle or dispose of the waste. The WMP is to be submitted to the Principal Certifying Authority, prior to issue of the Construction Certificate.

(Reason: To ensure appropriate management of waste)

DACC070 WASTE (GARBAGE ROOMS OR GREASE ARRESTOR ROOMS)

Garbage rooms or grease arrester rooms must be constructed of solid material: cement rendered and steel trowelled to a smooth even surface. The door to the garbage room is to be designed and constructed to ensure the room is vermin proof and can be opened from the inside at all times. The garbage room is to be ventilated to the external air by natural ventilation or an approved air handling exhaust system.

(Reason: To keep garbage rooms in a clean and sanitary condition to protect public health)

DACC073 WATER HEATING SYSTEMS (LOCATION OF)

Water heating systems shall be located so as not to be visible from public places and the ground level of adjoining properties. Details (type and location) of the water heaters shall be submitted to and approved by the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: To maintain streetscape character)

DACC074 WORKS ZONE (APPROVAL BY COUNCIL'S TRAFFIC COMMITTEE)

An application for a 'Works Zone' must be submitted to and approved by the Strathfield Council Traffic Committee prior to the commencement of any site work (including demolition).

The suitability of the proposed length and duration of the Works Zone is to be demonstrated in the application for the Works Zone. The application for the Works Zone must be submitted to Council at least six (6) weeks prior to the commencement of work on the site to allow for assessment and tabling of agenda for the Strathfield Council Traffic Committee.

The requirement for a Works Zone may be varied or waived only if it can be demonstrated in the Construction Traffic Management Plan (to the satisfaction of Council) that all construction related activities (including all loading and unloading operations) can and will be undertaken wholly within the site. The written approval of Council must be obtained to provide a Works Zone or to waive the requirement to provide a Works Zone prior to the commencement of any site work.

DACC075 LANE EXTENSION

The laneway extension design to Loftus Lane with proposed kerb inlet pit location connecting to Council's drainage infrastructure shall be amended to reflect the final laneway design.

(Reason: To ensure consistency with finalised laneway design).

Conditions to be satisfied prior to the commencement of works (DAPC)

DAPC001 APPOINTMENT OF A PRINCIPAL CERTIFYING AUTHORITY

No work shall commence in connection with this Development Consent until:
1) A construction certificate for the building work has been issued by:

- (a) the consent authority; or
- (b) a Principal Certifying Authority; and
- 2) the person having the benefit of the development consent has:
 - (a) appointed a principal certifying authority for the building work, and
 - (b) notified the principal certifying authority that the person will carry out the building work as an owner-builder, if that is the case, and
- 3) the principal certifying authority has, no later than 2 days before the building work commences:
 - (a) notified the Council of his or her appointment, and
 - (b) notified the person having the benefit of the development consent of any critical stage inspections and other inspections that are to be carried out in respect of the building work, and
- 4) the person having the benefit of the development consent, if not carrying out the work as an owner-builder, has:
 - (a) appointed a principal contractor for the building work who must be the holder of a contractor licence if any residential building work is involved, and
 - (b) notified the principal certifying authority of such appointment, and
 - (c) unless that person is the principal contractor, notified the principal contractor of any critical stage inspections and other inspections that are to be carried out in respect of the building work, and
- 5) the person having the person having the benefit of the development consent has given at least 2 days notice to the Council of the person's intention to commence the erection of the building.

Note: If the principal certifying authority is the Council, the nomination will be subject to the payment of a fee for the service to cover the cost of undertaking all necessary inspections and the issue of the appropriate certificates.

Under the Environment Planning and Assessment (Quality of Construction) Act, 2003, a sign must be erected in a prominent position on the work site showing the name, address and telephone number of the principal certifying authority; the name of the principal contractor (if any) for the building work and a telephone number at which that person may be contacted outside working hours. That sign must also state that unauthorised entry is prohibited. The sign must not be removed until all work has been completed.

(Reason: Statutory requirement)

DAPC003 NOTICE OF COMMENCEMENT

No work shall commence until the following details are submitted to Council:

- 1) A Notice of Commencement (form will be attached with issue of a Construction Certificate or available from our website) within two (2) days of the date on which it is proposed to commence works associated with the Development Consent;
- 2) Details of the appointment of a Principal Certifying Authority (either Council or another Principal Certifying Authority); and
- 3) Details of the name, address and licence details of the Builder.

(Reason: Statutory requirement)

Conditions to be satisfied during demolition and building works (DADW)

DADW001 CONTAMINATED LAND UNEXPECTED FINDS

In the instance works cause the generation of odours or uncovering of unexpected contaminants works are to immediately cease, Council is to be notified and a suitably qualified environmental

scientist appointed to further assess the site.

The contaminated land situation is to be evaluated by the supervising environmental consultant and an appropriate response determined in consultation with the applicant, which is agreed to by Strathfield Council's Environmental Services Manager.

Note: Council may also request that a NSW EPA accredited site auditor is involved to assist with the assessment of the contaminated land situation and review any new contamination information. The applicant must also adhere to any additional conditions which may be imposed by the accredited site auditor.

(Reason: To ensure compliance with statutory requirements)

DADW002 FILL MATERIAL

The only waste derived material which may be received at the development site is:

- (i) Virgin excavated material (within the meaning of the Protection of the Environment Operations Act 1997), and
- (ii) Any other waste-derived material the subject of a resource recovery exemption under cl.51A of the Protection of the Environment Operations (Waste) Regulation 2005 that is permitted to be used as fill material.

Any (b)-type material received at the development site must be accompanied by documentation certifying by an appropriately qualified environmental consultant the materials compliance with the exemption conditions; and this documentation must be provided to the Principal Certifying Authority on request.

(Reason: To ensure imported fill is of an acceptable standard for environmental protection purposes)

DADW006 OBSTRUCTION OF PUBLIC WAY (NOT PERMITTED DURING WORKS)

The public way must not be obstructed by any materials, vehicles, refuse, skips or the like, under any circumstances, without the prior approval of Council.

(Reason: To maintain public access and safety)

DADW007 PUBLIC INFRASTRUCTURE AND SERVICES

The applicant must comply with the requirements (including financial costs) of any relevant utility provider (e.g. Energy Australia, Sydney Water, Telstra, RMS, Council etc.) in relation to any connections, works, repairs, relocation, replacements and/or adjustments to public infrastructure or services affected by the development.

(Reason: To maintain public infrastructure and/or services)

DADW010 SITE REQUIREMENTS DURING DEMOLITION AND CONSTRUCTION

All of the following are to be satisfied/complied with during demolition, construction and any other site works:

- 1) All demolition is to be carried out in accordance with Australian Standards AS 2601-2001.
- 2) Demolition must be carried out by a registered demolition contractor.
- 3) A single entrance is permitted to service the site for demolition and construction. The footway and nature strip at the service entrance must be planked out with close boarded, hardwood timber footpath protection pads. The pad shall cover the entire width of the footpath opening for the full width of the fence.
- 4) No blasting is to be carried out at any time during construction of the building.

- 5) Care must be taken during demolition/ excavation/ building/ construction to prevent any damage to adjoining buildings.
- 6) Adjoining owner property rights and the need for owner's permission must be observed at all times, including the entering onto land for the purpose of undertaking works.
- 7) Any demolition and excess construction materials are to be recycled wherever practicable.
- 8) The disposal of construction and demolition waste must be in accordance with the requirements of the Protection of the Environment Operations Act 1997.
- 9) All waste on the site is to be stored, handled and disposed of in such a manner as to not create air pollution (including odour), offensive noise or pollution of land and/or water as defined by the Protection of the Environment Operations Act 1997.
- 10) All excavated material should be removed from the site in the approved manner and be disposed of lawfully to a tip or other authorised disposal area.
- 11) Section 143 of the Protection of the Environment Operations Act 1997 requires waste to be transported to a place which can lawfully accept it. All non-recyclable demolition materials are to be disposed of at an approved waste disposal depot in accordance with legislation.
- 12) All materials on site or being delivered to the site are to generally be contained within the site. The requirements of the Protection of the Environment Operations Act 1997 must be complied with when placing/stockpiling loose material, disposing of concrete waste, or other activities likely to pollute drains or water courses.
- 13) Details as to the method and location of disposal of demolition materials (weight dockets, receipts etc.) should be kept on site as evidence of approved methods of disposal and recycling.
- 14) Any materials stored on site must be stored out of view or in such a manner so as not to cause unsightliness when viewed from nearby lands or roadways.
- 15) Public footways and roadways adjacent to the site must be fully maintained and cleared of obstructions during construction unless prior separate approval from Council is obtained including payment of relevant fees.
- 16) Building operations such as brick cutting, washing tools or paint brushes, and mixing mortar not be performed on the roadway or public footway or any other locations which could lead to the discharge of materials into the stormwater drainage system.
- 17) All site waters during excavation and construction must be contained on site in an approved manner to avoid pollutants entering into waterways or Council's stormwater drainage system.

Stamped plans, specifications, documentation and the consent shall be available on site at all times during construction.

(Reason: To ensure that demolition, building and any other site works are undertaken in accordance with relevant legislation and policy and in a manner which will be non-disruptive to the local area)

DADW011 SURVEY REPORT OF APPROVED LEVELS (DURING AND POST CONSTRUCTION)

A Survey Certificate to Australian Height Datum shall be prepared by a Registered Surveyor as follows:-

- 1) At the completion of the first structural floor level indicating the level of that floor and the relationship of the building to the boundaries.
- 2) At the completed height of the building, prior to the placement of concrete in form work, or the laying of roofing materials.
- 3) At the completion of the development.

Progress certificates in response to points (1) through to (3) shall be provided to the Principal Certifying Authority at the time of carrying out relevant progress inspections. Under no circumstances is work allowed to proceed until such survey information is submitted to and approved by the Principal Certifying Authority.

(Reason: To ensure compliance with the approved plans)

Conditions to be satisfied prior to the issue of an Occupation Certificate (DAOC)**DAOC004 CAR PARKING (VISITOR CAR PARKING SIGNAGE)**

A sign shall be erected in a suitable location on the property near the driveway entrance indicating where visitor parking is available on the site. Signage shall also be erected above the visitor parking itself. Details demonstrating compliance shall be demonstrated to the Principal Certifying Authority, prior to the issue of any Occupation Certificate.

(Reason: Adequate access and egress)

DAOC006 DRAINAGE SYSTEM (MAINTENANCE OF EXISTING SYSTEM)

Where elements of the existing drainage system are to be utilised, the existing drainage system shall be overhauled and maintained clear of silt and accumulated debris. Silt and the like shall be removed, not flushed from the system.

A certificate shall be provided by a suitably qualified person (a registered plumber or a person of equivalent or greater experience or qualification) to the satisfaction of the Principal Certifying Authority, prior to the issue of any Occupation Certificate to confirm that the system is in good working order and adequate to accept additional flows having regard to any relevant standards and/or Sydney Water requirements.

(Reason: Maintenance and environment)

DAOC007 ENGINEERING WORKS (CERTIFICATION OF)

Prior to occupation of the premises, a Work As Executed (WAE) Plan of all engineering and/or drainage works is to be submitted to the Principal Certifying Authority. The WAE Plan is to be certified by a suitably Qualified Engineer, with Corporate Membership standing in the Institution of Engineers Australia and registered on the National Professional Engineers Register (NPER) under the appropriate professional category, demonstrating that:

- 1) the stormwater drainage system; and/or
- 2) the car parking arrangement and area; and/or
- 3) any related footpath crossing works; and/or
- 4) the proposed basement pump and well system; and/or
- 5) the proposed driveway and layback; and/or
- 6) any other civil works

have been constructed in accordance with the approved plans and any relevant Standards and Council policies/specifications.

For major works, such as subdivisions, works within the road reserve (requiring separate S138 approval) and as where specified by Council, a Part 4A Certificate will be required. It is strongly recommended that an Engineer supervise all engineering related works.

Where Council is not the Principal Certifying Authority, an electronic copy of the above documents is to be provided to Council, prior to the issue of any Occupation Certificate.

(Reason: Asset management)

DAOC008 FIRE SAFETY (CERTIFICATION)

A fire safety certificate shall be obtained in accordance with Part 9, Division 4 of the Environmental Planning and Assessment Regulation 2000, prior to the issue of any Occupation

Certificate.

An fire safety certificate is a certificate issued by the owner of a building to the effect that each essential fire safety measure specified in the current fire safety schedule for the part of the building to which the certificate relates:

- a) has been assessed by a properly qualified person, and
- b) was found, when it was assessed, to be capable of performing to at least the standard required by the current fire safety schedule for the building for which the certificate is issued.

An interim fire safety certificate must be provided before an interim occupation certificate can be used for a building under Clause 153(2) of the *Environmental Planning & Assessment Regulation 2000*.

A final fire safety certificate must be provided before an interim occupation certificate can be used for a building under Clause 153(1) of the *Environmental Planning & Assessment Regulation 2000*.

A copy of the fire safety certificate and fire safety schedule shall be:-

- 1) submitted to Strathfield Council;
- 2) submitted to the Commissioner of the New South Wales Fire Brigade; and
- 3) prominently displayed in the building.

(Reason: Fire safety and statutory requirement)

DAOC012 LANDSCAPING (ARBORIST'S FOLLOW UP REPORT OF TREE/S TO BE RETAINED)

As part of the on-going assessment of the tree/s to be retained, the consulting arborist engaged by the applicant is to assess their health and any impacts suffered by them as a result of the proposed approved development. Findings are to be compiled in a detailed report and submitted to the Principle Certifying Authority

to be provided to the satisfaction of the Principle Certifying Authority at the completion of construction and prior to issue of any Occupation Certificate which documents the following:

- 1) methods of excavation or construction used to carry out the works;
- 2) any damage sustained by the tree/s as a result of the works;
- 3) any subsequent remedial works required to be carried out by the consulting arborist as a result of the damage and
- 4) any future or on-going remedial work required to be carried out to ensure the long term retention of the tree/s

(Reason: Ensure survival of trees to be retained)

DAOC014 OCCUPATION OF BUILDING

A person must not commence occupation or use (*or change of use where an existing building*) of the whole or any part of a new building (within the meaning of section 109H (4) of the *Act*) unless an Interim Occupation Certificate or Final Occupation Certificate has been issued in relation to the building or part.

The Principal Certifying Authority is required to be satisfied, amongst other things, that:

- 1) all required inspections (including each applicable mandatory critical stage inspection) have been carried out; and
- 2) any preconditions to the issue of the certificate required by a development consent have been met.

Note: New building includes an altered portion of, or an extension to, an existing building.

(Reason: Statutory requirement)

DAOC018 STORMWATER (CERTIFICATION OF THE CONSTRUCTED STORMWATER DRAINAGE SYSTEM)

The constructed stormwater system shall be certified by a suitably qualified person, in accordance with Council's Stormwater Management Code, prior to the issue of any Occupation Certificate.

(Reason: Adequate stormwater management)

DAOC020 STORMWATER (ON SITE DETENTION IDENTIFICATION PLATE)

Prior to issue of a Final Occupation Certificate, the applicant shall install an identification plate near or onto the control structure of the OSD system, this is to advise the registered proprietor of their responsibility to maintain the OSD facility and not to tamper with it in any manner without written consent.

The applicant can obtain the OSD identification plate from the Council at a cost.

(Reason: To ensure that the OSD system is installed and identified in accordance with this approval)

DAOC021 SUBDIVISION (EVIDENCE OF CONSOLIDATION)

The existing allotments shall be consolidated into a single lot. Evidence that the plan of consolidation has been registered as a deposited plan with the Land and Property Information Office must be submitted to Council, prior to occupation of the site.

(Reason: Proper management of land)

DAOC024 VENTILATION SYSTEMS (NATURAL)

The natural ventilation system shall be designed, constructed and installed in accordance with the provisions of:

- (a) The Building Code of Australia; and
- (b) Protection of the Environment Operations Act 1997.

Details demonstrating compliance with this condition shall be submitted to the Principal Certifying Authority, prior to issue of the Occupation Certificate.

(Reason: To ensure any natural ventilation systems comply with the relevant regulations/standards)

Conditions to be satisfied prior to the issue of a Subdivision Certificate (DASC)

DASC002 ENGINEERING WORKS (CERTIFICATION OF WORK AS EXECUTED)

Prior to the issue of the Subdivision Certificate, a Work As Executed (WAE) plan of all engineering and/or drainage works is to be submitted to the Principal Certifying Authority. The WAE Plan is to be certified by a suitably Qualified Engineer, with Corporate Membership standing in the Institution

of Engineers Australia and registered on the National Professional Engineers Register (NPER) under the appropriate professional category, demonstrating that all engineering works including the provision of services, drainage, driveways and earthworks have been constructed in accordance with the approved plans and any relevant Standards and Council policies/specifications.

Where Council is not the Principal Certifying Authority, an electronic copy of the above documents is to be provided to Council.

(Reason: To ensure adequate access and services have been provided for the new lots)

05 SEPARATE APPLICATION (FOR STRATA SUBDIVISION)

This consent does not imply approval to create a separate title, by subdivision or otherwise. Should it be intended to subdivide the approved development into strata title allotments, Council will require the lodgement of a separate development application for consideration.

(Reason: To ensure compliance with the consent)

DASC006 SUBDIVISION CERTIFICATE (REQUIREMENTS PRIOR TO THE ISSUE OF)

A Subdivision Certificate allows a person to lodge a plan of subdivision with NSW Land and Property Information (LPI). The plan of subdivision identifies each of the allotments approved under the original consent (if required) or each allotment subject to an exempt boundary adjustment. The plan of subdivision is required to be prepared by a registered surveyor.

All types of subdivision (Torrens, Strata and Community Title) are required to be registered with NSW LPI before a new 'allotment' of a subdivision of land can be created.

The release of a Subdivision Certificate confirms that the Principal Certifying Authority (Council or Accredited Certifier) is satisfied that works are completed in accordance with the applicable Development Consent and that the land is suitable to occupy.

Prior to the issuing of any Subdivision Certificate under section 37A of *the Strata Schemes (Freehold Development) Act 1973*, and section 66A of *the Strata Schemes (Leasehold Development) Act 1986*, and in accordance with section 29A of *the Strata Schemes (Freehold Development) Regulation 2007* and section 30A of *the Strata Schemes (Leasehold Development) Regulation 2007*, the PCA is required to be satisfied that:

- 1) the floors, external walls and ceilings depicted in the proposed strata plan for the building correspond to those of the building as constructed;
- 2) the floors, external walls and ceilings of the building as constructed correspond to those depicted in the building plans that accompanied the construction certificate for the building; and
- 3) any facilities required by the relevant development consent (such as parking spaces, terraces and courtyards) have been provided in accordance with those requirements.

As construction of the building nears completion, or after it has been completed, the Principal Certifying Authority must inspect the building and the common property areas around the building, so as to be satisfied, as required by section 66AA of the Act, that the above requirements have been met.

The Principal Certifying Authority shall also be satisfied that:

- (a) all required inspections (including each applicable mandatory critical stage inspection) have been carried out; and
- (b) any preconditions to the issue of the certificate required by a development consent or complying development certificate have been met.

The Subdivision Certificate must not be issued until the Principal Certifying Authority has issued the Final Occupation Certificate in relation to the approved development.

(Reason: Statutory requirements)

DASC007 SUBDIVISION (LODGEMENT OF FINAL PLAN OF SUBDIVISION)

Once a Subdivision Certificate is issued by the Principal Certifying Authority, the Final Plan of Subdivision must be registered with Land and Property Information. Documentary evidence that the linen plan has been registered with Land and Property Information must be submitted to Strathfield Council as soon as practicable.

(Reason: Statutory requirement)

DASC008 SYDNEY WATER (SECTION 73 CERTIFICATE)

A Section 73 Compliance Certificate under the Sydney Water Act 1994 must be obtained before the issue of the Subdivision Certificate. An application must be made through an authorised Water Servicing Coordinator (refer www.sydneywater.com.au).

Following receipt of the application a 'Notice of Requirements' will be issued detailing water and sewer extensions to be built and charges to be paid. Please make early contact with the Water Servicing Coordinator, as building of water/sewer extensions can be time consuming and may impact on other services and building, driveway or landscape design.

Sydney Water written advice that you have obtained the Notice of Requirements must be submitted to the Principal Certifying Authority

The Section 73 Compliance Certificate must be submitted to the Principal Certifying Authority prior to release of the Subdivision Certificate /any occupation of the premises.

(Reason: To comply with the statutory requirements of Sydney Water)

Conditions to be satisfied during ongoing use of the premises (DAOU)

DAOU008 FIRE SAFETY (ANNUAL STATEMENT)

Pursuant to Part 9, Division 5 of the Environmental Planning and Assessment Regulation (as amended) the owner of the building shall provide to Council an Annual Fire Safety Statement from an appropriately qualified person certifying the essential fire safety measures in the building. The Annual Fire Safety Statement shall be submitted within 12 months of the issue of the fire safety certificate, and then on an annual basis.

A copy of the Fire Safety Statement obtained and Fire Safety Schedule shall also be:-

1. Forwarded to the Commissioner of the New South Wales Fire Brigade; and
2. Prominently displayed in the building

(Reason: Fire safety)

DAOU026 NOISE (COMPLIANCE WITH ACOUSTIC ASSESSMENT REPORT)

All recommendations contained in the approved Acoustic Assessment Report prepared by Acoustic Logic shall be adopted, implemented, and adhered to.

The Principal Certifying Authority (PCA) shall obtain a statement from an appropriately qualified acoustic consultant, certifying that the acoustic mitigation measures outlined in the above stated

report have been suitably incorporated into the development and that relevant noise criteria have been satisfied prior to the issue of any Occupation Certificate.

Any changes made to the proposal that would alter the acoustic assessment will require a further acoustic assessment and a copy of this further report shall be provided to Council for approval prior to the commencement of works and any recommendations adopted, implemented, and adhered to.

(Reason: Noise control and amenity)

RESOLUTION

This modification application be **APPROVED** subject to the recommended conditions in the report as amended by the panel.

REASONS:

1. **The panel concurs with the planning officer's report and has made some minor refinements to the conditions of consent.**

FOR: P. Stein, S. Hoble, G. Atkins, A. Ashley-Carrington

AGAINST: Nil

**** End Minutes - Report No. 2****

TO: Strathfield Local Planning Panel Meeting - 5 July 2018
REPORT: SLPP – Report No. 3
SUBJECT: DA2017/138 - 4-10 ALBERT ROAD, STRATHFIELD
LOT 1 DP 433232
DA NO. DA2017/138

RECOMMENDATION

That Development Application No. DA2017/138 for demolition of existing site structures and construction of a mixed-use development comprised of commercial space, mechanical parking installation entry, lobby and waste storage areas at ground floor level; office accommodation at Levels 2 and 3; twelve (12) x two (2) bedroom serviced apartments at Levels 4, 5 and 6; and car parking for ten (10) vehicles at Mezzanine Level and Level 1 at 4-10 Albert Road be **Approved**, subject to the following conditions:

SPECIAL CONDITIONS (SC)

1. MECHANICAL PARKING INSTALLATION (SC)

The mechanical parking installation shall be designed and constructed in accordance with the Building Code of Australia and all relevant Australian Standards including AS 5124:2017 – *Safety of Machinery: Equipment for power driven parking of motor vehicles*.

(Reason: To ensure appropriate safety standards are met.)

2. ACCESS TO THE MECHANICAL PARKING INSTALLATION (SC)

Vehicular access to the mechanical parking installation and each space within the mechanical car stacker shall be in accordance with AS/NZS 2890.1-2004.

(Reason: To ensure compliance with relevant standards for safety.)

3. REPORT ON THE MECHANICAL PARKING INSTALLATION (SC)

A report for the mechanical parking installation shall be prepared by a suitably qualified traffic consultant.

As a minimum, the report shall provide a queuing analysis, taking into account:

- the proposed peak hour vehicle volumes;
- the service rate (in seconds) associated with the proposed parking equipment; and
- demonstrate that vehicle queuing to enter the mechanical parking installation will not extend beyond the property boundary during peak hour vehicle volumes. Vehicles must not wait on the footpath or roadway.

The report should also include the following information:

- details of the internal height clearance;
- details of required servicing and ongoing maintenance;
- details of the noise output of the device; and
- manufacturers documentation.

A copy of the report is to be submitted to Council's Traffic Engineer for approval, prior to the issue of any Construction Certificate.

(Reason: To ensure pedestrian safety and minimise traffic congestion.)

4. RESIDENTIAL WASTE (SC)

The residential waste (both general waste and recycling) from the serviced apartments shall be collected on a weekly basis via a walk-in-walk-out arrangement direct from the residential waste room. Bins shall not be left on the footpath for kerbside collection. An agreement to this effect shall be entered into with Council, prior to any occupation of the premises with evidence of the agreement provided to the Principal Certifying Authority, prior to issue of the Construction Certificate.

Should Council not agree to enter into such an agreement, a private contractor is to be arranged to ensure waste is collected directly from the waste room and bins are not left kerbside for collection.

(Reason: To maintain streetscape amenity and ensure pedestrian safety.)

5. COMMERCIAL WASTE (SC)

Commercial waste from the proposed development shall be collected on a weekly basis and all retail waste collected three (3) times weekly via a walk-in-walk-out arrangement direct from the 'retail waste room'. Bins shall not be left on the footpath for kerbside collection.

A private contractor shall be arranged to provide this service. Evidence of the agreement/contract is to be provided to Council, prior to issue of the Construction Certificate.

(Reason: To maintain streetscape amenity and ensure pedestrian safety.)

6. USE OF APARTMENTS AS SERVICED APARTMENTS (SC)

Use of twelve (12) x two (2) bedroom apartments on Levels 5, 6 and 7 (501, 502, 503, 504, 601, 602, 603, 604, 701, 702, 703, 704) are to be used only for the purpose of a serviced apartment as defined under *Strathfield Local Environmental Plan 2012*.

(Reason: To ensure consistency with the approved development.)

7. TREE PROTECTION MEASURES (SC)

All works are to be carried out in accordance with Sections 6, 7, and 8 of the Arboricultural Impact Assessment Report prepared by Tree Talk Arboricultural Consulting dated July 2017.

The site manager and contractors must be advised of Tree protection requirements, and a copy of the report shall be available on-site at all times.

Where works are proposed within the Structural Root Zone (SRZ) of trees being retained, the project arborist (AQF 5) shall be on site to assess works processes and to consider the likely impacts of works. Where any variations are to be considered the project arborist (AQF 5) shall be consulted.

(Reason: To ensure the protection of trees on adjacent land).

8. PLANS UPDATED (SC)

Drawing No. A 1202 Issue B, prepared by Ghazi Al Ali shall be amended to show the correct number of on-site car parking spaces.

(Reason: To ensure consistency with the approved development).

9. ARBORIST REPORT UPDATED (SC)

The Arboricultural Impact Assessment Report prepared by Tree Talk Arboricultural Consulting (dated July 2017) shall be updated to address the proposed *Tristaniopsis* trees on the Albert Road, road reserve. The report shall demonstrate that the tree species are suitable to the site until maturity in terms of clearance to the proposed development (including awning structure) and canopy interference with vehicles/trucks/buses. The report shall verify that the proposed trees are capable of reaching a mature height of 10m at maturity. An alternative species may be required if the height at maturity of the selected species cannot fulfil this requirement.

All new street trees shall be 6m high at the time of planting.

The report shall also include a landscape maintenance strategy for the owner to administer over a 12 month establishment period following the issue of any Occupation Certificate. The strategy is to address maintenance issues such as, but not limited to plant survival, irrigation, soil testing, weeding, staking, fertilization, remedial pruning and plant replacement. The strategy shall also consider minimizing changes to the footpath levels and containing any nutrients to avoid any trip hazards to pedestrians.

All recommendations contained within the Arboricultural Impact Assessment Report as amended by any conditions of consent, shall be fully complied with.

(Reason: To ensure consistency with the approved development).

10. CAR PARKING (SC)

Drawing No. A 1202 Issue B, prepared by Ghazi Al Ali shall be amended to show the correct number of on-site car parking spaces.

(Reason: To ensure consistency with the approved development).

11. PLANTER BOX (SC)

Provision shall be made for planter boxes along the perimeter of the common open space area at Level 4. The planter boxes shall be of sufficient size to support trees capable of reaching a mature height of minimum 2m at maturity as well as support a creeper style plant with tendrils to overhang the building façade below.

The Landscape Plan shall be amended accordingly, prior to issue of the Construction Certificate.

The Arboricultural Impact Assessment Report prepared by Tree Talk Arboricultural Consulting (dated July 2017) shall be updated to include a landscape maintenance strategy for the owner to administer over a 12 month establishment period following the issue of any Occupation Certificate. The strategy is to address maintenance issues such as, but not limited to plant survival, irrigation, soil testing, weeding, staking, fertilization, remedial pruning and plant replacement.

All recommendations contained within the Arboricultural Impact Assessment Report as amended by any conditions of consent, shall be fully complied with.

(Reason: To enhance the landscape amenity of the site, particularly when viewed from the public domain.)

12. GEOTECHNICAL REPORT RECOMMENDATIONS (SC)

The recommendations contained within the Geotechnical Investigation Report prepared by Geo Environmental Engineering, dated 20/05/2017, shall be fully complied with.

(Reason: Site stability).

13. ACCESS REPORT RECOMMENDATIONS (SC)

The recommendations contained within the Disability Access Report prepared by .Access Solutions NSW Pty Ltd, dated 22/05/2017, shall be fully complied with.

(Reason: To ensure compliance with the BCA and relevant standards/policies with regards to access for people with a disability.)

14. NOISE ASSESSMENT REPORT RECOMMENDATIONS (SC)

The recommendations contained within the Noise Assessment Report prepared by Acoustic Consulting Engineers, dated 16 May 2017, shall be fully complied with.

In addition, the noise assessment report shall be amended to address the interrelationship with the residential component of the development and the adjacent Council carpark.

The amendment is to be submitted to Council for approval prior to the issue of a Construction Certificate.

A qualified acoustic consultant shall be engaged during the design phase of the project to ensure the National Construction Code (NCC)/Building Code of Australia (BCA) acoustic requirements for sole-occupancies are achieved. A report demonstrating compliance shall be prepared and submitted to the Principal Certifying Authority, prior to the issue of any Construction Certificate.

(Reason: To ensure acoustic impacts from external roads, environmental noise, and between the serviced apartments and common spaces is acceptable.)

15. ENERGY EFFICIENT DESIGN (SC)

The mixed-use development shall achieve a 4-6 green star rating in accordance with the Green Building Council of Australia's Green Star program. A certificate demonstrating compliance shall be provided to the Principal Certifying Authority, prior to any issue of the Construction Certificate.

(Reason: To promote energy efficient design.)

16. DA FEES - ADDITIONAL DEVELOPMENT APPLICATION FEES (SC)

In accordance with Regulation 50(1)(c) and the table to Regulation 246 of the Environmental Planning and Assessment Act Council must charge a development application fee based on the estimated cost of works applied for.

The Quantity Survey Report prepared by Construction Consultants dated 19 May 2017 shall be updated to reflect the changes to the Albert Road façade and car parking

configuration under amended architectural drawings Issue B, dated 8/12/2017.

A copy of the amended report shall be provided to Council to confirm the applicable Development Application Fee. Any additional fees shall be paid to Council, prior to the issue of a Construction Certificate.

(Reason: Statutory requirement.)

17. BCA REPORT RECOMMENDATIONS (SC)

The recommendations contained within the BCA Report, prepared by Design Right Consulting dated 30/06/2017, and received by Council on 14/09/2017.

(Reason: To ensure the proposed development is capable of achieving compliance with the BCA.)

18. OSD TANK (SC)

Council's stormwater management code requires the OSD tank to be located as close as possible to the lowest point of the site, with paved areas and pipes draining to it. An amended concept plan prepared by a suitably qualified professional civil/hydraulic engineer shall be submitted to the Principal Certifying Authority and Council for approval, prior to issue of the Construction Certificate.

(Reason: Council requirement.)

19. AWNING (SC)

The height of the underside of the awning shall be 4m above the finished footpath level.

(Reason: To ensure consistency with the prevailing streetscape.)

19A. EXTERIOR CLADDING (SC)

The exterior of the commercial portion of the development shall be perforated metal sheeting and shall ensure reasonable visibility from inside the building to the exteriors and reasonable solar access for the internal spaces.

Plans detailing the above shall be submitted to Council for approval prior the issue of a Construction certificate.

(Reason: For the amenity of the commercial occupant)

20. PRIVACY (SC)

The west facing bedroom windows to Units 504, 604 and 704 shall be amended to include fixed external screening angled at 45° to the north-west to prevent any direct sightline to the west.

Details of the screen materials and colours shall be consistent with the development and included within the schedule of external materials.

(Reason: To maintain appropriate privacy amenity in the event of future redevelopment of the adjoining land to the west.)

20A. COMMUNAL OPEN SPACE LEVEL 4 (SC)

Prior to the issue of a Construction Certificate, the applicant shall submit plans to Council for the communal open space for level 4 detailing a fit-out that will support an active functional use of the area for both the commercial and residential tenancies.

(Reason: To activate the functional use of the Communal Open Space.

AUSGRID CONDITIONS (21-23)

21. STREETLIGHTING (SC)

The developer is to consider the impact that existing streetlighting and any future replacement streetlighting and maintenance may have on the development. Should the developer determine that any existing streetlighting may impact the development, the developer should either review the development design, particularly the placement of windows, or discuss with Ausgrid the options for relocating the street lighting. The relocating of any streetlighting will generally be at the developers cost. In many cases it is not possible to relocate streetlighting due to its strategic positioning.

(Reason: Ausgrid requirement).

22. SERVICE MAINS (SC)

The developer shall engage a Level 2 Accredited Service Provider (ASP) Electrician to ensure that the installation will comply with the requirements of “*The Installation and Service Rules of NSW*”. It appears the existing underground electricity mains that supply the subject property may affect the proposed construction as per the Service Rules. Details demonstrating compliance with this requirement shall be submitted to the Principal Certifying Authority, prior to issue of the Construction Certificate.

(Reason: Ausgrid requirement).

23. PROXIMITY TO EXISTING NETWORK ASSETS (SC)

There are existing underground electricity network assets in Albert Road. Special care should be taken to ensure that driveways and any other construction activities within the footpath area do not interfere with the existing cables in the footpath. Ausgrid cannot guarantee the depth of cables due to possible changed in ground levels from previous activities after the cables were installed. Accordingly, the developer shall locate and record the depth of all known underground services prior to any excavation in the area.

Safework Australia – Excavation Code of Practice, and Ausgrid’s Network Standard NS156 outlines the minimum requirements for working around Ausgrid’s underground cables.

(Reason: Ausgrid requirement).

GENERAL CONDITIONS (GC)

24. APPROVED PLANS AND REFERENCE DOCUMENTATION (GC)

The development, except where modified by a condition(s) of consent, is to be carried out in accordance with the following plans and reference documentation:

Plans affixed with Council's 'Development Consent' stamp relating to Development Consent No. 2017/138:

Drawing No.	Title/Description	Prepared by	Issue / Revision & Date	Date received by Council
A1010	Site Plan	Ghazi Al Ali Architect Ptd Ltd	Issue B / 08.12.2017	08.12.2017
A1050	Streetscape Analysis			
A1110	Demolition Plan			
A1200	Ground Floor Plan			
A1201	Mezzanine			
A2012	Level 01			
A1203	Level 02			
A1204	Level 03			
A1205	Level 04			
A1206	Level 05			
A1207	Level 06			
A1208	Level 07			
A1208	Roof Plan			
A1301	Elevations 01			
A1302	Elevations 02			
A1303	Elevations 03			
A1401	Section AA			
A1402	Section BB			
-	Landscape Plan	Concept Landscape Architects.	Undated	08/12/2017

Reference Documentation affixed with Council's 'Development Consent' stamp relating to Development Consent No. 2017/138:

Title / Description	Prepared by	Issue/Revision & Date	Date received by Council
Statement of Environmental Effects	Nexus Environmental Planning Pty Ltd	13/09/2017	14/09/2017
Traffic Impact Assessment	Traffix	Rev v4 / 07/12/2017	08/12/2017
Noise Assessment Report	Acoustic Consulting Engineers	Rev 01 / 16/05/2017	14/09/2017
Arboricultural Impact Assessment	Tre Talk Arboricultural Consulting	July 2017	08/12/2017
Waste Management Plan	Elephants Foot Recycling Solutions	Rev F / 5/12/2017	05/12/2017
BCA Report	Design Right Consulting	30/06/2017	14/09/2017
820762M	Sustainable Thermal Solutions	29/06/2017	14/09/2017
Disability Access Report	Access Solutions NSW Pty Ltd	Issue P / 05/05/2017	14/09/2017
Geotechnical Investigation Report	Geo-Environmental Engineering	20/05/2017	14/09/2017
Stage 1 Preliminary Site Investigation	Geo-Environmental Engineering	Rev 0 / 28/07/2017	14/09/2017

In the event of any inconsistency, the conditions of this consent shall prevail.

(Reason: To ensure that the form of the development undertaken is in accordance with the determination of Council.)

25. APPROVAL - SEPARATE APPROVAL REQUIRED (GC)

This consent does not include approval for any external signage. Separate development consent shall be obtained for any external signage, except those which are classified as being 'exempt development'.

(Reason: To control future development of the site. No details of any signage have been submitted with the application.)

26. BUILDING HEIGHT - MAXIMUM RL TO BE COMPLIED WITH (GC)

The height of the building measured to Australian Height Datum (AHD) must not exceed RL 42.52 (main roof) and RL 43.02 for the lift overrun.

(Reason: To ensure the approved building height is complied with.)

27. CONSTRUCTION HOURS (GC)

No construction or any other work related activities shall be carried out on the site outside the hours of 7.00 am to 5.00 pm Mondays to Fridays and 8am to 1pm Saturdays.

No building activities are to be carried out at any time on a Sunday or public holiday.

Where the development involves the use of jackhammers/ rock breakers and the like or other heavy machinery, such equipment may only be used between the hours of 7.00 am - 5.00 pm Monday to Friday only.

(Reason: To maintain amenity to adjoining land owners.)

28. CONSTRUCTION WITHIN BOUNDARIES (GC)

The development including but not limited to footings, walls, roof barges and guttering must be constructed wholly within the boundary of the premises. No portion of the proposed structure shall encroach onto the adjoining properties. Gates must be installed so they do not open onto any footpath or adjoining land.

(Reason: Approved works are to be contained wholly within the subject site.)

29. DEMOLITION – GENERALLY (GC)

Alteration and demolition of the existing building is limited to that documented on the approved plans (by way of notation). No approval is given or implied for removal and/or rebuilding of any portion of the existing building which is not shown to be altered or demolished.

(Reason: To ensure compliance with the approved development.)

30. DEMOLITION - SITE SAFETY FENCING (GC)

Site fencing is to be erected to a minimum height of 1.8m complying with WorkCover Guidelines, to exclude public access to the site, prior to any demolition works occurring and maintained for the duration of the demolition works.

If applicable, a separate Hoarding Application for the erection of an A class (fence type) or B class (overhead type) hoarding along the street frontage(s) complying with WorkCover requirements must be obtained including:

- payment to Council of a footpath occupancy fee based on the area of footpath to be occupied and Council's Schedule of Fees and Charges before the commencement of work; and
- provision of a Public Risk Insurance Policy with a minimum cover of \$20 million in relation to the occupation of and works within Council's road reserve, for the full duration of the proposed works, must be obtained with a copy provided to Council (Note: The policy is to note Council as an interested party).

(Reasons: Statutory requirement and health and safety.)

31. LANDSCAPING - IRRIGATION OF COMMON AND PRIVATE LANDSCAPE AREAS (GC)

All common and private landscape areas including all planters of the proposed mixed-use development are to have full coverage by a fully automatic irrigation system. The design, materials and installation are to be in accordance with Sydney Water Codes and satisfy all relevant Australian Standards. Details demonstrating compliance shall be submitted to the Principal Certifying Authority, prior occupation of the premises.

(Reason: To ensure appropriate landscape maintenance.)

32. LANDSCAPING - TREES PERMITTED TO BE REMOVED (GC)

All landscape works shall be undertaken in accordance with the approved landscape plan, arborist report, tree management plan and transplant method statement as applicable.

a) The following trees shall be retained

- Trees on adjoining land

Trees reference in Arborist Report.	Species	Location
Trees A	Boundary planting of <i>Casuarina glauca</i> (Swamp She-oaks)	Adjacent western boundary
Tree B	<i>Casuarina glauca</i> (Swamp She-oak)	Adjacent western boundary
Tree C	<i>Eucalyptus microcorys</i> (Tallowwood)	Adjacent western boundary

Note: The tree/s required to be retained should appear coloured green on the construction certificate plans.

b) The following trees on the subject site may be removed:

Tree reference in Arborist Report	Tree	Location
Tree 1	<i>Melaleuca decora</i> (White Feather/Honey Myrtle)	Front setback
Tree 2	<i>Casuarina glauca</i> (Swamp She-oak)	Front setback

(Reason: To ensure landscaping is in accordance with the approved Landscape Plan.)

33. LANDSCAPING - TREE PRESERVATION (GC)

All street trees and trees on private property that are protected under Council's controls, shall be retained except where Council's prior written consent has been obtained. The felling, lopping, topping, ringbarking, wilful destruction or removal of any tree/s unless in conformity with this approval or subsequent approval is prohibited.

All healthy trees and shrubs identified for retention on the approved drawings are to be suitably protected in accordance with Australian Standard AS4970 – Protection of Trees on Development, prior to the commencement of any works (including any demolition and excavation) and maintained for the duration of the works.

(Reason: To ensure the protection of trees to be retained on the site.)

34. LANDSCAPING – APPROVED LANDSCAPE PLAN (GC)

The approved Landscape Plan shall be amended to include the following as a minimum:

- Prepared at a scale of 1:100 or 1:200.
- All existing trees to be retained on adjoining sites.
- Location of all proposed plantings and any existing plantings to be retained.
- A planting schedule indicating the species, listed by both common names and botanical names, the quantities of each species, pot size, and estimated size at maturity.
- All proposed tree plantings (including those on the Albert Road street alignment which have a mature height equal to or greater than 2m are to have their mature canopy spread indicated on the plan to scale.
- Soil depths for planter boxes. The minimum soil depth for any planting on slab is 1m (excluding 75mm depth of mulch) for small trees, 600mm (excluding 75mm depth of mulch) for shrubs and 300mm for turf.
- Details on the provision of drainage to all planter boxes and on slab plantings is to be provided. A permanent automatic irrigation system conforming to Sydney Water requirements shall be included.

(Reason: To ensure landscaping survival.)

35. LANDSCAPING (GC)

The principal contractor or owner must provide to PCA a works-as-executed landscape plan and certification from a qualified landscape architect/designer, horticulturist and/or arborist as applicable to the effect that the works comply with this consent.

(Reason: To ensure that all landscaping work is completed prior to issue of the Final Occupation Certificate.)

36. LIGHTING (GC)

Any lighting of the premises shall be installed and maintained in accordance with Australian Standard AS 4282-1997: Control of the Obtrusive Effects of Outdoor Lighting so as to avoid annoyance to the occupants of adjoining premises or glare to motorists on nearby roads.

No flashing, moving or intermittent lighting, visible from any public place may be installed on the premises or external signage associated with the development, without the prior approval of Council.

(Reason: To protect the amenity of surrounding development and protect public safety.)

37. PRINCIPAL CERTIFYING AUTHORITY (PCA) IDENTIFICATION SIGN (GC)

Prior to commencement of any work, signage must be erected in a prominent position on the work site identifying:

- i) the Principal Certifying Authority (PCA) by showing the name, address and telephone number of the PCA;
- ii) the Principal Contractor by showing the Principal Contractor's name, address and telephone number (outside of work hours) for that person; and
- iii) the sign must state that unauthorised entry to the work site is prohibited.

Any such sign is to be maintained while the work is being carried out, but must be removed when the work has been completed.

This clause does not apply to building work, subdivision work or demolition work that is carried out inside an existing building that does not affect the external walls of the building.

(Reason: Statutory requirement.)

38. SITE MANAGEMENT - DURING DEMOLITION AND CONSTRUCTION WORKS (GC)

All of the following are to be satisfied/complied with during demolition, construction and any other site works:

- i) All demolition is to be carried out in accordance with Australian Standard AS 2601-2001.
- ii) Demolition must be carried out by a registered demolition contractor.
- iii) A single entrance is permitted to service the site for demolition and construction. The footway and nature strip at the service entrance must be planked out.
- iv) No blasting is to be carried out at any time during construction of the building.
- v) Care must be taken during demolition/ excavation/ building/ construction to prevent any damage to adjoining buildings.
- vi) Adjoining owner property rights and the need for owner's permission must be observed at all times, including the entering onto land for the purpose of undertaking works.
- vii) Any demolition and excess construction materials are to be recycled wherever practicable.
- viii) The disposal of construction and demolition waste must be in accordance with the requirements of the Protection of the Environment Operations Act 1997.
- ix) All waste on the site is to be stored, handled and disposed of in such a manner as to not create air pollution (including odour), offensive noise or pollution of land and/or water as defined by the Protection of the Environment Operations Act 1997. All excavated material should be removed from the site in an approved manner and be disposed of lawfully to a tip or other authorised disposal area.
- x) All waste must be contained entirely within the site.
- xi) Section 143 of the Protection of the Environment Operations Act 1997 requires waste to be transported to a place which can lawfully accept it. All non-recyclable demolition materials are to be disposed of at an approved waste disposal depot in accordance with legislation.
- xii) All materials on site or being delivered to the site are to generally be contained within the site. The requirements of the Protection of the Environment Operations Act 1997 must be complied with when placing/stockpiling loose material, disposing of concrete waste, or other activities likely to pollute drains or water courses.
- xiii) Details as to the method and location of disposal of demolition materials (weight

- dockets, receipts, etc.) should be kept on site as evidence of approved methods of disposal or recycling.
- xiv) Any materials stored on site must be stored out of view or in such a manner so as not to cause unsightliness when viewed from nearby lands or roadways.
 - xv) Public footways, include nature strips and roadways adjacent to the site must be maintained and cleared of obstructions during construction. No building materials, waste containers or skips may be stored on the road reserve or footpath without prior separate approval from Council, including payment of relevant fees.
 - xvi) Building operations such as brick-cutting, washing tools or paint brushes, and mixing mortar not be performed on the roadway or public footway or any other locations which could lead to the discharge of materials into the stormwater drainage system.
 - xvii) All site waters during excavation and construction must be contained on site in an approved manner to avoid pollutants entering into waterways or Council's stormwater drainage system.
 - xviii) Any work must not prohibit or divert any natural overland flow of water.
 - xix) Toilet facilities for employees must be provided in accordance with WorkCover NSW.
 - xx) Protection pads are to be installed to the kerb and gutter where trucks and vehicles enter the site.

(Reason: To ensure that demolition, building and any other site works are undertaken in accordance with relevant legislation and policy and in a manner which will be non-disruptive to the local area.)

39. STORMWATER MANAGEMENT PLAN - CERTIFICATION REQUIREMENT (GC)

A detailed Stormwater Management Plan (SWMP) in line with Council's Stormwater Management Code is to be prepared and certified by a practicing Chartered Professional Engineer on the National Professional Engineer's Register (NPER) at Engineers Australia and submitted to the Principal Certifying Authority and Council, prior to the issue of a Construction Certificate. The SWMP is to be based on the approved development as modified by any conditions of consent.

(Reason: To ensure appropriate provision is made for the disposal and management of stormwater generated by the development, and to ensure public infrastructure in Council's care and control is not overloaded.)

40. SYDNEY WATER - STAMPED PLANS PRIOR TO COMMENCEMENT (GC)

The approved plans must be submitted to a Sydney Water Quick Check agent or Customer Centre to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if further requirements need to be met. Plans will be appropriately stamped.

For Quick Check agent details please refer to the web site www.sydneywater.com.au (see Building Developing and Plumbing then Quick Check) or telephone 13 20 92. The consent authority or a Certifying Authority must ensure that a Quick Check agent/Sydney Water has stamped the plans before the commencement of work.

(Reason: Compliance with Sydney Water requirements.)

41. UTILITIES AND SERVICES - PROTECTION OF (GC)

Any footings or excavation to be located or undertaken adjacent to Council's stormwater must be designed to address the following requirements:

- i) all footings and excavation must be located wholly within the site and clear of any easement boundaries;
- ii) all footings and excavation must be located a minimum of 1000mm from the centreline of the pipeline or 500mm from the outside of the pipeline, whichever is the greater distance from the centreline; and
- iii) footings must extend to at least the depth of the invert of the pipeline unless the footings are to be placed on competent bedrock.

If permanent excavation is proposed beneath the obvert of the pipeline, suitable means to protect the excavation and proposed retaining structures from seepage or other water flow from the pipeline and surrounding subsoil, must be provided. The design must be prepared by a qualified practicing Structural/Civil Engineer.

Construction plans must be approved by the appropriate utility's office (e.g. council, Sydney Water Corporation) to demonstrate that the development complies with the utility's requirements.

The applicant must provide written evidence (e.g. compliance certificate, formal advice) of compliance with the requirements of all relevant utility providers (e.g. Water, Energy, Telecommunications, Gas).

(Reason: To ensure protection of Council assets.)

CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF A CONSTRUCTION CERTIFICATE (CC)

42. ACCESS - ACCESS FOR PEOPLE WITH DISABILITIES (CC)

Access for people with disabilities must be provided in accordance with the requirements of the Building Code of Australia, relevant Australian Standards and with regard to the Disability Discrimination Act 1992. Plans shall be notated demonstrating compliance and approved by the Principal Certifying Authority, prior to the issue of a Construction Certificate.

Note: Disability (Access to Premises - Buildings) Standards 2010 - As of 1 May 2011, if access is provided to the extent covered by this Standard, then such access cannot be viewed as unlawful under the Disability Discrimination Act 1992.

(Reason: To provide equitable access for people(s) with disabilities in accordance with the relevant legislation and Australian Standards.)

43. BASIX COMMITMENTS (CC)

The approved BASIX Certificate shall be submitted to the Principal Certifying Authority with the application for a Construction Certificate.

Where a change or changes are proposed in the BASIX commitments, the applicant must submit a new BASIX Certificate to the Principal Certifying Authority and Council. If any proposed change in the BASIX commitments is inconsistent with the development consent the applicant will be required to submit a modification to the development consent to Council under Section 96 of the Environmental Planning and Assessment Act 1979.

All commitments in the BASIX Certificate must be shown on the plans accompanying the Construction Certificate.

(Reason: Statutory compliance.)

44. BUILDING CODE OF AUSTRALIA - COMPLIANCE WITH (CC)

All architectural drawings, specifications and related documentation shall comply with the Building Code of Australia (BCA). All work must be carried out in accordance with the requirements of the Building Code of Australia (BCA).

In the case of residential building work for which the Home Building Act 1989 requires there to be a contract of insurance in force in accordance with Part 6 of that Act, such a contract of insurance is to be in force before any building work authorised to be carried out by the consent commences.

Details demonstrating compliance with this condition are to be submitted to the Principle Certifying Authority, prior to issue of the Construction Certificate.

(Reason: This is a 'prescribed' condition under clause 98(1) of the Environmental Planning and Assessment Regulation 2000.)

45. COMMENCEMENT OF WORKS (NO WORKS UNTIL A CC IS OBTAINED)

Building work, demolition or excavation must not be carried out until a Construction Certificate has been issued by either Strathfield Council or a Principal Certifying Authority.

Demolition of any part of a building triggers 'commencement of erection of building' pursuant of section 81A(2) of the EP&A Act 1979. Accordingly, demolition works must not commence until a Construction Certificate has been issued, a Principal Certifying Authority has been appointed and a Notice of Commencement has been issued.

(Reason: To ensure compliance with statutory provisions.)

46. CONSTRUCTION AND ENVIRONMENTAL MANAGEMENT PLAN (CC)

The applicant must prepare and submit a Construction and Environmental Management Plan (CEMP) to the Principal Certifying Authority, including:

- i) Detailed information on any approvals required from other authorities prior to or during construction.
- ii) Traffic management, including details of:
 - ingress and egress of vehicles to the site;
 - management of loading and unloading of materials;
 - the location of heavy vehicle parking off-site; and
 - designated routes for vehicles to the site.
- iii) The proposed areas within the site to be used for a builder's site office and amenities, the storage of excavated material, construction materials and waste containers during the construction period.
- iv) Erosion and sediment control, detailing measures and procedures consistent with the requirements of Council's guidelines for managing stormwater, including:
 - the collection and treatment of stormwater and wastewater generated on site prior to discharge; and
 - procedures to prevent run-off of solid material and waste from the site.
- v) Waste management, including:
 - details of the types and estimated volumes of waste materials that will be generated;
 - procedures for maximising reuse and recycling of construction materials; and
 - details of the off-site disposal or recycling facilities for construction waste.

- vi) Dust control, outlining measures to minimise the generation and off-site transmission of dust and fine particles, such as watering or damp cloth fences.
- vii) A soil and water management plan, which includes:
- measures to minimise the area of soils exposed at any one time and conserve top soil;
 - identification and protection of proposed stockpile locations;
 - preservation of existing vegetation and revegetation;
 - measures to prevent soil, sand, sediments leaving the site in an uncontrolled manner;
 - measures to control surface water flows through the site in a manner that diverts clean run-off around disturbed areas, minimises slope gradient and flow distance within disturbed areas, ensures surface run-off occurs at non-erodible velocities, and ensures disturbed areas are promptly rehabilitated;
 - details of sediment and erosion control measures in place before work commences;
 - measures to ensure materials are not tracked onto the road by vehicles entering or leaving the site; and
 - details of drainage to protect and drain the site during works.
- viii) Asbestos management procedures:
- Anyone who removes, repairs or disturbs bonded or a friable asbestos material must hold a current removal licence from Workcover NSW holding either a Friable (Class A) or a Non- Friable (Class B) Asbestos Removal License which ever applies and a current WorkCover Demolition License where works involve demolition. To find a licensed asbestos removalist please see www.workcover.nsw.gov.au
 - Removal of asbestos by a person who does not hold a Class A or Class B asbestos removal license is permitted if the asbestos being removed is 10m² or less of non-friable asbestos (approximately the size of a small bathroom). Friable asbestos materials must only be removed by a person who holds a current Class A asbestos license.
 - Before starting work, a work site-specific permit approving each asbestos project must be obtained from Workcover NSW. A permit will not be granted without a current Workcover licence. All removal, repair or disturbance of or to asbestos material must comply with the following:
 - The Work Health and Safety Act 2011;
 - The Work Health and Safety Regulation 2011;
 - How to Safety Remove Asbestos Code of Practice – WorkCover 2011; and
 - Safe Work Australia Code of Practice for the Management and Control of Asbestos in the Workplace.
 - Following completion of asbestos removal works undertaken by a licensed asbestos removalist re-occupation of a workplace must not occur until an independent and suitably licensed asbestos removalist undertakes a clearance inspection and issues a clearance certificate.
 - The developer or demolition contractor must notify adjoining residents at least two (2) working days (i.e. Monday to Friday exclusive of public holidays) prior to the commencement of asbestos removal works. Notification is to include, at a minimum:
 - the date and time when asbestos removal works will commence;
 - the name, address and business hours contact telephone number of the demolisher, contractor and/or developer;
 - the full name and license number of the asbestos removalist/s; and
 - the telephone number of WorkCover's Hotline 13 10 50
 - warning signs informing all people nearby that asbestos removal work is taking place in the area. Signs should be placed at all of the main entry points to the asbestos removal work area where asbestos is present. These

signs should be weatherproof, constructed of light-weight material and adequately secured so they remain in prominent locations. The signs should be in accordance with AS 1319-1994 Safety signs for the occupational environment for size, illumination, location and maintenance; and

- appropriate barricades installed as appropriate to prevent public access and prevent the escape of asbestos fibres. Barricades must be installed prior to the commencement of asbestos removal works and remain in place until works are completed.

(Reason: Safety, amenity and protection of public infrastructure and the environment.)

47. COUNCIL PERMITS – FOR ALL ACTIVITIES ON COUNCIL LAND (CC)

Works Permit

(as per Section 68 of the Local Government Act 1993 and Section 138 and 139 of the Roads Act 1993)

A Works Permit is required for construction of a vehicular crossing (driveway), new stormwater down pipe connection to kerb and gutter, new footpath and/or stormwater connection. A Works Permit Application Form is available from Council's Customer Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website.

Standing Plant Permit

This permit must be applied for where it is intended to park a concrete pump, crane or other plant on the roadway or footpath. A Standing Plant Permit Application Form is available from Council's Customer Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website. Please note a Road Closure Permit is not required for standing plant.

Skip Bin Permit

This permit must be applied for if you intend to place a skip bin on the roadway or footpath. A Skip Bin Application Form is available from Council's Customer Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website.

Temporary Full or Part Road Closure Permit

This permit must be applied for if you require a full or a part road closure to take place to assist in your construction works. Please use the Works Permit Application Form, which is available from Council's Customer Service Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website. Please note a Road Closure Permit is not required for standing plant.

Hoarding Permit

This permit must be applied for if you intend to erect a Class A (fence type) or Class B (overhead type) hoarding along the street frontage(s). A Hoarding Permit Application Form is available from Council's Customer Service Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website.

Work Zone Permit

This permit must be applied for if you require permanent parking along the kerbside at the front of the site during construction works. A Work Zone Permit Application Form is available from Council's Customer Service Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website.

Ground Anchoring Permit

This permit must be applied for, for the installation of ground anchors under Council's footway/road reserve. It does not cover ground anchors under private properties. A separate approval is required to be obtained from Roads and Maritime Services (RMS) if it is proposed to install ground anchors under a State or Classified Regional Road (please refer to the end of this application form for more information).

(Reason: Council requirement)

48. DILAPIDATION REPORT - PRE-COMMENCEMENT (CC)

Subject to access being granted, a pre-commencement Dilapidation Report is to be undertaken on all adjoining properties, which in the opinion of a suitably qualified engineer, could be potentially affected by the construction of the project. The Dilapidation Report shall be carried out prior to the issue of a Construction Certificate.

The Dilapidation Report is to be prepared by a suitably Qualified Engineer with current Corporate Membership with the Institution of Engineers, Australia or Geotechnical Practitioner. The report shall include a photographic survey of adjoining properties detailing the physical condition of those properties, both internally and externally, including walls, ceilings, roof, structural members and other such items.

If access for undertaking the dilapidation survey is denied by an adjoining owner, the applicant must demonstrate, in writing, to Council's satisfaction attempts have been made to obtain access and/or advise the affected property owner of the reason for the survey and these attempts have been unsuccessful. Written concurrence must be obtained from Council in such circumstances.

The Report shall cover structural and geotechnical factors likely to arise from the development. A copy of this Report shall be submitted to Council as a record. The person having the benefit of the development consent must, at their own cost, rectify any damage caused to other properties during the construction of the project.

(Reason: To ensure no damage to adjoining properties occurs.)

49. EROSION AND SEDIMENTATION CONTROL PLAN (CC)

An Erosion and Sediment Control Plan is to be prepared where construction or excavation activity requires the disturbance of the soil surface and existing vegetation. Details including drawings and specifications must provide adequate measures for erosion and sediment control to ensure:

- i) Compliance with the approved Soil and Water Management Plan.
- ii) Removal or disturbance of vegetation and top soil is confined to within 3m of the approved building area (no trees to be removed without approval).
- iii) All uncontaminated run-off is diverted around cleared or disturbed areas.
- iv) Silt fences or other devices are installed to prevent sediment and other debris escaping from the cleared or disturbed areas into drainage systems or waterways.
- v) All erosion and sediment controls are fully maintained for the duration of demolition/development works.
- vi) Controls are put into place to prevent tracking of sediment by vehicles onto adjoining roadways.
- vii) All disturbed areas are rendered erosion-resistant by turfing, mulching, paving or similar.
- viii) All water pumped or otherwise removed from excavations or basement areas is filtered to achieve suspended solids/non filterable residue levels complying with the Australian Water Quality guidelines for Fresh and Marine Waters.

- ix) Pumped or overland flows of water are discharged so as not to cause, permit or allow erosion before the commencement of work (and until issue of the occupation certificate).

Details of the proposed soil erosion and sedimentation controls are to be submitted to the Principal Certifying Authority with the Construction Certificate Application. Under no circumstances are any works to commence, prior to these details being approved by the Principal Certifying Authority and the controls being in place on the site.

(Reason: Environmental protection.)

50. EXCAVATION - AFFECTING ADJOINING LAND (CC)

If an excavation associated with the approved development extends below the level of the base of the footings of a building on an adjoining allotment of land, the person having the benefit of the development consent must, at the person's own expense, comply with the requirements of clause 98E of the Environmental Planning and Assessment Regulation 2000, including:

- i) protect and support the adjoining premises from possible damage from the excavation, and
- ii) where necessary, underpin the adjoining premises to prevent any such damage.

The condition referred to in subclause (i) does not apply if the person having the benefit of the development consent owns the adjoining land or the owner of the adjoining land has given consent in writing to that condition not applying. Details shall be submitted to the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: Structural safety.)

51. FIRE SAFETY SCHEDULE (CC)

A Fire Safety Schedule specifying the fire safety measures which should be implemented in the building premises must be submitted with the Construction Certificate application, in accordance with Part 9 of Clause 168 of the Environmental Planning and Assessment Regulation 2000.

Note: A Construction Certificate cannot be issued until a Fire Safety Schedule is received.

(Reason: Compliance with the Environmental Planning and Assessment Act 1979.)

52. SECTION 7.11 CONTRIBUTION PAYMENT (CC)

In accordance with the provisions of Section 7.11 of the Environmental Planning and Assessment Act 1979 and the Strathfield Direct Development Contributions Plan 2010-2030, a contribution in the form of cash, cheque or credit card (financial transaction fee applies) shall be paid to Council for the following purposes:

CONTRIBUTION PAYABLE

Provision of Community Facilities	\$Nil
Provision of Major Open Space	\$105,539.33
Provision of Local Open Space	\$36,357.76
Provision Roads and Traffic Management	\$73,992.20

Administration	\$2,093.48
TOTAL	\$217,982.77

CREDIT

Provision of Community Facilities	\$Nil
Provision of Major Open Space	\$10,993.49
Provision of Local Open Space	\$3,731.73
Provision Roads and Traffic Management	\$34,795.90
Administration	\$201.72
TOTAL	\$49,722.83

Base on the rates above, the total amount payable is **\$168,259.93**.

The total amount of the contribution is valid as at the date of determination and is subject to quarterly indexation. Contributions shall be indexed at the time of payment in accordance with clause 2.14 of the Strathfield Direct Development Contributions Plan 2010-2030.

Contributions must be received by Council and submitted to the Accredited Certifier, prior to the issue of any Construction Certificate.

Please present a copy of this condition when paying the contribution at the Customer Service Centre so that it can be recalculated.

Note: A copy of Strathfield Council's Section 94 Direct Development Contributions Plan may be downloaded from Council's website.

(Reason: To enable the provision of public amenities and services required/anticipated as a consequence of increased demand resulting from the development.)

53. SECURITY PAYMENT - DAMAGE DEPOSIT FOR COUNCIL INFRASTRUCTURE (CC)

A security (damage deposit) calculated in accordance with Council's adopted Fees and Charges) shall be paid to Council, prior to the issue of a Construction Certificate.

The deposit is required as security against any damage to Council property during works on the site. The applicant must bear the cost of all restoration works to Council's property damaged during the course of this development. All building work must be carried out in accordance with the Building Code of Australia.

Payment may be accepted in the form of cash, bank guarantee, cheque or credit card (financial transactions fees apply). Note: Additional fees apply for the lodgement of a bank guarantee in lieu of cash bond applies in accordance with Council's adopted Fees and Charges.

Any costs associated with works necessary to be carried out to rectify any damages caused by the development, shall be deducted from the Damage Deposit.

Note: Should Council property adjoining the site be defective e.g. cracked footpath, broken kerb etc., this should be reported in writing, or by photographic record, submitted to Council at least seven (7) days prior to the commencement of any work on site. This documentation will be used to resolve any dispute over damage to infrastructure. It is in the applicant's interest for it to be as full and detailed as possible.

The damage deposit shall be refunded upon completion of all works upon receipt of

a Final Occupation Certificate stage and inspection by Council.

(Reason: Protection of Council infrastructure.)

54. TRAFFIC - CONSTRUCTION TRAFFIC MANAGEMENT PLAN (CC)

A Construction Traffic Management Plan (CTMP) is to be prepared by an appropriately qualified Traffic Management Consultant and submitted to and approved by Council's Engineering Section, prior to the commencement of any works including demolition.

The following matters should be addressed in the CTMP (where applicable):

- i) description of the demolition, excavation and construction works;
- ii) site plan/s showing the site, roads, footpaths, site access points and vehicular movements;
- iii) size, type and estimated number of vehicular movements (including removal of excavated materials, delivery of materials and concrete to the site);
- iv) proposed route(s) from the arterial (state) road network to the site and the proposed route from the site back to the arterial road network;
- v) impacts of the work and vehicular movements on the road network, traffic and pedestrians and proposed methods to safely manage pedestrians and construction related vehicles in the frontage roadways;
- vi) any Traffic Control Plans (TCP's) proposed to regulate traffic and pedestrian movements for construction activities (such as concrete pours, crane installation/removal etc.);
- vii) proposed hours of construction related activities and vehicular movements to and from the site;
- viii) current/proposed approvals from other Agencies and Authorities (including Roads and Maritime Services, Police and State Transit Authority);
- ix) any activities proposed to be located or impact upon Council's road, footways or any public place;
- x) measures to maintain public safety and convenience;
- xi) any proposed road and/or footpath closures;
- xii) turning areas within the site for construction and spoil removal vehicles, allowing a forward egress for all construction vehicles on the site;
- xiii) locations of work zones (where it is not possible for loading/unloading to occur on the site) in the frontage roadways accompanied by supporting documentation that such work zones have been approved by the Local Traffic Committee and Council;
- xiv) location of any proposed crane and concrete pump and truck standing areas on and off the site (and relevant approvals from Council for plant on road);
- xv) a dedicated unloading and loading point within the site for all construction vehicles, plant and deliveries;
- xvi) material, plant and spoil bin storage areas within the site, where all materials are to be dropped off and collected;
- xvii) on-site parking area for employees, tradespersons and construction vehicles as far as possible;
- xviii) proposed areas within the site to be used for the storage of excavated material, construction materials and waste and recycling containers during the construction period; and
- xix) how it is proposed to ensure that soil/excavated material is not transported onto surrounding footpaths and roadways.

(Reason: To mitigate traffic impacts on the surrounding area during the construction period.)

55. UTILITIES AND TELECOMMUNICATIONS - ELECTRICITY CONNECTION (CC)

Provision must be made for connection to future underground distributions mains. This must be achieved by installing:

- i) an underground service line to a suitable existing street pole; or
- ii) sheathed underground consumers mains to a customer pole erected near the front property boundary (within 1 metre).

Note: A limit of one (1) pole per site will apply.

Any costs associated with the relocation of the above are at the requestor's expense. Any disturbance to public land as a result of the undergrounding of services shall be restored at no cost to Council.

Details are to be submitted to the Principal Certifying Authority with the Construction Certificate Application.

(Reason: Environmental amenity.)

56. VENTILATION SYSTEMS (CC)

Any natural or mechanical ventilation systems shall be designed, constructed and installed in accordance with the following:

- i) The Building Code of Australia;
- ii) Protection of the Environment Operations Act 1997; and
- iii) Australian Standard AS1668-1991.

Details demonstrating compliance with the above are to be submitted to the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: To ensure any proposed ventilation system complies with the relevant requirements/standards.)

57. WASTE MANAGEMENT PLAN (CC)

A Waste Management Plan (WMP) is to be provided in accordance with Part H of Strathfield Consolidated Development Control Plan 2005. All requirements of the approved Waste Management Plan must be implemented during demolition, construction and on-going use of the premises. The Waste Management Plan shall also include the information set out in Appendix A of Part H of SCDCP 2005.

The WMP must identify the types of waste that will be generated and all proposals to re-use, recycle or dispose of the waste. The WMP is to be submitted to the Principal Certifying Authority, prior to issue of the Construction Certificate.

(Reason: To ensure appropriate management of waste.)

58. WASTE ROOMS – SEPARATE FOR COMMERCIAL AND RESIDENTIAL (CC)

The building must include not less than two independently designated areas or garbage rooms for commercial and for residential occupants; to keep commercial waste and recycling separate to residential waste and recycling.

The size of the separate waste rooms shall be sufficient to house the required bin provision in accordance with Part H of SCDCP 2005.

(Reason: To ensure the appropriate separation and collection of waste generated by commercial and residential activities.)

59. WASTE - GARBAGE ROOMS OR GREASE ARRESTOR ROOMS (CC)

Garbage rooms or grease arrester rooms must be constructed of solid material: cement rendered and steel trowelled to a smooth even surface. The door to the garbage room is to be designed and constructed to ensure the room is vermin proof and can be opened from the inside at all times. The garbage room is to be ventilated to the external air by natural ventilation or an approved air handling exhaust system.

(Reason: To keep garbage rooms in a clean and sanitary condition to protect public health.)

60. WORKS WITHIN THE ROAD RESERVE (CC)

Detailed drawings including long and short sections and specifications of all works within existing roads (including but not limited to structures, road works, driveway crossings, footpaths and stormwater drainage) shall be submitted to and approved by Council under Section 138 of the Roads Act 1993 and all fees and charges paid, prior to the issue of a Construction Certificate.

Detailed drawings and specifications are to be prepared and certified by an appropriately qualified Civil Engineer.

Upon completion of the works, the Applicant is to provide to Council with electronic copies of 'Work as Executed Plans'. The plans are to show relevant dimensions and finished levels and are to be certified by a surveyor.

The Applicant is to provide to Council, in an approved format, details of all public infrastructure created as part of the works.

All civil engineering works adjacent/near/outside 4-10 Albert Road are to be fully supervised by Council. A maintenance period of six (6) months shall apply to the work, after it has been completed and approved. In that period the Applicant shall be liable for any part of the work which fails to perform in the manner outlined in Council's specifications, or as would reasonably be expected under the design conditions.

(Reason: To ensure compliance of engineering works/Council assets are constructed to acceptable standards for engineering works.)

61. WORKS ZONE - APPROVAL BY COUNCIL'S TRAFFIC COMMITTEE (CC)

An application for a 'Works Zone' must be submitted to and approved by the Strathfield Council Traffic Committee prior to the commencement of any site work (including demolition).

The suitability of the proposed length and duration of the Works Zone is to be demonstrated in the application for the Works Zone. The application for the Works Zone must be submitted to Council at least six (6) weeks prior to the commencement of work on the site to allow for assessment and tabling of agenda for the Strathfield Council Traffic Committee.

The requirement for a Works Zone may be varied or waived only if it can be demonstrated in the Construction Traffic Management Plan (to the satisfaction of Council) that all construction related activities (including all loading and unloading operations) can and will be undertaken wholly within the site. The written approval of Council must be obtained to

provide a Works Zone or to waive the requirement to provide a Works Zone prior to the commencement of any site work.

(Reason: Council requirement.)

CONDITIONS TO BE SATISFIED PRIOR TO THE COMMENCEMENT OF WORKS (CW)

62. APPOINTMENT OF A PRINCIPAL CERTIFYING AUTHORITY (PCA) (CW)

No work shall commence in connection with this Development Consent until:

- i) A construction certificate for the building work has been issued by the consent authority or a Principal Certifying Authority.
- ii) The person having the benefit of the development consent has appointed a principal certifying authority for the building work, and notified the principal certifying authority that the person will carry out the building work as an owner/builder, if that is the case.
- iii) The principal certifying authority has, no later than 2 days before the building work commences:
 - notified the Council of his or her appointment, and
 - notified the person having the benefit of the development consent of any critical stage inspections and other inspections that are to be carried out in respect of the building work.
- iv) The person having the benefit of the development consent, if not carrying out the work as an owner-builder, has:
 - appointed a principal contractor for the building work who must be the holder of a contractor licence if any residential building work is involved;
 - notified the principal certifying authority of such appointment; and
 - unless that person is the principal contractor, notified the principal contractor of any critical stage inspections and other inspections that are to be carried out in respect of the building work.
- v) The person having the benefit of the development consent has given at least 2 days notice to the Council of the person's intention to commence the erection of the building.

Note: If the principal certifying authority is the Council, the nomination will be subject to the payment of a fee for the service to cover the cost of undertaking all necessary inspections and the issue of the appropriate certificates.

Under the Environment Planning and Assessment (Quality of Construction) Act, 2003, a sign must be erected in a prominent position on the work site showing the name, address and telephone number of the principal certifying authority; the name of the principal contractor (if any) for the building work and a telephone number at which that person may be contacted outside working hours. That sign must also state that unauthorised entry is prohibited. The sign must not be removed until all work has been completed.

(Reason: Statutory requirement.)

63. NOTICE OF COMMENCEMENT (CW)

No work shall commence until the following details are submitted to Council:

- i) a Notice of Commencement (form will be attached with issue of a Construction Certificate or available from our website) within two (2) days of the date on which it is proposed to commence works associated with the Development Consent;
- ii) details of the appointment of a Principal Certifying Authority (either Council or

- another Principal Certifying Authority); and
- iii) details of the name, address and licence details of the Builder.

(Reason: Statutory requirement.)

CONDITIONS TO BE SATISFIED DURING DEMOLITION AND BUILDING WORKS (DW)

64. CONTAMINATED LAND UNEXPECTED FINDS (DW)

In the instance works cause the generation of odours or uncovering of unexpected contaminants works are to immediately cease, Council is to be notified and a suitably qualified environmental scientist appointed to further assess the site.

The contaminated land situation is to be evaluated by the supervising environmental consultant and an appropriate response determined in consultation with the applicant, which is agreed to by Strathfield Council's Environmental Services Manager.

Note: Council may also request that a NSW EPA accredited site auditor is involved to assist with the assessment of the contaminated land situation and review any new contamination information. The applicant must also adhere to any additional conditions which may be imposed by the accredited site auditor.

(Reason: To ensure compliance with statutory requirements.)

65. FILL MATERIAL (DW)

The only waste derived material which may be received at the development site is:

- i) Virgin excavated material (within the meaning of the Protection of the Environment Operations Act 1997), and
- ii) any other waste-derived material the subject of a resource recovery exemption under cl.51A of the Protection of the Environment Operations (Waste) Regulation 2005 that is permitted to be used as fill material.

Any (b)-type material received at the development site must be accompanied by documentation certifying by an appropriately qualified environmental consultant the materials compliance with the exemption conditions; and this documentation must be provided to the Principal Certifying Authority on request.

(Reason: To ensure imported fill is of an acceptable standard for environmental protection purposes.)

66. OBSTRUCTION OF PUBLIC WAY NOT PERMITTED DURING WORKS (DW)

The public way must not be obstructed by any materials, vehicles, refuse, skips or the like, under any circumstances, without the prior approval of Council.

(Reason: To maintain public access and safety.)

67. PUBLIC INFRASTRUCTURE AND SERVICES (DW)

The applicant must comply with the requirements (including financial costs) of any relevant utility provider (e.g. Energy Australia, Sydney Water, Telstra, RMS, Council etc.) in relation to any connections, works, repairs, relocation, replacements and/or adjustments to public infrastructure or services affected by the development.

(Reason: To maintain public infrastructure and/or services.)

68. SITE REQUIREMENTS DURING DEMOLITION AND CONSTRUCTION

All of the following are to be satisfied/complied with during demolition, construction and any other site works:

- i) All demolition is to be carried out in accordance with Australian Standards AS 2601-2001.
- ii) Demolition must be carried out by a registered demolition contractor.
- iii) A single entrance is permitted to service the site for demolition and construction. The footway and nature strip at the service entrance must be planked out with close boarded, hardwood timber footpath protection pads. The pad shall cover the entire width of the footpath opening for the full width of the fence.
- iv) No blasting is to be carried out at any time during construction of the building.
- v) Care must be taken during demolition/ excavation/ building/ construction to prevent any damage to adjoining buildings.
- vi) Adjoining owner property rights and the need for owner's permission must be observed at all times, including the entering onto land for the purpose of undertaking works.
- vii) Any demolition and excess construction materials are to be recycled wherever practicable.
- viii) The disposal of construction and demolition waste must be in accordance with the requirements of the Protection of the Environment Operations Act 1997.
- ix) All waste on the site is to be stored, handled and disposed of in such a manner as to not create air pollution (including odour), offensive noise or pollution of land and/or water as defined by the Protection of the Environment Operations Act 1997.
- x) All excavated material should be removed from the site in the approved manner and be disposed of lawfully to a tip or other authorised disposal area.
- xi) Section 143 of the Protection of the Environment Operations Act 1997 requires waste to be transported to a place which can lawfully accept it. All non-recyclable demolition materials are to be disposed of at an approved waste disposal depot in accordance with legislation.
- xii) All materials on site or being delivered to the site are to generally be contained within the site. The requirements of the Protection of the Environment Operations Act 1997 must be complied with when placing/stockpiling loose material, disposing of concrete waste, or other activities likely to pollute drains or water courses.
- xiii) Details as to the method and location of disposal of demolition materials (weight dockets, receipts etc.) should be kept on site as evidence of approved methods of disposal and recycling.
- xiv) Any materials stored on site must be stored out of view or in such a manner so as not to cause unsightliness when viewed from nearby lands or roadways.
- xv) Public footways and roadways adjacent to the site must be fully maintained and cleared of obstructions during construction unless prior separate approval from Council is obtained including payment of relevant fees.
- xvi) Building operations such as brick cutting, washing tools or paint brushes, and mixing mortar not be performed on the roadway or public footway or any other locations which could lead to the discharge of materials into the stormwater drainage system.
- xvii) All site waters during excavation and construction must be contained on site in an approved manner to avoid pollutants entering into waterways or Council's stormwater drainage system.
- xviii) Stamped plans, specifications, documentation and the consent shall be available on site at all times during construction.

(Reason: To ensure that demolition, building and any other site works are undertaken in accordance with relevant legislation and policy and in a manner which will be non-disruptive)

to the local area.)

69. SURVEY REPORT OF APPROVED LEVELS DURING AND POST CONSTRUCTION (DW)

A Survey Certificate to Australian Height Datum shall be prepared by a Registered Surveyor as follows:

- i) At the completion of the first structural floor level prior to the pouring of concrete indicating the level of that floor and the relationship of the building to the boundaries.
- ii) At the completed height of the building, prior to the placement of concrete inform work, or the laying of roofing materials.
- iii) At the completion of the development.

Progress certificates in response to points (1) through to (3) shall be provided to the Principal Certifying Authority at the time of carrying out relevant progress inspections. Under no circumstances is work allowed to proceed until such survey information is submitted to and approved by the Principal Certifying Authority.

(Reason: To ensure compliance with the approved plans.)

CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF AN OCCUPATION CERTIFICATE (OC)

70. CAR PARKING - SURPLUS VEHICULAR CROSSINGS (OC)

All surplus vehicular crossings and/or kerb laybacks must be removed and reinstated with concrete kerb and gutter or to the existing edging profile as specified by Council. The nature strip is to be restored and the footpath area reinstated. All of the above are to be restored to the satisfaction of Council's Engineer and at full cost to the applicant, prior to the issue of any Occupation Certificate.

(Reason: Maintenance of public infrastructure.)

71. ENGINEERING WORKS (CERTIFICATION OF)

Prior to occupation of the premises, a Work As Executed (WAE) Plan of all engineering and/or drainage works is to be submitted to the Principal Certifying Authority. The WAE Plan is to be certified by a suitably Qualified Engineer, with Corporate Membership standing in the Institution of Engineers Australia and registered on the National Professional Engineers Register (NPER) under the appropriate professional category, demonstrating that:

- i) the stormwater drainage system; and/or
- ii) the car parking arrangement and area; and/or
- iii) any related footpath crossing works; and/or
- iv) the proposed basement pump and well system; and/or
- v) the proposed driveway and layback; and/or
- vi) any other civil works

have been constructed in accordance with the approved plans and any relevant Standards and Council policies/specifications.

For major works, such as subdivisions, works within the road reserve (requiring separate S138 approval) and as where specified by Council, a Part 4A Certificate will be required. It is strongly recommended that an Engineer supervise all engineering related works.

Where Council is not the Principal Certifying Authority, an electronic copy of the above documents is to be provided to Council, prior to the issue of any Occupation Certificate.

(Reason: Asset management.)

72. FIRE SAFETY CERTIFICATION (OC)

A fire safety certificate shall be obtained in accordance with Part 9, Division 4 of the Environmental Planning and Assessment Regulation 2000, prior to the issue of any Occupation Certificate.

An fire safety certificate is a certificate issued by the owner of a building to the effect that each essential fire safety measure specified in the current fire safety schedule for the part of the building to which the certificate relates:

- i) has been assessed by a properly qualified person; and
- ii) was found, when it was assessed, to be capable of performing to at least the standard required by the current fire safety schedule for the building for which the certificate is issued.

An interim fire safety certificate must be provided before an interim occupation certificate can be used for a building under Clause 153(2) of the Environmental Planning & Assessment Regulation 2000.

A final fire safety certificate must be provided before an interim occupation certificate can be used for a building under Clause 153(1) of the Environmental Planning & Assessment Regulation 2000.

A copy of the fire safety certificate and fire safety schedule shall be:

- i) submitted to Strathfield Council;
- ii) submitted to the Commissioner of the New South Wales Fire Brigade; and
- iii) prominently displayed in the building.

(Reason: Fire safety and statutory requirement.)

73. LANDSCAPING - ARBORIST'S FOLLOW UP REPORT OF TREE/S TO BE RETAINED (OC)

As part of the on-going assessment of the tree/s to be retained on the adjoining land to the west of the site (Trees A, B and C in the Arborist Report), the consulting arborist engaged by the applicant is to assess their health and any impacts suffered by them as a result of the proposed approved development, prior to the issue of an Occupation Certificate. Findings are to be compiled in a detailed report and submitted to the Principle Certifying Authority, which documents the following:

- i) methods of excavation or construction used to carry out the works;
- ii) any damage sustained by the tree/s as a result of the works;
- iii) any subsequent remedial works required to be carried out by the consulting arborist as a result of the damage; and
- iv) any future or on-going remedial work required to be carried out to ensure the long term retention of the tree/s.

(Reason: To ensure the survival of trees to be retained.)

74. OCCUPATION OF BUILDING (OC)

A person must not commence occupation or use (or change of use where an existing building) of the whole or any part of a new building (within the meaning of section 109H (4) of the Act) unless an Interim Occupation Certificate or Final Occupation Certificate has been issued in relation to the building or part.

The Principal Certifying Authority is required to be satisfied, amongst other things, that:

- i) all required inspections (including each applicable mandatory critical stage inspection) have been carried out; and
- ii) any preconditions to the issue of the certificate required by a development consent have been met.

Note: New building includes an altered portion of, or an extension to, an existing building.

(Reason: Statutory requirement.)

75. STORMWATER - CERTIFICATION OF THE CONSTRUCTED DRAINAGE SYSTEM (OC)

The constructed stormwater system shall be certified by a suitably qualified person, in accordance with Council's Stormwater Management Code, prior to the issue of any Occupation Certificate.

(Reason: Adequate stormwater management.)

76. STORMWATER - COVENANT AND RESTRICTION AS TO USER FOR STORMWATER CONTROLLED SYSTEMS (OC)

Prior to the issue of any Occupation Certificate, the applicant shall register a Positive Covenant and a Restriction as to User under section 88E and or section 88B of the Conveyancing Act as appropriate in favour of Council, ensuring the ongoing retention, maintenance and operation of the stormwater facility (on-site detention, pump-out, charged lines, etc.).

(Reason: To ensure the on-site detention and/or pump system is maintained to an appropriate operational standard.)

CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF A SUBDIVISION CERTIFICATE (SC)**77. ENGINEERING WORKS - CERTIFICATION OF WORK AS EXECUTED (SC)**

Prior to the issue of the Subdivision Certificate, a Work As Executed (WAE) plan of all engineering and/or drainage works is to be submitted to the Principal Certifying Authority. The WAE Plan is to be certified by a suitably Qualified Engineer, with Corporate Membership standing in the Institution of Engineers Australia and registered on the National Professional Engineers Register (NPER) under the appropriate professional category, demonstrating that all engineering works including the provision of services, drainage, driveways and earthworks have been constructed in accordance with the approved plans and any relevant Standards and Council policies/specifications.

Where Council is not the Principal Certifying Authority, an electronic copy of the above documents is to be provided to Council.

(Reason: To ensure adequate access and services have been provided for the new lots.)

CONDITIONS TO BE SATISFIED DURING ONGOING USE OF THE PREMISES (OU)**78. COMMERCIAL PREMISES - NO SIGNAGE OR GOODS ON PUBLIC FOOTWAY (OU)**

At no time may any signs including sandwich boards and the like or goods for sale or display, be placed on the public road, public footpath, service land, parking area and driveways, public or private pedestrian walkways outside the premises or in the immediate vicinity without the prior approval of Council.

(Reason: Safety and amenity.)

79. FIRE SAFETY ANNUAL STATEMENT (OU)

Pursuant to Part 9, Division 5 of the Environmental Planning and Assessment Regulation (as amended) the owner of the building shall provide to Council an Annual Fire Safety Statement from an appropriately qualified person certifying the essential fire safety measures in the building. The Annual Fire Safety Statement shall be submitted within 12 months of the issue of the fire safety certificate, and then on an annual basis.

A copy of the Fire Safety Statement obtained and Fire Safety Schedule shall also be:

- i) Forwarded to the Commissioner of the New South Wales Fire Brigade; and
- ii) Prominently displayed in the building.

(Reason: Fire safety)

RESOLUTION

This application be **APPROVED** subject to the recommended conditions contained in the report as amended by the panel.

REASONS:

1. **The panel generally concurs with the Planning Officer's report and has refined some of the conditions of consent to improve the amenity and functionality of the building.**

FOR: P. Stein, S. Hobley, G. Atkins, A. Ashley-Carrington

AGAINST: Nil

**** End Minutes - Report No. 3****

TO: Strathfield Local Planning Panel Meeting - 5 July 2018
REPORT: SLPP – Report No. 4
SUBJECT: DA2017/194 - 18 MARLBOROUGH ROAD, HOMEBUSH WEST
LOT 12 SECTION 1 DP 827
DA NO. DA2017/194

RECOMMENDATION

That Development Application No. DA2017/194 for Demolition of existing structures and construction of a part 4, part 5 storey boarding house development with (49) lodger rooms with a single level of basement parking under the Affordable Rental Housing SEPP 2009 at 18 Marlborough Road, Homebush West be **APPROVED**, subject to the following conditions:

SPECIAL CONDITIONS (SC)

1. ADAPTABLE HOUSING

A minimum of eight (8) accessible rooms shall be provided. The plans shall be amended and nominate all required accessible rooms prior to the issue of a Construction Certificate.

(Reason: To ensure development provides adequate adaptable housing)

2. ADAPTABLE HOUSING COMPLIANCE

The proposed development including the eight (8) nominated adaptable units shall comply with the adaptable housing provisions of AS4299 – Adaptable Housing and AS1498 – Access and Mobility (Parts 1 and 2).

(Reason: To ensure development provides adequate adaptable housing)

3. RESIDENTIAL WASTE (SC)

The residential waste (both general waste and recycling) from the development shall be collected on a weekly basis via a walk-in-walk-out arrangement direct from the residential waste room. Bins shall not be left on the footpath for kerbside collection but within a designated on-site collection area. An agreement to this effect shall be entered into with Council, prior to any occupation of the premises with evidence of the agreement provided to the Principal Certifying Authority, prior to issue of the Construction Certificate.

Should Council not agree to enter into such an agreement, a private contractor is to be arranged to ensure waste is collected directly from the waste room and bins are not left kerbside for collection.

(Reason: To maintain streetscape amenity and ensure pedestrian safety.)

4. BULKY WASTE STORAGE AREA

A designated Bulky Waste Storage Area shall be provided within proximity to the proposed garage room. The plans shall be amended to provide a designated Bulky Waste Storage area not less than 21sqm in area and be submitted to and approved by Council prior to the issue of a Construction Certificate.

(Reason: To ensure adequate waste storage facilities within the development)

5. GARBAGE STORAGE FACILITIES

The designated garbage room shall be of adequate size to accommodate the provision of the following:

- 14 x 240L General Waste Bins
- 5 x 240L Recycling Bins

The plans shall be amended to reflect the requirement and be submitted to Council and approved by Council prior to the issue of a Construction Certificate.

(Reason: To ensure adequate waste storage facilities within the development)

6. ONSITE COLLECTION AREA

A designated on-site waste collection area shall be provided for the temporary holding of bins awaiting waste collection. The on-site waste collection area shall be a minimum of 21sqm and adjoin a designated Waste Vehicle Standing Bay. The Waste Vehicle Standing Bay shall be located on suite and be capable of accommodating a waste collection vehicle during periods of waste collection.

(Reason: To avoid the proliferation of residential waste within public areas)

7. NOISE ASSESSMENT REPORT RECOMMENDATIONS (SC)

The recommendations contained within the Noise Assessment Report prepared by Acoustic Noise and Vibration Solutions, dated 28 July 2017, shall be fully complied with.

A qualified acoustic consultant shall be engaged during the design phase of the project to ensure the National Construction Code (NCC)/Building Code of Australia (BCA) acoustic requirements for sole-occupancies are achieved. A report demonstrating compliance shall be prepared and submitted to the Principal Certifying Authority, prior to the issue of any Construction Certificate.

(Reason: To ensure acoustic impacts from external roads, environmental noise, and between the serviced apartments and common spaces is acceptable)

8. BCA REPORT RECOMMENDATIONS (SC)

The recommendations contained within the BCA Report, prepared by Max Brightwell dated August 2017, and received by Council on 20.12.2017.

(Reason: To ensure the proposed development is capable of achieving compliance with the BCA.)

9. GEOTECHNICAL INVESTIGATIONS REPORT (SC)

The recommendations contained within the Geotechnical Investigations Report, prepared by Geo-environmental Engineering, Report ID. G17069HW-R01F

(Reason: Site stability)

10. STORAGE AREA (SC)

Storage area is to be designed in accordance with Section 3.5 of AS2890.1.

(Reason: Compliance with Section 3.5 of AS2890.1)

11. CAR PARKING SPACES (SC)

A total of (21) car parking spaces, eleven (11) motorcycle spaces and eleven (11) bicycle spaces shall be provided in the basement.

(Reason: To provide adequate parking commensurate to the development requirements)

12. LIFT OVERRUN (SC)

The lift overrun located within the eastern building fronting Marlborough Road shall be deleted. Amended architectural plans omitting the lift overrun shall be submitted to and approved by Council prior to the issue of Construction Certificate.

(Reason: To reduce the extent of height variation to the SLEP2012 development standard)

GENERAL CONDITIONS (GC)**1. APPROVED PLANS AND REFERENCE DOCUMENTATION (GC)**

The development, except where modified by a condition(s) of consent, is to be carried out in accordance with the following plans and reference documentation:

Plans affixed with Council's 'Development Consent' stamp relating to Development Consent No. DA2017/194:

Drawing No.	Title/Description	Prepared by	Issue / Revision & Date	Date received by Council

Waste Management	Liquid Design		20/12/2017

In the event of any inconsistency, the conditions of this consent shall prevail.

(Reason: To ensure that the form of the development undertaken is in accordance with the determination of Council.)

2. BOARDING HOUSE - APPROVED USE (GC)

- The boarding house must be operated in accordance with the Boarding Houses Act 2012.
- The boarding house is required to be registered on a register administered by NSW Fair Trading within 28 days where a proprietor takes over an existing, or begins operating a new, registrable boarding house.

Council will carry out initial (within the first 12 months) and ongoing inspections in accordance with the Boarding Houses Act 2012 subject to payment of inspection fees as detailed in Council's Fees and Charges schedule.

- The boarding house is to comply with the approved Plan of Management required by this consent.
- The use of the premises as a boarding house must comply always with the following:
 - a) A copy of the Plan of Management and House Rules must be annexed to every tenancy/occupation agreement for a room;
 - b) A copy of the approved Plan of Management and House Rules must be clearly displayed within the common room in the building at all times;
 - c) All tenancy/occupation agreements for rooms within the premises must be for a minimum period of three (3) months;
 - d) The premises must be used exclusively as a boarding house containing a maximum total of **90** residents, with **maximum of two (2)** lodger(s) permitted per double room;
 - e) The premises must not be adapted for use as backpacker's accommodation, serviced apartments or a residential flat building;
 - f) All common rooms/areas and recreation rooms/areas must be maintained at all

- times for the use of the lodgers;
- g) Each self-contained room be fitted out with washing up facilities, a cooktop, microwave oven, fridge and storage space with such utilities being maintained in working order at all times;
 - h) All rooms within the boarding house must be connected to a centralised electricity, water and gas (if installed) service and room tariffs must not include a separate charge for these services; and
 - i) The communal room shall be provided with an oven and cooktop.
- The Plan of Management must be updated to reflect the requirements outlined within this condition.
 - Any proposed amendments to the Management Plan are to be submitted to Council for consideration and approval prior to any amendments being made.
 - If the operator of the boarding house alters from the operator nominated in the Plan of Management, a new Plan of Management is to be submitted to Council within 28 days of the change in operator unless it is confirmed in writing that the new operator will comply with the Plan of Management approved as part of this consent.

(Reason: To ensure the development is the permanent place of residence for occupants and ensure occupants abide by the rules and regulations identified in the Plan of Management.)

3. **CONSTRUCTION HOURS (GC)**

No construction or any other work related activities shall be carried out on the site outside the hours of 7.00 am to 5.00 pm Mondays to Fridays and 8am to 1pm Saturdays.

No building activities are to be carried out at any time on a Sunday or public holiday.

Where the development involves the use of jackhammers/ rock breakers and the like or other heavy machinery, such equipment may only be used between the hours of 7.00 am - 5.00 pm Monday to Friday only.

(Reason: To maintain amenity to adjoining land owners.)

4. **CONSTRUCTION WITHIN BOUNDARIES (GC)**

The development including but not limited to footings, walls, roof barges and guttering must be constructed wholly within the boundary of the premises. No portion of the proposed structure shall encroach onto the adjoining properties. Gates must be installed so they do not open onto any footpath or adjoining land.

(Reason: Approved works are to be contained wholly within the subject site.)

5. **DEMOLITION – GENERALLY (GC)**

Alteration and demolition of the existing building is limited to that documented on the approved plans (by way of notation). No approval is given or implied for removal and/or rebuilding of any portion of the existing building which is not shown to be altered or demolished.

(Reason: To ensure compliance with the approved development.)

6. **DEMOLITION - SITE SAFETY FENCING (GC)**

Site fencing is to be erected to a minimum height of 1.8m complying with WorkCover

Guidelines, to exclude public access to the site, prior to any demolition works occurring and maintained for the duration of the demolition works.

If applicable, a separate Hoarding Application for the erection of an A class (fence type) or B class (overhead type) hoarding/fencing along the street frontage(s) complying with WorkCover requirements must be obtained including:

payment to Council of a footpath occupancy fee based on the area of footpath to be occupied and Council's Schedule of Fees and Charges before the commencement of work; and

provision of a Public Risk Insurance Policy with a minimum cover of \$10 million in relation to the occupation of and works within Council's road reserve, for the full duration of the proposed works, must be obtained with a copy provided to Council.

(Reasons: Statutory requirement and health and safety.)

7. LANDSCAPING - CANOPY TREES IN FRONT SETBACK (GC)

New development shall provide at least two (2) canopy trees within the front setback adjacent the front boundary (existing trees may be included). New canopy trees shall be at least three (3) metres high at the time of planting and capable of reaching a mature height of 10m.

Species shall be selected from Council's Recommended Tree List (Available from Council's website or from the Customer Service Centre). Compliance with this condition is to be demonstrated to the Principal Certifying Authority, prior to the issue of any Occupation Certificate.

(Reason: To ensure the landscape character of the locality is maintained.)

8. LANDSCAPING - IRRIGATION OF COMMON AND PRIVATE LANDSCAPE AREAS (GC)

All common and private landscape areas including all planters of new multi-unit, commercial, mixed-use and industrial development are to have full coverage by a fully automatic irrigation system. The design, materials and installation are to be in accordance with Sydney Water Codes and satisfy all relevant Australian Standards. Details demonstrating compliance shall be submitted to the Principal Certifying Authority, prior occupation of the premises.

(Reason: To ensure appropriate landscape maintenance.)

9. LIGHTING (GC)

Any lighting of the premises shall be installed and maintained in accordance with Australian Standard AS 4282-1997: Control of the Obtrusive Effects of Outdoor Lighting so as to avoid annoyance to the occupants of adjoining premises or glare to motorists on nearby roads.

No flashing, moving or intermittent lighting, visible from any public place may be installed on the premises or external signage associated with the development, without the prior approval of Council.

(Reason: To protect the amenity of surrounding development and protect public safety.)

10. MATERIALS – CONSISTENT WITH SUBMITTED SCHEDULE (GC)

All external materials, finishes and colours are to be consistent with the schedule submitted and approved by Council with the development application.

(Reason: To ensure compliance with this consent.)

11. **PRINCIPAL CERTIFYING AUTHORITY (PCA) IDENTIFICATION SIGN (GC)**

Prior to commencement of any work, signage must be erected in a prominent position on the work site identifying:

- i) the Principal Certifying Authority (PCA) by showing the name, address and telephone number of the PCA;
- ii) the Principal Contractor by showing the Principal Contractor's name, address and telephone number (outside of work hours) for that person; and
- iii) the sign must state that unauthorised entry to the work site is prohibited.

Any such sign is to be maintained while the work is being carried out, but must be removed when the work has been completed.

This clause does not apply to building work, subdivision work or demolition work that is carried out inside an existing building that does not affect the external walls of the building.

(Reason: Statutory requirement.)

12. **SITE MANAGEMENT (DURING DEMOLITION AND CONSTRUCTION WORKS)**

All of the following are to be satisfied/complied with during demolition, construction and any other site works:

- i) All demolition is to be carried out in accordance with Australian Standard AS 2601-2001.
- ii) Demolition must be carried out by a registered demolition contractor.
- iii) A single entrance is permitted to service the site for demolition and construction. The footway and nature strip at the service entrance must be planked out.
- iv) No blasting is to be carried out at any time during construction of the building.
- v) Care must be taken during demolition/ excavation/ building/ construction to prevent any damage to adjoining buildings.
- vi) Adjoining owner property rights and the need for owner's permission must be observed at all times, including the entering onto land for the purpose of undertaking works.
- vii) Any demolition and excess construction materials are to be recycled wherever practicable.
- viii) The disposal of construction and demolition waste must be in accordance with the requirements of the Protection of the Environment Operations Act 1997.
- ix) All waste on the site is to be stored, handled and disposed of in such a manner as to not create air pollution (including odour), offensive noise or pollution of land and/or water as defined by the Protection of the Environment Operations Act 1997. All excavated material should be removed from the site in an approved manner and be disposed of lawfully to a tip or other authorised disposal area.
- x) All waste must be contained entirely within the site.
- xi) Section 143 of the Protection of the Environment Operations Act 1997 requires waste to be transported to a place which can lawfully accept it. All non-recyclable demolition materials are to be disposed of at an approved waste disposal depot in accordance with legislation.
- xii) All materials on site or being delivered to the site are to generally be contained within

- the site. The requirements of the Protection of the Environment Operations Act 1997 must be complied with when placing/stockpiling loose material, disposing of concrete waste, or other activities likely to pollute drains or water courses.
- xiii) Details as to the method and location of disposal of demolition materials (weight dockets, receipts, etc.) should be kept on site as evidence of approved methods of disposal or recycling.
 - xiv) Any materials stored on site must be stored out of view or in such a manner so as not to cause unsightliness when viewed from nearby lands or roadways.
 - xv) Public footways, include nature strips and roadways adjacent to the site must be maintained and cleared of obstructions during construction. No building materials, waste containers or skips may be stored on the road reserve or footpath without prior separate approval from Council, including payment of relevant fees.
 - xvi) Building operations such as brick-cutting, washing tools or paint brushes, and mixing mortar not be performed on the roadway or public footway or any other locations which could lead to the discharge of materials into the stormwater drainage system.
 - xvii) All site waters during excavation and construction must be contained on site in an approved manner to avoid pollutants entering into waterways or Council's stormwater drainage system.
 - xviii) Any work must not prohibit or divert any natural overland flow of water.
 - xix) Toilet facilities for employees must be provided in accordance with WorkCover NSW.
 - xx) Protection pads are to be installed to the kerb and gutter where trucks and vehicles enter the site.

(Reason: To ensure that demolition, building and any other site works are undertaken in accordance with relevant legislation and policy and in a manner which will be non-disruptive to the local area.)

13. **STORMWATER MANAGEMENT PLAN - CERTIFICATION REQUIREMENT (GC)**

A detailed Stormwater Management Plan (SWMP) in line with Council's Stormwater Management Code is to be prepared and certified by a practicing Chartered Professional Engineer on the National Professional Engineer's Register (NPER) at Engineers Australia and submitted to the Principal Certifying Authority and Council, prior to the issue of a Construction Certificate. The SWMP is to be based on the approved development as modified by any conditions of consent.

(Reason: To ensure appropriate provision is made for the disposal and management of stormwater generated by the development, and to ensure public infrastructure in Council's care and control is not overloaded.)

14. **SYDNEY WATER - STAMPED PLANS PRIOR TO COMMENCEMENT (GC)**

The approved plans must be submitted to a Sydney Water Quick Check agent or Customer Centre to determine whether the development will affect Sydney Water's sewer and water mains, stormwater drains and/or easements, and if further requirements need to be met. Plans will be appropriately stamped.

For Quick Check agent details please refer to the web site www.sydneywater.com.au (see Building Developing and Plumbing then Quick Check) or telephone 13 20 92. The consent authority or a Certifying Authority must ensure that a Quick Check agent/Sydney Water has stamped the plans before the commencement of work.

(Reason: Compliance with Sydney Water requirements.)

15. UTILITIES AND SERVICES - PROTECTION OF (GC)

Any footings or excavation to be located or undertaken adjacent to Council's stormwater must be designed to address the following requirements:

- i) all footings and excavation must be located wholly within the site and clear of any easement boundaries;
- ii) all footings and excavation must be located a minimum of 1000mm from the centreline of the pipeline or 500mm from the outside of the pipeline, whichever is the greater distance from the centreline; and
- iii) footings must extend to at least the depth of the invert of the pipeline unless the footings are to be placed on competent bedrock.

If permanent excavation is proposed beneath the overtop of the pipeline, suitable means to protect the excavation and proposed retaining structures from seepage or other water flow from the pipeline and surrounding subsoil, must be provided. The design must be prepared by a qualified practicing Structural/Civil Engineer.

Construction plans must be approved by the appropriate utility's office (e.g. council, Sydney Water Corporation) to demonstrate that the development complies with the utility's requirements.

The applicant must provide written evidence (e.g. compliance certificate, formal advice) of compliance with the requirements of all relevant utility providers (e.g. Water, Energy, Telecommunications, Gas).

(Reason: To ensure protection of Council assets.)

CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF A CONSTRUCTION CERTIFICATE (CC)**16. BOARDING HOUSES - OPERATIONAL PLAN OF MANAGEMENT (OU)**

An Operational Plan of Management is to be formulated and submitted to Council for approval, prior to the issue of any Construction Certificate.

The Plan of Management must include the minimum criteria as stipulated in Schedule 2 (Standards for Places of Shared Accommodation) of the Local Government (General) Regulation, 2005 under the Local Government Act 1993, the Public Health Act, 1991, Boarding Houses Act 2012 and Boarding Houses Regulation 2013.

17. ACCESS - ACCESS FOR PEOPLE WITH DISABILITIES (CC)

Access for people with disabilities must be provided in accordance with the requirements of the Building Code of Australia, relevant Australian Standards and with regard to the Disability Discrimination Act 1992. Access - access for people with disabilities (CC)

Access for people with disabilities must be provided in accordance with the requirements of the Building Code of Australia, relevant Australian Standards and with regard to the Disability Discrimination Act 1992. Plans shall be notated demonstrating compliance and approved by the Principal Certifying Authority, prior to the issue of a Construction Certificate.

Note: Disability (Access to Premises - Buildings) Standards 2010 - As of 1 May 2011, if access is provided to the extent covered by this Standard, then such access cannot be

viewed as unlawful under the Disability Discrimination Act 1992.

(Reason: To provide equitable access for people(s) with disabilities in accordance with the relevant legislation and Australian Standards.)

992. Plans shall be notated demonstrating compliance and approved by the Principal Certifying Authority, prior to the issue of a Construction Certificate.

Note: Disability (Access to Premises - Buildings) Standards 2010 - As of 1 May 2011, if access is provided to the extent covered by this Standard, then such access cannot be viewed as unlawful under the Disability Discrimination Act 1992.

(Reason: To provide equitable access for people(s) with disabilities in accordance with the relevant legislation and Australian Standards.)

18. ACCESS - DISABLED TOILETS (CC)

Plans and details of the disabled toilet/s complying with the relevant Australian Standards, the Building Code of Australia, and with regard to the Disability Discrimination Act 1992. Plans shall be notated demonstrating compliance and approved by the Principal Certifying Authority, prior to the issue of a Construction Certificate.

Note: Disability (Access to Premises - Buildings) Standards 2010 - As of 1 May 2011, if access is provided to the extent covered by this Standard, then such access cannot be viewed as unlawful under the Disability Discrimination Act 1992.

(Reason: To provide equitable access for people(s) with disabilities in accordance with the relevant legislation and Australian Standards.)

19. ACID SULFATE SOILS - DETAILED ASSESSMENT (CC)

A detailed acid sulfate soil assessment is required. This is to be carried out by a suitably qualified person and in accordance with the acid sulfate soils assessment guidelines (ASSMAC August 1998). The detailed assessment is to demonstrate that the site is suitable for the approved development. The detailed assessment shall be submitted to the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: Compliance and Environmental Protection.)

20. ACID SULFATE SOILS - CERTIFICATION OF SOIL REMOVED FROM THE SITE (CC)

A Certificate is to be provided by a suitably qualified geo-technical engineer stating that no more than 1 tonne of soil will be removed from the site and the groundwater table will not be affected by the development. This Statement shall be submitted to Council, prior to the issue of a Construction Certificate.

(Reason: Compliance and environmental protection.)

21. BICYCLE STORAGE PROVISION (CC)

On-site provision for bicycle storage facilities shall be in accordance with the Strathfield Consolidated Development Control Plan 2005. Details demonstrating compliance shall be submitted to the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: Compliance with SCDCP 2005 and to encourage sustainable transport options.)

22. BOARDING HOUSE - CONSTRUCTION OF (CC)

The construction of the boarding house shall comply with all applicable legislation/regulation and standards, including:

- i) Boarding Houses Act 2012;
- ii) Boarding Houses Regulation 2013;
- iii) Local Government Act 1993; and
- iv) Local Government Regulation 2005.

Details demonstrating compliance shall be submitted to the Principal Certifying Authority, prior to occupation of the premises.

(Reason: To ensure compliance with relevant legislation.)

23. BUILDING CODE OF AUSTRALIA - COMPLIANCE WITH (CC)

All architectural drawings, specifications and related documentation shall comply with the Building Code of Australia (BCA). All work must be carried out in accordance with the requirements of the Building Code of Australia (BCA).

In the case of residential building work for which the Home Building Act 1989 requires there to be a contract of insurance in force in accordance with Part 6 of that Act, such a contract of insurance is to be in force before any building work authorised to be carried out by the consent commences.

Details demonstrating compliance with this condition are to be submitted to the Principle Certifying Authority, prior to issue of the Construction Certificate.

(Reason: This is a 'prescribed' condition under clause 98(1) of the Environmental Planning and Assessment Regulation 2000.)

24. CAR PARKING - BASEMENT CAR PARKING REQUIREMENTS (CC)

Details demonstrating compliance with the following is to be submitted to the Principal Certifying Authority, prior to issue of the Construction Certificate:

- i) Minimal internal clearance of the basement is 2.2m in accordance with BCA requirements.
- ii) Driveways shall comply with Australian/New Zealand Standard AS/NZS 2890.1:2004 - Parking facilities - Off-street car parking and achieve a maximum gradient of 1:4.
- iii) Basement entries and ramps/driveways within the property are to be no more than 3.5m wide.
- iv) Provision of pump-out systems and stormwater prevention shall be in accordance with Council's Stormwater Management Guide.

(Reason: To ensure suitable development.)

25. CAR PARKING - DISABLED CAR PARKING SPACES (CC)

One (1) of the car parking spaces provided as part of the total requirement shall be reserved for disabled persons. These spaces shall be a minimum of 2.4m wide x 5.4m long and located near pedestrian access routes designed for disabled persons. Each space shall be clearly marked as such. A shared area 2.4 m wide x 5.4m long shared area should be provided. Bollard shall be placed in this shared area.

Car parking for people with disabilities shall be provided in accordance with the Building Code of Australia, relevant Australian Standards and with regard to the Disability Discrimination Act 1992. Prior to the issue of a Construction Certificate, the plans shall be notated to demonstrate compliance.

The above details shall be submitted to and approved by the Principal Certifying Authority prior to the issue of a Construction Certificate.

(Reason: To ensure adequate parking for persons with a disability.)

26. CAR PARKING – STACKED (CC)

Any stacked parking spaces (maximum 2 spaces, nose to tail) must be attached to the same strata title comprising a single dwelling unit or commercial/retail tenancy, subject to the maximum parking limit applying. The stacked parking spaces must be designated (with appropriate signage) for employee or tenant parking only (not visitor parking). Details in this regard must be reflected in the plan documentation to be lodged with a Construction Certificate application. Manoeuvring of stacked vehicles must occur wholly within the property.

(Reason: Compliance and appropriate allocation of parking.)

27. CAR PARKING - VEHICULAR ACCESS RAMPS (CC)

Vehicular access ramps shall comply with the provisions of AS/NZS 2890.1:2004. Plans to be submitted shall contain the following details:

- i) Longitudinal section along the extreme wheel paths of each driveway/access ramp at a scale of 1:25 demonstrating compliance with the scraping provisions of AS/NZS 2890.1:2004. It shall include all levels and grades, including those levels stipulated as boundary levels, both existing and proposed. It shall extend from the centre-line of the roadway through to the parking area.
- ii) Sections showing the clearance to the underside of any overhead structure (minimum headroom requirements 2200mm minimum for standard headroom clearance or 2400mm where disabled access provisions are to be provided) demonstrating compliance with the provisions of AS/NZS 2890.1:2004.
- iii) Longitudinal section along the gutter line showing how it is intended to transition the vehicular crossing into the existing kerb and gutter. Boundary levels shall generally run parallel with the kerb levels.
- iv) Location of verge trees, street furniture and service installations.
- v) Superimposition of vehicle turning circles for access into parking spaces.
- vi) Certification that the design complies with AS/NZS 2890.1:2004 by a Qualified Engineer.

The certification referred to in (vi) above shall be submitted to the Principal Certifying Authority prior to the issue of a Construction Certificate (for the design) and to the Principal Certifying Authority prior to the issue of any Occupation Certificate for the 'as-built works'.

(Reason: To ensure adequate vehicular access can be achieved.)

28. CAR PARKING - COMPLIANCE WITH AS/NZS 2890.1:2004 (CC)

Car parking dimensions must comply with the Australian/New Zealand Standard AS/NZS 2890.1:2004 - Parking facilities - Off-street car parking. Details demonstrating compliance

are to be submitted to the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: To ensure compliance with Australian Standards relating to parking of vehicles.)

29. CAR PARKING - VEHICULAR CIRCULATION, AISLE AND RAMP WIDTHS (CC)

The aisle widths, internal circulation, ramp widths and grades of the car park shall comply with the Roads and Traffic Authority Guidelines and ASNZS 2890.1:2004 - Off-Street Car Parking Code.

Vehicular manoeuvring paths are to be prepared demonstrating that all vehicles can enter or depart the site in a forward direction without encroaching on required car parking spaces.

(Reason: To ensure compliance with Australian Standards relating to manoeuvring, access and parking of vehicles.)

30. COMMENCEMENT OF WORKS (NO WORKS UNTIL A CC IS OBTAINED)

Building work, demolition or excavation must not be carried out until a Construction Certificate has been issued by either Strathfield Council or a Principal Certifying Authority.

Demolition of any part of a building triggers 'commencement of erection of building' pursuant of section 4.19 of the EP&A Act 1979. Accordingly, demolition works must not commence until a Construction Certificate has been issued, a Principal Certifying Authority has been appointed and a Notice of Commencement has been issued.

(Reason: To ensure compliance with statutory provisions.)

31. CONSTRUCTION AND ENVIRONMENTAL MANAGEMENT PLAN (CC)

The applicant must prepare and submit a Construction and Environmental Management Plan (CEMP) to the Principal Certifying Authority, including:

- i) Detailed information on any approvals required from other authorities prior to or during construction.
- ii) Traffic management, including details of:
 - ingress and egress of vehicles to the site;
 - management of loading and unloading of materials;
 - the location of heavy vehicle parking off-site; and
 - designated routes for vehicles to the site.
- iii) The proposed areas within the site to be used for a builder's site office and amenities, the storage of excavated material, construction materials and waste containers during the construction period.
- iv) Erosion and sediment control, detailing measures and procedures consistent with the requirements of Council's guidelines for managing stormwater, including:
 - the collection and treatment of stormwater and wastewater generated on site prior to discharge; and
 - procedures to prevent run-off of solid material and waste from the site.
- v) Waste management, including:
 - details of the types and estimated volumes of waste materials that will be generated;
 - procedures for maximising reuse and recycling of construction materials; and
 - details of the off-site disposal or recycling facilities for construction waste.
- vi) Dust control, outlining measures to minimise the generation and off-site transmission

- of dust and fine particles, such as watering or damp cloth fences.
- vii) A soil and water management plan, which includes:
- measures to minimise the area of soils exposed at any one time and conserve top soil;
 - identification and protection of proposed stockpile locations;
 - preservation of existing vegetation and revegetation;
 - measures to prevent soil, sand, sediments leaving the site in an uncontrolled manner;
 - measures to control surface water flows through the site in a manner that diverts clean run-off around disturbed areas, minimises slope gradient and flow distance within disturbed areas, ensures surface run-off occurs at non-erodible velocities, and ensures disturbed areas are promptly rehabilitated;
 - details of sediment and erosion control measures in place before work commences;
 - measures to ensure materials are not tracked onto the road by vehicles entering or leaving the site; and
 - details of drainage to protect and drain the site during works.
- viii) Asbestos management procedures:
- Anyone who removes, repairs or disturbs bonded or a friable asbestos material must hold a current removal licence from Workcover NSW holding either a Friable (Class A) or a Non- Friable (Class B) Asbestos Removal License which ever applies and a current WorkCover Demolition License where works involve demolition. To find a licensed asbestos removalist please see www.workcover.nsw.gov.au
 - Removal of asbestos by a person who does not hold a Class A or Class B asbestos removal license is permitted if the asbestos being removed is 10m² or less of non-friable asbestos (approximately the size of a small bathroom). Friable asbestos materials must only be removed by a person who holds a current Class A asbestos license.
 - Before starting work, a work site-specific permit approving each asbestos project must be obtained from Workcover NSW. A permit will not be granted without a current Workcover licence. All removal, repair or disturbance of or to asbestos material must comply with the following:
 - The Work Health and Safety Act 2011;
 - The Work Health and Safety Regulation 2011;
 - How to Safety Remove Asbestos Code of Practice – WorkCover 2011; and
 - Safe Work Australia Code of Practice for the Management and Control of Asbestos in the Workplace.
 - Following completion of asbestos removal works undertaken by a licensed asbestos removalist re-occupation of a workplace must not occur until an independent and suitably licensed asbestos removalist undertakes a clearance inspection and issues a clearance certificate.
 - The developer or demolition contractor must notify adjoining residents at least two (2) working days (i.e. Monday to Friday exclusive of public holidays) prior to the commencement of asbestos removal works. Notification is to include, at a minimum:
 - the date and time when asbestos removal works will commence;
 - the name, address and business hours contact telephone number of the demolisher, contractor and/or developer;
 - the full name and license number of the asbestos removalist/s; and
 - the telephone number of WorkCover's Hotline 13 10 50
 - warning signs informing all people nearby that asbestos removal work is taking place in the area. Signs should be placed at all of the main entry points to the asbestos removal work area where asbestos is present. These signs should be weatherproof, constructed of light-weight material and

adequately secured so they remain in prominent locations. The signs should be in accordance with AS 1319-1994 Safety signs for the occupational environment for size, illumination, location and maintenance; and

- appropriate barricades installed as appropriate to prevent public access and prevent the escape of asbestos fibres. Barricades must be installed prior to the commencement of asbestos removal works and remain in place until works are completed.

(Reason: Safety, amenity and protection of public infrastructure and the environment.)

32. **COUNCIL PERMITS – FOR ALL ACTIVITIES ON COUNCIL LAND (CC)**

Works Permit

(as per Section 68 of the Local Government Act 1993 and Section 138 and 139 of the Roads Act 1993)

A Works Permit is required for construction of a vehicular crossing (driveway), new stormwater down pipe connection to kerb and gutter, new footpath and/or stormwater connection. A Works Permit Application Form is available from Council's Customer Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website.

Standing Plant Permit

This permit must be applied for where it is intended to park a concrete pump, crane or other plant on the roadway or footpath. A Standing Plant Permit Application Form is available from Council's Customer Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website. Please note a Road Closure Permit is not required for standing plant.

Skip Bin Permit

This permit must be applied for if you intend to place a skip bin on the roadway or footpath. A Skip Bin Application Form is available from Council's Customer Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website.

Temporary Full or Part Road Closure Permit

This permit must be applied for if you require a full or a part road closure to take place to assist in your construction works. Please use the Works Permit Application Form, which is available from Council's Customer Service Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website. Please note a Road Closure Permit is not required for standing plant.

Hoarding/Fencing Permit

This permit must be applied for if you intend to erect a Class A (fence type) or Class B (overhead type) hoarding/fencing along the street frontage(s). A Hoarding Permit Application Form is available from Council's Customer Service Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website.

Work Zone Permit

This permit must be applied for if you require permanent parking along the kerbside at the front of the site during construction works. A Work Zone Permit Application Form is available from Council's Customer Service Centre or can be downloaded from Council's website. The applicable fees and charges are located on Council's website.

Ground Anchoring Permit

This permit must be applied for, for the installation of ground anchors under Council's footway/road reserve. It does not cover ground anchors under private properties. A separate approval is required to be obtained from Roads and Maritime Services (RMS) if it is proposed to install ground anchors under a State or Classified Regional Road (please refer to the end of this application form for more information).

(Reason: Council requirement)

33. DRIVEWAY WIDTH - MULTI-UNIT DEVELOPMENT (CC)

The internal driveway must be a minimum 5.50m wide (clear width) for the first 6 metres inside the property so as to allow entering & exiting vehicles to pass within the site. Should the driveway narrow after this point it is then to be designed with a minimum 1.5m x 1.5m splay to allow the passing to work. Details demonstrating compliance shall be submitted to the Principal Certifying Authority, prior the issue of a Construction Certificate.

(Reason: Safety and traffic management.)

34. EROSION AND SEDIMENTATION CONTROL PLAN (CC)

An Erosion and Sediment Control Plan is to be prepared where construction or excavation activity requires the disturbance of the soil surface and existing vegetation. Details including drawings and specifications must provide adequate measures for erosion and sediment control to ensure:

- i) Compliance with the approved Soil and Water Management Plan.
- ii) Removal or disturbance of vegetation and top soil is confined to within 3m of the approved building area (no trees to be removed without approval).
- iii) All uncontaminated run-off is diverted around cleared or disturbed areas.
- iv) Silt fences or other devices are installed to prevent sediment and other debris escaping from the cleared or disturbed areas into drainage systems or waterways.
- v) All erosion and sediment controls are fully maintained for the duration of demolition/development works.
- vi) Controls are put into place to prevent tracking of sediment by vehicles onto adjoining roadways.
- vii) All disturbed areas are rendered erosion-resistant by turfing, mulching, paving or similar.
- viii) All water pumped or otherwise removed from excavations or basement areas is filtered to achieve suspended solids/non filterable residue levels complying with the Australian Water Quality guidelines for Fresh and Marine Waters.
- ix) Pumped or overland flows of water are discharged so as not to cause, permit or allow erosion before the commencement of work (and until issue of the occupation certificate).

Details of the proposed soil erosion and sedimentation controls are to be submitted to the Principal Certifying Authority with the Construction Certificate Application. Under no circumstances are any works to commence, prior to these details being approved by the Principal Certifying Authority and the controls being in place on the site.

(Reason: Environmental protection.)

35. EXCAVATION - AFFECTING ADJOINING LAND (CC)

If an excavation associated with the approved development extends below the level of the base of the footings of a building on an adjoining allotment of land, the person having the benefit of the development consent must, at the person's own expense, comply with the

requirements of clause 98E of the Environmental Planning and Assessment Regulation 2000, including:

- i) protect and support the adjoining premises from possible damage from the excavation, and
- ii) where necessary, underpin the adjoining premises to prevent any such damage.

The condition referred to in subclause (i) does not apply if the person having the benefit of the development consent owns the adjoining land or the owner of the adjoining land has given consent in writing to that condition not applying. Details shall be submitted to the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: Structural safety.)

36. EXCAVATION – SHORING (CC)

Where any shoring for excavation is to be located on or is supporting Council's property, or any adjoining private property, engineering drawings and specifications certifying the shoring will be adequate for their intended purpose and must be submitted to the Council/Principal Certifying Authority for approval with the Construction Certificate. The documentation prepared and certified by an appropriately qualified and practicing structural engineer is to show all details, including the extent of encroachment and the method of removal and de-stressing of shoring elements. A copy of this documentation must be provided to the Council for record purposes at the time of Construction Certificate application.

(Reason: To ensure the protection of existing public infrastructure and adjoining properties.)

37. FIRE SAFETY SCHEDULE (CC)

A Fire Safety Schedule specifying the fire safety measures (both current and proposed) which should be implemented in the building premises must be submitted with the Construction Certificate application, in accordance with Part 9 of Clause 168 of the Environmental Planning and Assessment Regulation 2000.

Note: A Construction Certificate cannot be issued until a Fire Safety Schedule is received.

(Reason: Compliance with the Environmental Planning and Assessment Act 1979.)

38. HAZARDOUS GOODS AND WASTE (CC)

Dangerous and hazardous goods shall be stored in accordance with NSW WorkCover requirements and AS1940-2004 - The Storage and Handling of Flammable and Combustible Liquids.

Hazardous waste must be contained, managed and disposed of in a responsible manner in accordance with the Protection of Environment and Operations Act 1997, NSW Environment Protection Authority (EPA) and the New South Wales WorkCover Authority.

Material Safety Data Sheets of all hazardous substances used, such as bleaches and nail products must be kept on site and readily available to all staff. Staff must be trained how to safely use and store these chemicals prior to the commencement of work.

Details demonstrating compliance with the requirements of this condition are to be submitted to the satisfaction of the Principal Certifying Authority prior to the issue of any Construction Certificate.

(Reason: Health and safety.)

39. **LANDSCAPING - MAINTENANCE STRATEGY (CC)**

To ensure the survival of landscaping following works, a landscape maintenance strategy for the owner/occupier to administer over a 12 month establishment period following the issue of the Occupation Certificate shall be prepared and provided to the satisfaction of the Principal Certifying Authority with the Construction Certificate application. The strategy is to address maintenance issues such as, but not limited to plant survival, irrigation, soil testing, weeding, staking, fertilizing, remedial pruning and plant replacement.

(Reason: Ensure landscape survival.)

40. **LANDSCAPING ON SLAB (CC)**

To ensure the site landscaping thrives, the on slab landscaping shown on the approved landscaping plan is to be designed to include a minimum soil depth of 650mm for shrubs and trees; and 300mm for grass and ground covers. Adequate drainage provision and a permanent, automatic irrigation system conforming to Sydney Water requirements shall be included. Details demonstrating compliance shall be submitted to the Principal Certifying Authority with the Construction Certificate application.

(Reason: Ensure landscape survival.)

41. **PRIVACY - OBSCURE GLAZING IN WET AREAS (CC)**

All bathroom, ensuite and toilet windows shall be installed with obscure glazing. Plans shall be notated accordingly and details demonstrating compliance submitted to the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: Privacy amenity.)

42. **SECTION 7.11 CONTRIBUTION PAYMENT - DIRECT CONTRIBUTIONS PLAN (CC)**

In accordance with the provisions of Section 7.13 of the Environmental Planning and Assessment Act 1979 and the Strathfield Direct Development Contributions Plan 2010-2030, a contribution in the form of cash, cheque or credit card (financial transaction fee applies) shall be paid to Council for the following purposes:

Provision of Community Facilities	\$71,300.55
Provision of Major Open Space	\$324,396.15
Provision of Local Open Space	\$137,221.54
Provision Roads and Traffic Management	\$25,464.41
Administration	\$6,148.07
TOTAL	\$564,530.72

The total amount of the contribution is valid as at the date of determination and is subject to quarterly indexation. Contributions shall be indexed at the time of payment in accordance with clause 2.14 of the Strathfield Direct Development Contributions Plan 2010-2030.

Contributions must be receipted by Council and submitted to the Accredited Certifier, prior to the issue of any Construction Certificate.

Please present a copy of this condition when paying the contribution at the Customer Service Centre so that it can be recalculated.

Note: A copy of Strathfield Council's Section 7.11 Direct Development Contributions Plan may be downloaded from Council's website.

(Reason: To enable the provision of public amenities and services required/anticipated as a consequence of increased demand resulting from the development.)

43. **STORMWATER DRAINAGE (CC)**

The following stormwater precautions are required to be provided on the site:

- i) Grated drains shall be provided along the driveway/basement entry at the vehicular crossing(s) and are to connect to the internal drainage system.
- ii) Overflow paths shall be provided to allow for flows in excess of the capacity of the pipe/drainage system draining the site.
- iii) Allowance shall be made for surface runoff from adjacent properties, and to retain existing surface flow path systems through the site. Any redirection or treatment of these flows shall not adversely affect any other properties
- iv) Boundary fencing shall be erected in such a manner as not to interfere with the natural flow of ground and surface water to the detriment of any other party.

(Reason: To ensure the site is drained appropriately and does not interfere with the natural flow of flood waters.)

44. **TRAFFIC - CONSTRUCTION TRAFFIC MANAGEMENT PLAN (CC)**

A Construction Traffic Management Plan (CTMP) is to be prepared by an appropriately qualified Traffic Management Consultant and submitted to and approved by Council's Engineering Section, prior to the commencement of any works including demolition.

The following matters should be addressed in the CTMP (where applicable):

- i) description of the demolition, excavation and construction works;
- ii) site plan/s showing the site, roads, footpaths, site access points and vehicular movements;
- iii) size, type and estimated number of vehicular movements (including removal of excavated materials, delivery of materials and concrete to the site);
- iv) proposed route(s) from the arterial (state) road network to the site and the proposed route from the site back to the arterial road network;
- v) impacts of the work and vehicular movements on the road network, traffic and pedestrians and proposed methods to safely manage pedestrians and construction related vehicles in the frontage roadways;
- vi) any Traffic Control Plans (TCP's) proposed to regulate traffic and pedestrian movements for construction activities (such as concrete pours, crane installation/removal etc.);
- vii) proposed hours of construction related activities and vehicular movements to and from the site;
- viii) current/proposed approvals from other Agencies and Authorities (including Roads and Maritime Services, Police and State Transit Authority);
- ix) any activities proposed to be located or impact upon Council's road, footways or any public place;
- x) measures to maintain public safety and convenience;
- xi) any proposed road and/or footpath closures;
- xii) turning areas within the site for construction and spoil removal vehicles, allowing a forward egress for all construction vehicles on the site;

- xiii) locations of work zones (where it is not possible for loading/unloading to occur on the site) in the frontage roadways accompanied by supporting documentation that such work zones have been approved by the Local Traffic Committee and Council;
- xiv) location of any proposed crane and concrete pump and truck standing areas on and off the site (and relevant approvals from Council for plant on road);
- xv) a dedicated unloading and loading point within the site for all construction vehicles, plant and deliveries;
- xvi) material, plant and spoil bin storage areas within the site, where all materials are to be dropped off and collected;
- xvii) on-site parking area for employees, tradespersons and construction vehicles as far as possible;
- xviii) proposed areas within the site to be used for the storage of excavated material, construction materials and waste and recycling containers during the construction period; and
- xix) how it is proposed to ensure that soil/excavated material is not transported onto surrounding footpaths and roadways.

(Reason: To mitigate traffic impacts on the surrounding area during the construction period.)

45. UTILITIES AND TELECOMMUNICATIONS - TELECOMMUNICATIONS ASSETS (CC)

Provision must be made for relocation of telecommunications network assets including underground placement of any existing aerial cables and infrastructure. Any costs associated with the relocation of the above are at the requestor's expense. Any disturbance to public land as a result of the undergrounding of services shall be restored at no cost to Council.

Details are to be submitted to the Principal Certifying Authority with the Construction Certificate application.

(Reason: To ensure suitable relocation of telecommunications infrastructure if required.)

46. VEHICULAR CROSSINGS - WORKS PERMIT FOR CONSTRUCTION OF (CC)

Full-width, heavy-duty concrete vehicular crossing(s) shall be provided across the footpath at the entrance(s) and/or exit(s) to the site and designed in accordance with Council's guidelines and specifications. In this regard, a Works Permit is to be obtained (available from Council's Customer Services Centre or downloaded from Council's website), and the appropriate fees and charges paid, prior to the lodgement of a Construction Certificate.

(Reason: To ensure appropriate access to the site can be achieved.)

requirements/standards.)

47. WASTE MANAGEMENT PLAN (CC)

A Waste Management Plan (WMP) is to be provided in accordance with Part H of Strathfield Consolidated Development Control Plan 2005. All requirements of the approved Waste Management Plan must be implemented during demolition, construction and on-going use of the premises.

The WMP must identify the types of waste that will be generated, all proposals to re-use, recycle or dispose of the waste and designs of the waste storage and collection areas. The WMP is to be submitted to council for comment prior to approval by the Principal Certifying Authority, approval must be provided prior to the issuing of the Construction Certificate.

Full compliance must be given to the endorsed Waste Management Plan submitted for the proposed development. Copies of any weighbridge receipts from all approved waste disposal facilities shall be retained for presentation to the Principal Certifying Authority upon request.

NOTE: The property must be inspected by a Council Waste Officer prior to the issue of an Occupation Certificate so as to ensure that the correct number of general waste and recycling bins are ordered from Strathfield Council.

(Reason: To ensure appropriate management of waste.)

48. **WASTE - GARBAGE ROOMS OR GREASE ARRESTOR ROOMS (CC)**

Garbage rooms or grease arrester rooms must be constructed of solid material: cement rendered and steel trowelled to a smooth even surface. The door to the garbage room is to be designed and constructed to ensure the room is vermin proof and can be opened from the inside at all times. The garbage room is to be ventilated to the external air by natural ventilation or an approved air handling exhaust system.

(Reason: To keep garbage rooms in a clean and sanitary condition to protect public health.)

49. **WATER HEATING SYSTEMS - LOCATION OF (CC)**

Water heating systems shall be located so as not to be visible from public places and the ground level of adjoining properties. Details (type and location) of the water heaters shall be submitted to and approved by the Principal Certifying Authority, prior to the issue of a Construction Certificate.

(Reason: To maintain streetscape character.)

50. **WORKS ZONE - APPROVAL BY COUNCIL'S TRAFFIC COMMITTEE (CC)**

An application for a 'Works Zone' must be submitted to and approved by the Strathfield Council Traffic Committee prior to the commencement of any site work (including demolition).

The suitability of the proposed length and duration of the Works Zone is to be demonstrated in the application for the Works Zone. The application for the Works Zone must be submitted to Council at least six (6) weeks prior to the commencement of work on the site to allow for assessment and tabling of agenda for the Strathfield Council Traffic Committee.

The requirement for a Works Zone may be varied or waived only if it can be demonstrated in the Construction Traffic Management Plan (to the satisfaction of Council) that all construction related activities (including all loading and unloading operations) can and will be undertaken wholly within the site. The written approval of Council must be obtained to provide a Works Zone or to waive the requirement to provide a Works Zone prior to the commencement of any site work.

(Reason: Council requirement.)

CONDITIONS TO BE SATISFIED PRIOR TO THE COMMENCEMENT OF WORKS (CW)**51. APPOINTMENT OF A PRINCIPAL CERTIFYING AUTHORITY (PCA) (CW)**

No work shall commence in connection with this Development Consent until:

- i) A construction certificate for the building work has been issued by the consent authority or a Principal Certifying Authority.
- ii) The person having the benefit of the development consent has appointed a principal certifying authority for the building work, and notified the principal certifying authority that the person will carry out the building work as an owner/builder, if that is the case.
- iii) The principal certifying authority has, no later than 2 days before the building work commences:
 - notified the Council of his or her appointment, and
 - notified the person having the benefit of the development consent of any critical stage inspections and other inspections that are to be carried out in respect of the building work.
- iv) The person having the benefit of the development consent, if not carrying out the work as an owner-builder, has:
 - appointed a principal contractor for the building work who must be the holder of a contractor licence if any residential building work is involved;
 - notified the principal certifying authority of such appointment; and
 - unless that person is the principal contractor, notified the principal contractor of any critical stage inspections and other inspections that are to be carried out in respect of the building work.
- v) The person having the benefit of the development consent has given at least 2 days notice to the Council of the person's intention to commence the erection of the building.

Note: If the principal certifying authority is the Council, the nomination will be subject to the payment of a fee for the service to cover the cost of undertaking all necessary inspections and the issue of the appropriate certificates.

Under the Environment Planning and Assessment (Quality of Construction) Act, 2003, a sign must be erected in a prominent position on the work site showing the name, address and telephone number of the principal certifying authority; the name of the principal contractor (if any) for the building work and a telephone number at which that person may be contacted outside working hours. That sign must also state that unauthorised entry is prohibited. The sign must not be removed until all work has been completed.

(Reason: Statutory requirement.)

52. NOTICE OF COMMENCEMENT (CW)

No work shall commence until the following details are submitted to Council:

- i) a Notice of Commencement (form will be attached with issue of a Construction Certificate or available from our website) within two (2) days of the date on which it is proposed to commence works associated with the Development Consent;
- ii) details of the appointment of a Principal Certifying Authority (either Council or another Principal Certifying Authority); and
- iii) details of the name, address and licence details of the Builder.

(Reason: Statutory requirement.)

CONDITIONS TO BE SATISFIED DURING DEMOLITION AND BUILDING WORKS (DW)

53. CONTAMINATED LAND UNEXPECTED FINDS (DW)

In the instance works cause the generation of odours or uncovering of unexpected contaminants works are to immediately cease, Council is to be notified and a suitably qualified environmental scientist appointed to further assess the site.

The contaminated land situation is to be evaluated by the supervising environmental consultant and an appropriate response determined in consultation with the applicant, which is agreed to by Strathfield Council's Environmental Services Manager.

Note: Council may also request that a NSW EPA accredited site auditor is involved to assist with the assessment of the contaminated land situation and review any new contamination information. The applicant must also adhere to any additional conditions which may be imposed by the accredited site auditor.

(Reason: To ensure compliance with statutory requirements.)

54. FILL MATERIAL (DW)

The only waste derived material which may be received at the development site is:

- i) Virgin excavated material (within the meaning of the Protection of the Environment Operations Act 1997), and
- ii) any other waste-derived material the subject of a resource recovery exemption under cl.51A of the Protection of the Environment Operations (Waste) Regulation 2005 that is permitted to be used as fill material.

Any (b)-type material received at the development site must be accompanied by documentation certifying by an appropriately qualified environmental consultant the materials compliance with the exemption conditions; and this documentation must be provided to the Principal Certifying Authority on request.

(Reason: To ensure imported fill is of an acceptable standard for environmental protection purposes.)

55. OBSTRUCTION OF PUBLIC WAY NOT PERMITTED DURING WORKS (DW)

The public way must not be obstructed by any materials, vehicles, refuse, skips or the like, under any circumstances, without the prior approval of Council.

(Reason: To maintain public access and safety.)

56. PUBLIC INFRASTRUCTURE AND SERVICES (DW)

The applicant must comply with the requirements (including financial costs) of any relevant utility provider (e.g. Energy Australia, Sydney Water, Telstra, RMS, Council etc.) in relation to any connections, works, repairs, relocation, replacements and/or adjustments to public infrastructure or services affected by the development.

(Reason: To maintain public infrastructure and/or services.)

57. SITE REQUIREMENTS DURING DEMOLITION AND CONSTRUCTION

All of the following are to be satisfied/complied with during demolition, construction and any

other site works:

- i) All demolition is to be carried out in accordance with Australian Standards AS 2601-2001.
- ii) Demolition must be carried out by a registered demolition contractor.
- iii) A single entrance is permitted to service the site for demolition and construction. The footway and nature strip at the service entrance must be planked out with close boarded, hardwood timber footpath protection pads. The pad shall cover the entire width of the footpath opening for the full width of the fence.
- iv) No blasting is to be carried out at any time during construction of the building.
- v) Care must be taken during demolition/ excavation/ building/ construction to prevent any damage to adjoining buildings.
- vi) Adjoining owner property rights and the need for owner's permission must be observed at all times, including the entering onto land for the purpose of undertaking works.
- vii) Any demolition and excess construction materials are to be recycled wherever practicable.
- viii) The disposal of construction and demolition waste must be in accordance with the requirements of the Protection of the Environment Operations Act 1997.
- ix) All waste on the site is to be stored, handled and disposed of in such a manner as to not create air pollution (including odour), offensive noise or pollution of land and/or water as defined by the Protection of the Environment Operations Act 1997.
- x) All excavated material should be removed from the site in the approved manner and be disposed of lawfully to a tip or other authorised disposal area.
- xi) Section 143 of the Protection of the Environment Operations Act 1997 requires waste to be transported to a place which can lawfully accept it. All non-recyclable demolition materials are to be disposed of at an approved waste disposal depot in accordance with legislation.
- xii) All materials on site or being delivered to the site are to generally be contained within the site. The requirements of the Protection of the Environment Operations Act 1997 must be complied with when placing/stockpiling loose material, disposing of concrete waste, or other activities likely to pollute drains or water courses.
- xiii) Details as to the method and location of disposal of demolition materials (weight dockets, receipts etc.) should be kept on site as evidence of approved methods of disposal and recycling.
- xiv) Any materials stored on site must be stored out of view or in such a manner so as not to cause unsightliness when viewed from nearby lands or roadways.
- xv) Public footways and roadways adjacent to the site must be fully maintained and cleared of obstructions during construction unless prior separate approval from Council is obtained including payment of relevant fees.
- xvi) Building operations such as brick cutting, washing tools or paint brushes, and mixing mortar not be performed on the roadway or public footway or any other locations which could lead to the discharge of materials into the stormwater drainage system.
- xvii) All site waters during excavation and construction must be contained on site in an approved manner to avoid pollutants entering into waterways or Council's stormwater drainage system.
- xviii) Stamped plans, specifications, documentation and the consent shall be available on site at all times during construction.
- xvii) All protected trees are to be managed in accordance with Australian Standard AS4970 - 2009 , Protection of Trees on Development Sites.

(Reason: To ensure that demolition, building and any other site works are undertaken in accordance with relevant legislation and policy and in a manner which will be non-disruptive to the local area.)

CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF AN OCCUPATION CERTIFICATE (OC)**58. DRAINAGE SYSTEM - MAINTENANCE OF EXISTING SYSTEM (OC)**

Where elements of the existing drainage system are to be utilised, the existing drainage system shall be overhauled and maintained clear of silt and accumulated debris. Silt and the like shall be removed, not flushed from the system.

A certificate shall be provided by a suitably qualified person (a registered plumber or a person of equivalent or greater experience or qualification) to the satisfaction of the Principal Certifying Authority, prior to the issue of any Occupation Certificate to confirm that the system is in good working order and adequate to accept additional flows having regard to any relevant standards and/or Sydney Water requirements.

(Reason: Maintenance and environment.)

59. ENGINEERING WORKS (CERTIFICATION OF)

Prior to occupation of the premises, a Work As Executed (WAE) Plan of all engineering and/or drainage works is to be submitted to the Principal Certifying Authority. The WAE Plan is to be certified by a suitably Qualified Engineer, with Corporate Membership standing in the Institution of Engineers Australia and registered on the National Professional Engineers Register (NPER) under the appropriate professional category, demonstrating that:

- i) the stormwater drainage system; and/or
- ii) the car parking arrangement and area; and/or
- iii) any related footpath crossing works; and/or
- iv) the proposed basement pump and well system; and/or
- v) the proposed driveway and layback; and/or
- vi) any other civil works

have been constructed in accordance with the approved plans and any relevant Standards and Council policies/specifications.

For major works, such as subdivisions, works within the road reserve (requiring separate S138 approval) and as where specified by Council, a Part 4A Certificate will be required. It is strongly recommended that an Engineer supervise all engineering related works.

Where Council is not the Principal Certifying Authority, an electronic copy of the above documents is to be provided to Council, prior to the issue of any Occupation Certificate.

(Reason: Asset management.)

60. FIRE SAFETY CERTIFICATION (OC)

A fire safety certificate shall be obtained in accordance with Part 9, Division 4 of the Environmental Planning and Assessment Regulation 2000, prior to the issue of any Occupation Certificate.

An fire safety certificate is a certificate issued by the owner of a building to the effect that each essential fire safety measure specified in the current fire safety schedule for the part of the building to which the certificate relates:

- i) has been assessed by a properly qualified person; and

- ii) was found, when it was assessed, to be capable of performing to at least the standard required by the current fire safety schedule for the building for which the certificate is issued.

An interim fire safety certificate must be provided before an interim occupation certificate can be used for a building under Clause 153(2) of the Environmental Planning & Assessment Regulation 2000.

A final fire safety certificate must be provided before an interim occupation certificate can be used for a building under Clause 153(1) of the Environmental Planning & Assessment Regulation 2000.

A copy of the fire safety certificate and fire safety schedule shall be:

- i) submitted to Strathfield Council;
- ii) submitted to the Commissioner of the New South Wales Fire Brigade; and
- iii) prominently displayed in the building.

(Reason: Fire safety and statutory requirement.)

61. **OCCUPATION OF BUILDING (OC)**

A person must not commence occupation or use (or change of use where an existing building) of the whole or any part of a new building (within the meaning of section 109H (4) of the Act) unless an Interim Occupation Certificate or Final Occupation Certificate has been issued in relation to the building or part.

The Principal Certifying Authority is required to be satisfied, amongst other things, that:

- i) all required inspections (including each applicable mandatory critical stage inspection) have been carried out; and
- ii) any preconditions to the issue of the certificate required by a development consent have been met.

Note: New building includes an altered portion of, or an extension to, an existing building.

(Reason: Statutory requirement.)

62. **STORMWATER - CERTIFICATION OF THE CONSTRUCTED DRAINAGE SYSTEM (OC)**

The constructed stormwater system shall be certified by a suitably qualified person, in accordance with Council's Stormwater Management Code, prior to the issue of any Occupation Certificate.

(Reason: Adequate stormwater management.)

63. **STORMWATER - COVENANT AND RESTRICTION AS TO USER FOR STORMWATER CONTROLLED SYSTEMS (OC)**

Prior to the issue of any Occupation Certificate, the applicant shall register a Positive Covenant and a Restriction as to User under section 88E and or section 88B of the Conveyancing Act as appropriate in favour of Council, ensuring the ongoing retention, maintenance and operation of the stormwater facility (on-site detention, pump-out, charged lines, etc.).

Where any drainage line or service conduit is to traverse any property other than that which

it serves, an appropriate easement will be required. In this case, the applicant shall register an easement no less than 1200mm wide over the proposed drainage line or service concurrently with any subdivision registration.

The wording on the 88E and/or the 88B Instrument is to make reference to the Council file where the Construction plans and the Work As Executed (as built), plans are held. Typical wording can be obtained from Council's Specification for the Management of Stormwater document.

(Reason: To ensure the on-site detention and/or pump system is maintained to an appropriate operational standard.)

CONDITIONS TO BE SATISFIED DURING ONGOING USE OF THE PREMISES (OU)

64. BOARDING HOUSES - OPERATIONAL PLAN OF MANAGEMENT (OU)

The Plan of Management shall be displayed in prominent locations within the premises and a copy of the Plan shall be provided to all residents of the boarding house. The on-site Caretaker shall be responsible for ensuring that the terms of the Plan are adhered to at all times.

This Operational Plan of Management must incorporate the following:

- i) All the measures to be implemented on the premises in terms of safety & security, amenity and health including but not limited to matters relating to curfews and after-hours access, bringing of visitors on to the site, drug and alcohol policy (including smoking), and use of communal areas etc.
- ii) All the responsibilities of the Caretaker/Manager.
- iii) An Incident Register to be maintained by the Caretaker. This Register must be produced upon demand by any Council officer or NSW Police Officer. The Register must contain a direction that all incidents of a criminal nature are to be reported to the Police immediately.
- iv) Prior to commencement of the boarding house use, a notification letter shall be forwarded to Council, the Police and neighbours providing contact details for the Caretaker/Manager so that any issues regarding the operation of the premises etc. can be addressed promptly. Evidence of this letter being forwarded as required in this condition shall be provided to the Principal Certifying Authority, prior to the issue of any Occupation Certificate and commencement of the use.

The Plan of Management referred to in this condition shall be reviewed by Council annually from the date of issue of an Occupation Certificate by the Principal Certifying Authority. The operator of the boarding house shall contact Council annually to carry out this review and the review shall include the Incident Register referred to in point (iii) above. Should amendments be made to the Plan of Management an updated version of same shall be provided to Council and the residents of the boarding house within one (1) month of the annual review being completed.

(Reason: To minimise the impact of the use on surrounding residences.)

65. BOARDING HOUSE - ONGOING USE OF (OU)

Ongoing operation of the approved use for the purpose of a boarding house shall comply with the following:

- i) Use of the premises shall remain consistent with the definition of 'boarding house' as defined under Strathfield Local Environmental Plan 2012 as a building that:

- is wholly or partly let in lodgings, and
 - provides lodgers with a principal place of residence for 3 months or more, and
 - may have shared facilities, such as a communal living room, bathroom, kitchen or laundry, and
 - has rooms, some or all of which may have private kitchen and bathroom facilities, that accommodate one or more lodgers but does not include backpackers" accommodation, a group home, a serviced apartment, seniors housing or hotel or motel accommodation.
- ii) Subdivision of the approved boarding house under strata or community title is prohibited.
- iii) The use and operation of the boarding house shall comply with all applicable legislation/regulation and standards, including:
- Boarding Houses Act 2012;
 - Boarding Houses Regulation 2013;
 - Local Government Act 1993; and
 - Schedule 2 (Standards for Places of Shared Accommodation) of the Local Government (General) Regulation 2005.
- iv) The maximum number of persons accommodated in a bedroom, or in a cubicle of a dormitory, must not exceed the number determined by allowing a minimum floor area within the bedroom or cubicle in accordance with the relevant provisions under the Public Health Act 1991 for each person.
- v) No speakers or music is permitted outdoors or in the communal areas
- vi) The Boarding house is required to be registered on a register administered by NSW Fair Trading

(Reason: To minimise the impact of the boarding house on surrounding residences.)

66. FIRE SAFETY ANNUAL STATEMENT (OU)

Pursuant to Part 9, Division 5 of the Environmental Planning and Assessment Regulation (as amended) the owner of the building shall provide to Council an Annual Fire Safety Statement from an appropriately qualified person certifying the essential fire safety measures in the building. The Annual Fire Safety Statement shall be submitted within 12 months of the issue of the fire safety certificate, and then on an annual basis.

A copy of the Fire Safety Statement obtained and Fire Safety Schedule shall also be:

- i) Forwarded to the Commissioner of the New South Wales Fire Brigade; and
- ii) Prominently displayed in the building.

(Reason: Fire safety)

RESOLUTION

This application is **REFUSED** for the following reasons:

1. The proposal fails to satisfy the objectives of Clause 1.2 (2) (a) of the Strathfield Local Environmental Plan 2012 which seeks to ensure a high quality built form by ensuring that new development exhibits design excellence and reflects the existing or desired future character of the Marlborough Road streetscape. (Section 4.15(a)(i) of the *Environmental Planning and Assessment Act 1979*).
2. The proposal is in breach of the height standard in Clause 4.3 of the Strathfield Local Environmental Plan 2012 and the Clause 4.6 variation is not well founded.

3. In accordance with Section 4.15(1)(a)(i) of the *Environmental Planning and Assessment Act 1979*, the proposal does not meet the minimum front and side setbacks requirements under Part C Multiple Unit Housing of the Strathfield Consolidated Development Control Plan 2005 resulting in an overdevelopment of the site that does not support residential amenity.
4. In accordance with Section 4.15(1)(a)(iii) of the *Environmental Planning and Assessment Act 1979*, the proposal fails to provide 15% of the rooms in the development as Adaptable Housing (AS 4299 – Adaptable Housing Class C) as required under Part C Multiple Unit Housing of the Strathfield Consolidated Development Control Plan 2005.
5. The proposed development makes insufficient provision for the onsite storage and management of waste in accordance with the requirements of Part H of the Strathfield Consolidated Development Control Plan 2005 (Section 4.15(a)(iii) of the *Environmental Planning and Assessment Act 1979*).
6. Proposed development is unsuitable for the site pursuant to Section 4.15(1)(c) of the *Environmental Planning and Assessment Act 1979*, in particular but not limited to, building access and internal circulation, functionality and amenity of communal open space and areas for residents, privacy and noise impacts on neighbours, and manager's accommodation and private open space. In addition, the proposed development is poorly located in terms of access to public transport, essential services and shopping precincts.
7. The proposal fails to comply with the car-parking standards provided by the Affordable Rental Housing SEPP 2009 as amended in April 2018.
8. Pursuant to the provisions of Section 4.15(1)(d) & (e) of the *Environmental Planning and Assessment Act 1979*, it is considered that the proposed development would not be in the public interest.
